Critical International Theory Richard Devetak, 2018-07-04 Whether inspired by the Frankfurt School or Antonio Gramsci the impact of critical theory on the study of international relations has grown considerably since its advent in the early 1980s This book offers the first intellectual history of critical international theory Richard Devetak approaches this history by locating its emergence in the rising prestige of theory and the theoretical persona As theory's prestige rose in the discipline of international relations it opened the way for normative and metatheoretical reconsiderations of the discipline and the world The book traces the lines of intellectual inheritance through the Frankfurt School to the Enlightenment German idealism and historical materialism to reveal the construction of a particular kind of intellectual persona the critical international theorist who has mastered reflexive dialectical forms of social philosophy In addition to the extensive treatment of critical theory's reception and development in international relations the book recovers a rival form of theory that

originates outside the usual inheritance of critical international theory in Renaissance humanism and the civil Enlightenment. This historical mode of theorising was intended to combat metaphysical encroachments on politics and international relations and to prioritise the mundane demands of civil government over the self-reflective demands of dialectical social philosophies. By proposing contextualist intellectual history as a form of critical theory, Critical International Theory defends a mode of historical critique that refuses the normative temptations to project present conceptions onto an alien past and to abstract from the offices of civil government.

This comprehensive foundation for the study of realism will introduce students in disciplines as varied as philosophy, international relations and strategic studies to the majestic breadth of the realist tradition that unifies them all. The work is comprised of four volumes, each focusing upon a distinct period and the pivotal contributors writing in that era. Volume 1: State of Hope looks at the classical era when chaos reigned supreme. Volume 2: State of Fear goes through the early modern period and the emergence of the modern state. Volume 3: State of Awe explores the age of total war with its unprecedented dangers. Volume 4: State of Siege examines the present era of insurgency and asymmetrical conflict. employing the logic of deconstruction pioneered by Derrida to explicate the consequences of taking into account the dilemmas and inconsistencies of these theories The book demonstrates that the logic of deconstruction is resourceful and rigorous in its questioning of the presuppositions of prevailing IR approaches and argues that relying on deconstruction leads to richer and more powerfully insightful pluralist IR theories and is an invaluable resource for taking IR theory beyond currently paralyzing wars of paradigms Questioning universally accepted presuppositions in existing theories this book provides an innovative and exciting contribution to the field and will be of great interest to scholars of international relations theory critical theory and international relations
