**Internationalization, Corporate Preferences and Commercial Policy in Japan** Hidetaka Yoshimatsu, 2000 Trading Blocs Kerry A. Chase, 2009-09-08 Global commerce is rapidly organizing around regional trading blocs in North America Western Europe Pacific Asia and elsewhere with potentially dangerous consequences for the world trading system Professor Kerry Chase examines how domestic politics has driven the emergence of these trading blocs arguing that businesses today are more favorably inclined to global trade liberalization than in the past because recent regional trading arrangements have created opportunities to restructure manufacturing more efficiently Trading Blocs is the first book to systematically demonstrate the theoretical significance of economies of scale in domestic pressure for trading blocs and thereby build on a growing research agenda in areas of political economy and domestic politics Chase has written a superb book that provides us with an innovative and compelling explanation for the development of trading blocs Vinod Aggarwal Director Berkeley APEC Study Center University of California Berkeley Kerry A Chase is Assistant Professor of Political Science at Tufts University

*Free Traders* Malcolm Fairbrother, 2020 Today's global economy was largely established by political events and decisions in the 1980s and 90s when scores of nations opened up their economies to the forces of globalization In Free Traders Malcolm Fairbrother argues that politicians' embrace of globalization was much less motivated by public preferences than by the agendas of businesspeople and other elites Drawing on over one hundred interviews with decision makers and analyses of archival materials from Canada Mexico and the U S Fairbrother tells the story of how each country negotiated and ratified two

agreements that substantially opened and integrated their economies the 1989 Canada U S and trilateral 1994 North American Free Trade Agreement Contrary to what many commentators believe these agreements like free trade elsewhere were based less on mainstream neoclassical economics than on the informal self serving economic ideas of business While the stakes in the globalization debate remain high Free Traders uses a comparative historical approach to sharpen our understanding of how globalization arose in the past to provide us with clearer trajectory for how it will develop in the future

*Resource Nationalism in Indonesia* Eve Warburton,2023-11-15 In *Resource Nationalism in Indonesia* Eve Warburton traces nationalist policy trajectories in Indonesia back to the preferences of big local business interests Commodity booms often prompt more nationalist policy styles in resource rich countries Usually this nationalist push weakens once a boom is over But in Indonesia a major global exporter of coal palm oil nickel and other minerals the intensity of nationalist policy interventions increased after the early twenty first century commodity boom came to an end Equally puzzling the state applied nationalist policies unevenly across the land and resource sectors *Resource Nationalism in Indonesia* explains these trends by examining the economic and political benefits that accrue to domestic business actors when commodity prices soar Warburton shows how the centrality of patronage to Indonesia s democratic political economy and the growing importance of mining and palm oil as drivers of export earnings enhanced both the instrumental and structural power of major domestic companies giving them new influence over the direction of nationalist change
