Trance Forms Ronaldo Morelos,2010-05-21 This study investigates forms of theatre performance practice and training that can be seen to employ trance states or engage the concept of states of consciousness as performative practice Trance is considered to be the result of sustained involvement with detailed information that is structurally organised invoking imaginative and affective engagements that are maintained as interactions between the performer other performers the environment and audience of the performance This thesis investigates trance performance through the conceptual lens of dramatic arts practice In their respective cultural contexts trance and theatre attain qualities considered as sacredness Trance practice and performance across a range of cultural contexts are analysed as social processes as elements of power relations that influence the performer audience and environment of the performance As performance traditions and events this study will examine strands of praxis that can be drawn from Constantin Stanislavski to Lee Strasberg to Mike Leigh from Antonin Artaud to Samuel Beckett and Jerzy Grotowski from the Balinese trance performance form of Sanghyang Dedari in the 1930s to the 1990s from the Channeling practitioners in the U S in the 1930s

to Seth and Lazaris in the 1970s to the 1990s and from traditions of military training performance violence and rhetoric associated with the attacks of the 11th of September 2001 in the U S and its aftermath **EU Counter-Terrorism and Intelligence** Javier Argomaniz, Oldrich Bures, Christian Kaunert, 2017-10-02 The Treaty on the European Union stipulates that one of the key objectives of the Union is to provide citizens with a high level of safety within an Area of Freedom Security and Justice Given that the fight against terrorism is a prominent aspect of this general objective it is remarkable that in spite of its political relevance and decade long history it has only relatively recently received due attention in the academic community Yet an analysis of the successes and failures of the EU s involvement in this field is imperative and this is a particularly pertinent moment to take stock of progress The goal of this book is therefore to look back at the post 9 11 period and answer the question of whether when it comes to the measures taken to combat terrorism following these attacks the EU has lived up to the promise made in its founding treaties In pursuing this goal this volume presents the views of leading experts casting a critical eye over the EU s performance recognising achievements but also being suitably critical when the realities did not match the European rhetoric In doing this the book makes a significant contribution not only to the scholarly investigation of European Union policies but also to the study of counter terrorism in general This book was published as a special issue of *Intelligence and National Security* *Political Science Quarterly* Columbia University, Faculty of Political Science, 1931 A review devoted to the historical statistical and comparative study of politics economics and public law

European Union in the Global Context Simon Sweeney, 2023-12-22 European Union in the Global Context explores the interplay between the state and state sovereignty nationalism European integration and globalisation It provides essential foundations in these areas while using stimulating arguments to prompt discussion and provoke interest in the relationships between these processes It critically analyses the challenges faced by the EU from the contemporary political and economic dynamics of globalisation IPE including trading relationships set through the WTO and bilateral relations with emerging markets especially the BRICS economies Likewise pressures from within such as a resurgence of nationalism localisation anti austerity politics and Euroscepticism are examined While the Union is fundamentally challenged by pressures from above and below and by its own internal dysfunction it remains central to the effective management of the international political economy European Union in the Global Context is a lively focused and engaging text incorporating anecdotes and contemporary arguments and presenting different perspectives on European integration and globalisation It will be of key interest to students of European Politics European Studies European Union Studies and more broadly global political economy foreign and security policy and international relations **Terror and Taboo** Joseba Zulaika, William Douglass, 2016-04-22 Terror and Taboo is about the mythology of terrorism it is an exploration of the ways we talk about terrorism It offers incontestable evidence to support the idea that we give power to terrorism by the way we write and talk about it According to Zulaika and Douglass we make terrorism worse by the way we represent it in the media and in

everyday conversation Through their examination of terrorism they propose to remove the taboos surrounding terrorism
Terror and Taboo is full of examples to ground the authors premise ranging from specific examples such as tendency to talk more about where Timothy McVeigh shopped for weapons than about the international traffic in arms by legitimate nations to more theoretical interpretations that will be familiar to readers of cultural studies books
