cyber communication has been infiltrating our life The infiltration started with small and limited application like email and short messages but now the infiltration has been securing some hours of our daily communications among human beings Humans from all ages plunge in the arena of cyber communication We may have had the assumption of face to face interaction politeness principles and features transferred to its cyber counterpart and vice versa Some of those politeness principles and features work well in both worlds Those are human made principles and used in the human world anyway However it is so often some principles which work well in a medium fail to convert comfortably in the other medium
