Interpreting Environments Robert Mugerauer, 2014-10-14 In this pioneering book Robert Mugerauer seeks to make deconstruction and hermeneutics accessible to people in the environmental disciplines including architecture planning urban studies environmental studies and cultural geography Mugerauer demonstrates each methodology through a case study The first study uses the traditional approach to recover the meaning of Jung's and Wittgenstein's houses by analyzing their historical intentional contexts The second case study utilizes deconstruction to explore Egyptian French neoclassical and postmodern attempts to use pyramids to constitute a sense of lasting presence And the third case study employs hermeneutics to reveal how the American understanding of the natural landscape has evolved from religious to secular to ecological since the nineteenth century

Interpreting Environments Robert Mugerauer, 1995 In this pioneering book Robert Mugerauer seeks to make deconstruction and hermeneutics understandable and useable for people in the environmental disciplines including architecture planning urban studies environmental studies and cultural geography He chooses case studies to demonstrate the use of each methodology without advocating any particular one so that their strategies assumptions implications strengths and weaknesses become clear The first case study demonstrates the traditional approach and aims to recover the meaning of Jung's and Wittgenstein's houses by analyzing their historical intentional contexts The second case study utilizes the deconstructivist approach to explore Egyptian French neoclassical and postmodern attempts to use pyramids to constitute a sense of lasting presence And the third case study employs hermeneutics to reveal how the American understanding of the natural landscape has evolved from religious to secular to ecological since the nineteenth century

Visual Theology of the Huguenots Randal Carter Working, 2017-02-23 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have investigated in depth the relationship between Reformed theology and architectural forms In *The Visual Theology of the Huguenots* Randal Carter Working explores the roots of Reformed aesthetics set against the background of late medieval church architecture Indicating how demonstrably important the work of Serlio is in the spreading of the ideas of Vitruvius Working explains the influence of classical Roman building on French Reformed architecture He follows this with an examination of five important Huguenot architects Philibert de l'Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret The distinct language of Huguenot architecture is revealed by his comparative analysis of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings demonstrate how the contribution of Huguenot architecture gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

Drenthen, David Utsler, 2013-11-11 Modern environmentalism has come to realize that many of its key concerns wilderness and nature among them are contested territory viewed differently by different people Understanding nature requires science and ecology to be sure but it also requires a sensitivity to history culture and narrative Thus understanding nature is a fundamentally hermeneutic task The Routledge Companion to Hermeneutics Jeff Malpas, Hans-Helmuth

Flood Risk and Social Justice Zoran Vojinovic,Michael B. Abbott,2012-03-05 Flood Risk and Social Justice is a response to the rising significance of floods and flood related disasters worldwide as an initiative to promote a socially just approach to the problems of flood risk It integrates the human social and the technological components to provide a holistic view This book treats flooding as a multi dimensional human and natural world tragedy that must be accommodated using all the social

and technological means that can be mobilised before during and after the flooding event It covers socially just flood risk mitigation practices which necessitate a wide range of multidisciplinary approaches starting from social and wider environmental needs including feedback cycles between human needs and technological means Flood Risk and Social Justice looks at how to judge whether a risk is acceptable or not by addressing an understanding of social and phenomenological considerations rather than simple calculations of probabilities multiplied by unwanted outcomes and their balancing between costs and benefits It is argued that the present flood management practice should be largely replaced by the social justice approach where particular attention is given to deciding what is the right thing to do within a much wider context Thus it insists upon the validity of modes of human understanding which cannot be addressed within the limited context of modern science Flood Risk and Social Justice is written to support a wide range of audiences and seeks to improve the dialogue between researchers and practitioners from different disciplines including post graduate engineering environmental and social science students industry practitioners academics planners environmental advocacy groups and environmental law professionals who have a strong interest in a new kind of social justice work that can act as a continuous counter balance to the various mechanisms that unceasingly give rise to profound injustices More information about this book can be found in this article written for the WaterWiki by the author <http://www.iwaterwiki.org/xwiki/bin/view/Articles/FloodRiskandSocialJustice> Authors Zoran Vojinovic is Associate Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands with almost 20 years of consulting and research experience in various aspects of water industry in New Zealand Australia Asia Europe Central South America and the Caribbean Michael B Abbott is Emeritus Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands and a Director of the European Institute for Industrial Leadership in Brussels He founded and developed the disciplines of Computational Hydraulics and Hydroinformatics and co founded the Journal of Hydroinformatics with Professor Roger Falconer

The Sacred In-Between: The Mediating Roles of Architecture Thomas Barrie, 2013-09-13 The sacred place was and still is an intermediate zone created in the belief that it has the ability to co join the religious aspirants

to their gods An essential means of understanding this sacred architecture is through the recognition of its role as an in between place Establishing the contexts approaches and understandings of architecture through the lens of the mediating roles often performed by sacred architecture this book offers the reader an extraordinary insight into the forces behind these extraordinary buildings Written by a well known expert in the field the book draws on a unique range of cases reflecting on these inspiring places their continuing ontological significance and the lessons they can offer today Fascinating reading for anyone interested in sacred architecture *House and Home* Thomas Barrie,2017-03-16 House and home are words routinely used to describe where and how one lives This book challenges predominant definitions and argues that domesticity fundamentally satisfies the human need to create and inhabit a defined place in the world Consequently house and home have performed numerous cultural and ontological roles and have been assiduously represented in scripture literature art and philosophy This book presents how the search for home in an unpredictable world led people to create myths about the origins of architecture houses for their gods and house tombs for eternal life Turning to more recent topics it discusses how writers often used simple huts as a means to address the essentials of existence modernist architects envisioned the capacity of house and home to improve society and the suburban house was positioned as a superior setting for culture and family Throughout the book house and home are critically examined to illustrate the perennial role and capacity of architecture to articulate the human condition position it more meaningfully in the world and assist in our collective homecoming Drawn to Design Eric Jenkins,2022-04-19 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design for instance issues of fa ade are illustrated with sketch diagrams that show how fa ades can be explored and sketched through a series of specific questions and step by step procedures In the expanded and updated edition a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing **Marie Antoinette at Petit Trianon** Denise Maior-Barron,2018-07-11 Marie Antoinette at Petit Trianon challenges common perceptions of the last Queen of France appraising the role she played in relation to the events of French Revolution through an original analysis of contemporary heritage practices and visitor perceptions at her former home the Petit Trianon Controversy and martyrdom have placed Marie Antoinette s image within a spectrum of cultural caricatures that range from

taboo to iconic With a foundation in critical heritage studies this book examines the diverse range of contemporary images portraying Marie Antoinette s historical character showing how they affect the interpretation and perception of the Petit Trianon By considering both producers and receivers of these cultural heritage exponents Marie Antoinette s historical figure and the historic house museum of the Petit Trianon the book expands current understandings of twenty first century cultural heritage perceptions in relation to tourism and popular culture A useful case study for academics researchers and postgraduate students of cultural heritage it will also be of interest to historians keepers of house museums and those working in the field of tourism studies
