Wei Wang,2016-05-23 This book assesses new developments in and reform of China's banking law system following its accession of the WTO. It focuses on the relationship between GATS WTO national treatment obligations and China's banking law. Tracing the history of national treatment in China, the book compares the treatment of foreign funded banks with the treatment of Chinese funded banks and examines the structure and shortcomings of the existing banking law framework in China. Offering suggestions as to how the framework could be restructured and analysing the economic and political bases of an integrated banking law framework, the book argues that reorganization would bring about greater consistency with GATS WTO national treatment requirements. The book also explores the ambiguous definition of prudential carve out, the subtle relationship between GATS national treatment and market access based on WTO cases, national treatment clauses in China's bilateral investment treaties and special treatment on banking in China's free trade agreements. This volume is a valuable resource for academics and students as well as professionals and policy makers working in the field of banking WTO Chinese law and foreign trade.

Insurance Regulation in North America Bradley J. Condon, Joyce C. Sadka, Tapen Sinha, 2003-01-01

The intersection of insurance regulation and trade agreements is of obvious significance to international competitiveness and thereby to national welfare. Yet until this masterful study, the subject has remained virtually unexplored. *Insurance Regulation in North America* far from merely addressing this important area of theory and practice, superbly balances a world of detailed analysis and commentary with deeply insightful interpretation and debate. The book's focus on insurance regulation in three countries allows the authors to approach the subject in an extraordinary depth that could not be achieved in a more global account. In the course of their treatment, the authors offer the reader the following invaluable insights among many others: analysis of the political dimension of reaching agreements and of implementing them; comparison of the three major trade agreements that apply in the North American insurance market: NAFTA, WTO agreements on financial services and MEUFTA (the Mexico-European Union Free Trade Agreement) with emphasis on the relationship between GATS and NAFTA principles; investigation of the clear convergence of regulatory schemes and the probable limits to harmonization; discussion of the arbitrage by which companies get around regulatory restrictions and exploit opportunities created by loopholes; clarification of the crucial issues surrounding the role of customary international law principles in investor protection obligations; discussion of the level of government and which government agencies a company must turn to in order to satisfy legal requirements; analysis of the jurisprudence of the Supreme Court of Mexico regarding legal effects of treaties on domestic law; commentary on the effects of demutualization and of mergers and acquisitions; discussion of the effect of the entrenchment of U.S. State regulations and the federal government's lack of clear power to force State compliance; and description of dispute settlement procedures between governments. Although important issues arising in each of the three countries are all covered, there is an emphasis on the Mexican market in recognition of Mexico's greater future growth potential and of the relative paucity of relevant literature in English. Major case studies that reveal processes of compliance

or conflict are analyzed in detail For insurance professionals lawyers business executives and policymakers who want to understand what international trade agreements contain how they work and how they affect domestic insurance regulation and business strategy in what is rapidly becoming a global market for insurance and other financial services this book is a gold mine Scholars and academics in insurance law and international economic law will also find here a fresh new treatise of great significance

*International Banking Regulation: Law, Policy and Practice* George Walker, 2001-12-06 This work offers a comprehensive examination of the development and structure of the provisions for the control of international financial markets It explores the background to the major financial crises of the late 20th century and the nature of the global response

Public Interest Rules of International Law Teruo Komori, 2016-04-15 This book clarifies factors that play an important role in securing the effectiveness of legal regimes that aim to protect public interests of the international community In Part 1 the authors focus on theoretical problems arising in the implementation process of those legal regimes from both a constitutional and functional perspective In Parts 2 through Part 4 they pay attention to practical issues in the implementation process of particular legal regimes in light of what interpretation or measures are legitimate from the perspective of protecting public interests This book incorporates an idea of public law into the theoretical framework of international law which has been mainly constructed on the theory of private law in domestic legal systems In contrast to many books which focus on the role of the procedural and material factors in the implementation process of various institutions and rules this book emphasises the role of normative factors in securing effectiveness of public interests oriented rules and is a valuable resource for both academics and policy makers working in this area
