Miller, 2005-03-11 A comprehensive reference that addresses the need for solid understanding of the operation of IP networks plus optimization and management techniques to keep those networks running at peak performance Uniquely distinguished from other books on IP networks as it focuses on operation and management support and is not just another treatise on protocol theory Includes many practical case studies as further illustration of the concepts discussed Internet Security Man Young Rhee, 2003 Table of contents *Cellular Internet of Things* Olof Liberg, Marten Sundberg, Eric Wang, Johan Bergman, Joachim Sachs, 2017-09-15 Cellular Internet of Things Technologies Standards and Performance gives insight into the recent work performed by the 3rd Generation Partnership Project 3GPP to develop systems for the Cellular Internet of Things It presents both the design of the new Narrowband Internet of Things NB IoT technology and how GSM and LTE have evolved to provide Cellular Internet of Things services The criteria used for the design and objectives of the standardization work are explained and the technical details and performance of each technology is presented This book discusses the overall competitive landscape for providing wireless connectivity also introducing the most promising technologies in the market Users will learn how cellular systems work and how they can be designed to cater to challenging new requirements that are emerging in the telecom industry what the physical layers and procedures in idle and connected mode look like in EC GSM IoT LTE M and NB IoT and what the expected performance of these new systems is in terms of expected coverage battery lifetime data throughput access delay time and device cost Learn How cellular systems work and how they can be designed to cater for challenging new

requirements emerging in the telecom industry How the physical layers and the procedures in idle and connected mode look like in EC GSM IoT LTE M and NB IoT What the expected performance of these new systems is in terms of expected coverage battery lifetime data throughput access delay time and device cost How the Low Power Wide Area IoT market segment looks like and how different available solutions compare in terms of performance and compatibility with already existing radio networks What system capacity and network level performance can be achieved when deploying these new systems and in addition what deployment options are possible Provides a detailed introduction to the EC GSM IoT LTE M and NB IoT technologies Presents network performance of the 3GPP cellular technologies along with an analysis of the performance of non cellular alternatives operating in unlicensed spectrum Includes prediction of true performance levels using state of the art simulation models developed in the 3GPP standardization process *Internet Science* Svetlana S. Bodrunova, 2018-10-17 This book constitutes the proceedings of the 5th International Conference on Internet Science held in St Petersburg Russia in October 2018 The 23 papers presented were carefully reviewed and selected for inclusion in this volume They were organized in topical sections named risks on the Internet detecting harmful content and discussing regulation methodologies for studies of online audiences and online media and public issues *Internet Jurisdiction Law and Practice* Julia Hörnle, 2021-01-07 From a technological standpoint geography is largely irrelevant Data flows through the internet without regard for political borders or territories Services communication and interaction can occur online between persons who may be in different countries Illegal activities like hacking cyberespionage propagating terrorist propaganda defamation revenge porn and illegal marketplaces may all be remotely targeted and accessed from various countries As such the internet has created an interesting and complex set of challenges for the concept of jurisdiction and conflicts of law This title takes a comparative approach covering the EU UK US Germany and China Broken into four parts this book delves into the notion of jurisdiction as it relates to the internet Part I focuses on the different meanings of the concept of jurisdiction from a legal and historical perspective and distinguishing between the different branches of government It will highlight the challenges created by the internet including social media and cloud computing Part II analyses criminal jurisdiction in regards to both jurisdictions in cybercrime cases and jurisdictional issues relating to criminal investigations access to the cloud and enforcement Part III examines jurisdiction and applicable law in civil and commercial matters such as e commerce B2B and B2C contracts torts typically occurring online and online defamation and privacy infringement Finally Part IV looks at regulatory jurisdiction examining the power of the executive whether an arm of government or independent regulator to apply and enforce national law It will look at aspects like the provision of online audio visual media services and online gambling services both of which are heavily regulated but which can be easily provided remotely from different jurisdictions The book concludes by analysing how the concept of jurisdiction should be adapted to ensure the rule of law by nation states and prevent international conflicts between states This title gives a comprehensive look at the complicated subject of internet

jurisdiction essential for all dealing with jurisdictions in the modern age **Internet of Things** Yongheng Wang,Xiaoming Zhang,2012-07-27 This book constitutes the refereed proceedings of the International Workshop on Internet of Things IOT 2012 held in Changsha China during August 17 19 The 95 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on wireless sensor networks RFID sensors and equipments data processing security applications and others Internet of Things, Smart Spaces, and Next Generation Networks and Systems Sergey Balandin,Sergey Andreev,Yevgeni Koucheryavy,2014-08-01 This book constitutes the joint refereed proceedings of the 14th International Conference on Next Generation Wired Wireless Advanced Networks and Systems NEW2AN 2014 and the 7th Conference on Internet of Things and Smart Spaces ruSMART 2014 held in St Petersburg Russia in August 2014 The total of 67 papers was carefully reviewed and selected for inclusion in this book The 15 papers selected from ruSMART are organized in topical sections named smart spaces core technologies smart spaces for geo location and e tourism apps smart space supporting technologies and video solutions for smart spaces The 52 papers from NEW2AN deal with the following topics advances in wireless networking ad hoc networks and enhanced services sensor and machine type communication networking architectures and their modeling traffic analysis and prediction analytical methods for performance evaluation materials for future communications generation and analysis of signals business aspects of networking progress on upper layers and implementations modeling methods and tools techniques algorithms and control problems photonics and optics and signals and their processing **Criteria for the Evaluation of Product Categories for Successful Transactions on Internet-Based Business-to-Business Marketplaces: An Exploratory Study with mondus.de GmbH** Matthias Herfert,2001-03-15 Inhaltsangabe Abstract The Internet plays an important role of today s management decision making Great opportunities have to be weighted against investments into knowledge technology and organizational restructuring Often great uncertainty is involved because of rapidly changing technologies and mutual dependence of transaction parties on each other s degree of technology adoption The main advantage of electronically performed activities is its improved efficiency In the past business to business applications have been based on specific investments of individual firms that attempted to gain competitive advantages from proprietary electronic data interchange EDI However investments were huge and flexibility was very limited Nowadays Internet technologies allow for global reach ubiquity and improved efficiency at reduced asset specificity One business application of Internet technologies is the independent business to business Internet based marketplace IBMP on which buyers and sellers can perform service product information and money transactions Due to the early stage of technology adoption the suitability of specific IBMP transactions is often unclear and all those actors involved have to make strategic decisions concerning the way in which future product transactions will be performed With the help of this thesis buyers sellers and marketplace providers can evaluate the transactional suitability of product categories Such an evaluation is of particular importance to small and

medium sized enterprises SME They often lack automation and economies of scale Therefore the potential of improved efficiency through Internet technologies is here especially high An exploratory study with the IBMP mundus has allowed for an empirical testing of selected evaluation criteria within selected product categories The final results of the application explain the complexity of the decision situation and the remaining uncertainty due to the early stage of technology adoption
