Interpreting Evolution Darwin And Teilhard De Chardin

H. James Birx

Interpreting Evolution Darwin And Teilhard De Chardin:

Interpreting Evolution H. James Birx, 1991 Professor H James Birx shows how the never ending controversy of human evolution came to be He details the events that caused thinkers like Charles Darwin to develop his theory of evolution and what ideas caused some people to reconcile a somewhat mystical theology with a concrete model of the universe He tells you how Darwin's work infuriated everybody from God fearing Christians to the church hierarchies Birx explains how scientific advances and philosophical arguments have made beliefs about divine intervention as the origin of man a moot point He shows how creationism ignores proven scientific facts and how human evolution remains a much sounder truth You'll read how some western religions are starting to accept evolution as the process which creates life on earth You'll also learn why scientific evolution and creationism have not been accepted together and how bold attempts to merge the two ideas have failed miserably

Wood, 2012-08-01 In 1962 when the Cold War threatened to ignite in the Cuban Missile Crisis when more nuclear test bombs were detonated than in any other year in history Rachel Carson released her own bombshell *Silent Spring* to challenge society's use of pesticides To counter the use of chemicals and bombs the naturalist articulated a holistic vision She wrote about a web of life that connected humans to the world around them and argued that actions taken in one place had consequences elsewhere Thousands accepted her message joined environmental groups flocked to Earth Day celebrations and lobbied for legislative regulation Carson was not the only intellectual to offer holistic answers to society's problems This book uncovers a sensibility in post World War II American culture that both tested the logic of the Cold War and fed some of the twentieth century's most powerful social movements from civil rights to environmentalism to the counterculture The study examines important leaders and institutions that embraced and put into practice a holistic vision for a peaceful healthful and just world nature writer Rachel Carson structural engineer R Buckminster Fuller civil rights leader Martin Luther King Jr Jesuit priest and paleontologist Pierre Teilhard de Chardin humanistic psychologist Abraham Maslow and the Esalen Institute and its founders Michael Murphy and Dick Price Each looked to whole systems instead of parts and focused on connections interdependencies and integration to create a better world Though the 60s dreams of creating a more perfect world were tempered by economic inequalities political corruption and deep social divisions this holistic sensibility continues to influence American culture today *Bernard Lonergan's Method and a Medical Doctor's Approach to Healthcare* John Raymaker, 2021-03-10 Pat Daly MD has written a series of articles which uphold Bernard Lonergan's method explored in his

famous book *Insight* as a model that could be followed or applied in practicing medicine or promoting healthcare Daly calls his effort a GEM Model for medicine Daly however has not explored in depth Lonergan's second major work *Method in Theology* which develops an eight step method that complements *Insight* This book focuses on these eight steps or Functional Specialties so as to better promote Lonergan's views on Healing and Creating in History *God's Soldiers* Jonathan Wright, 2005-10-18 Throughout history members of the Society of Jesus popularly known as Jesuits have been accused of killing kings and presidents have traveled as missionaries to every corner of the globe founded haciendas in Mexico explored the Mississippi and Amazon rivers and served Chinese emperors as map makers painters and astronomers As well as the predictable roll call of saints and martyrs the Society can also lay claim to the thirty five craters on the moon named for Jesuit scientists Jesuits have been despised and idolized on a scale unknown to members of any other religious order they have died the most horrible deaths and done the most outlandish deeds Whether loved or loathed the Jesuits dramatic and wide ranging impact could never be ignored By the mid eighteenth century they had established more than 650 educational institutions They were also strongly committed to foreign missions and like the secular explorers and settlers of the Age of Discovery they traveled to the Far East India and the Americas to stake a claim They were especially successful in Latin America where they managed to put numerous villages entirely under Jesuit rule The Jesuits successes both in Europe and abroad coupled with rumors of scandal and corruption within the order soon drew criticism from within the Church and without Writers such as Pascal and Voltaire wrote polemics against them and the absolute monarchs of Catholic Europe sought to destroy them Their power was seen as so threatening that hostility escalated into serious political feuds and at various times they were either banned or harshly suppressed throughout Europe *God's Soldiers* is a fascinating chronicle of this celebrated mysterious and often despised religious order Jonathan Wright illuminates as never before their enduring contributions as well as the controversies that surrounded them The result is an in depth unbiased and utterly compelling history

Darwinism and Natural Theology Andrew Robinson, 2012-03-15 Can Christianity be reconciled with Darwin's theory of evolution by natural selection What relevance do the biological sciences have to religious thought Does Christian theology have anything to offer when it comes to formulating scientific hypotheses These questions are among those explored in this collection of essays arising from a meeting of the UK Science and Religion Forum held in Cambridge to mark the bicentenary of Darwin's birth and the 150th anniversary of the publication of *The Origin of Species* The volume brings together contributions from a distinguished group of scholars at the forefront of the field of science and religion including Denis Alexander R J Berry John Hedley Brooke Sarah Coakley Celia Deane Drummond David Fergusson David Knight Christopher Southgate Neil Spurway and Kenneth Wilson The essays are organized around the theme of natural theology the attempt to draw theological conclusions from reflection on the natural world The essays cover historical philosophical and theological perspectives and explore some contemporary approaches to natural theology in the context of Darwinism

Aristotle's Concept of Chance John Dudley, 2012-02-23 This landmark book is the first to provide a comprehensive account of Aristotle's concept of chance. Chance is invoked by many to explain order in the universe, the origins of life, even human freedom and happiness. An understanding of Aristotle's concept of chance is indispensable for an appreciation of his views on nature and ethics, views which have had a tremendous influence on the development of Western philosophy. Author John Dudley analyzes Aristotle's account of chance in the *Physics*, the *Metaphysics*, in his biological and ethical treatises, and in a number of his other works, as well. Important complementary considerations such as Aristotle's criticism of Presocratic philosophers, particularly Empedocles and Democritus, Plato's concept of chance, the chronology of Aristotle's works, and the relevance of Aristotle's work to evolution and quantum theory are also covered in depth. This is an essential book for scholars and students of Western philosophy.

God and the Folly of Faith Victor J. Stenger, 2012 Looking at both historical and contemporary contexts, the author argues that religion has played a major role in suppressing scientific pursuit.

The Enculturated Gene Duana Fullwiley, 2011-11-07 In the 1980s, a research team led by Parisian scientists identified several unique DNA sequences or haplotypes linked to sickle cell anemia in African populations. After casual observations of how patients managed this painful blood disorder, the researchers in question postulated that the Senegalese type was less severe. *The Enculturated Gene* traces how this genetic discourse has blotted from view the roles that Senegalese patients and doctors have played in making sickle cell mild in a social setting where public health priorities and economic austerity programs have forced people to improvise informal strategies of care. Duana Fullwiley shows how geneticists who were fixated on population differences never investigated the various modalities of self-care that people developed in this context of biomedical scarcity, and how local doctors, confronted with dire cuts in Senegal's health sector, wittingly accepted the genetic prognosis of better than expected health outcomes. Unlike most genetic determinisms that highlight the absoluteness of disease, DNA haplotypes for sickle cell in Senegal did the opposite. As Fullwiley demonstrates, they allowed the condition to remain officially invisible, never to materialize as a health priority. At the same time, scientists' attribution of a less severe form of Senegalese sickle cell to isolated DNA sequences closed off other explanations of this population's measured biological success. *The Enculturated Gene* reveals how the notion of an advantageous form of sickle cell in this part of West Africa has defined and obscured the nature of this illness in Senegal today. Reading Richard Dawkins Gary Keogh, 2014-02-01 Theological reactions to the rise of the new atheist movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack. Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia. Theology needs to test its boundaries. Engaging Richard Dawkins illustrates how dialogue with antithetical viewpoints may offer new perspectives on classical theological problems. Keogh demonstrates how a dialogical paradigm may take shape, one

which is up to the task of facing its critics in the context of modern academia The Ghost in the Universe Taner Edis,2009-12-02 Emphasizing the results of natural science physicist Taner Edis takes a fresh look at an age old question Is there a God or a spiritual reality beyond nature The Scientific Case Against Scientific Creationism Jon P. Alston,2003-09 Sociologist Jon P Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution He demonstrates how scientific creationists accept non scientific statements that contradict established scientific knowledge Acceptance of anti evolutionary knowledge also demands acceptance of a literal six day creation and other statements contradicting scientific findings Few persons have read so closely the writings of scientific creationists to illustrate how anti scientific anti evolutionists become when they criticize the fact of evolution Creationists are forced to develop just so stories to defend their literal interpretations of Biblical scripture Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles *Between Science and Religion* Phillip M. Thompson,2009-08-15 In exploring the role of Catholic intellectuals in engaging science and technology in the twentieth century this book initially provides a background context for this evolution by examining the Modernism crisis in the first chapter In order to unpack the subsequent evolution Thompson then concentrates in separate chapters on the distinctive contributions of four specific Catholic intellectuals Jacques Maritain 1882D1973 Pierre Teilhard de Chardin 1881D1955 Bernard Lonergan 1904D1984 and Thomas Merton 1915D1968 All of these intellectuals experienced some degree of official restraint in their efforts but through their distinctive intellectual trajectories they contributed to a different engagement of the Church with science and technology In the final chapters the book first reviews the changes within the institutional Church in the twentieth century toward science and technology Finally it then applies some key ideals of the four intellectuals to anneal and extend John Paul II s approach of critical openness to suggest how the Church can now engage science and technology **Interpreting Jesus** Gerald O'Collins SJ,2002-10-15 Interpreting Jesus draws on traditional teaching and the best scripture scholarship to construct a Christology which centers on the crucifixion and the resurrection of Jesus The aim is to explore and clarify what Christian belief in the risen Jesus as Son of God and Savior of the world originally meant and now continues to mean Special features include an excursus on the theological implications of the Shroud of Turin and a return to a theme which contemporary Christology has widely neglected the blood of Jesus and its redemptive symbolism The book ends by linking belief in Jesus with the non Christian world Father O Collins has previously written many articles and shorter works on Jesus Christ This Christology represents a mature climax of those earlier publications **Interpreting Jesus** Gerald O'Collins,2002-10-15 Interpreting Jesus draws on traditional teaching and the best scripture scholarship to construct a Christology which centers on the crucifixion and the resurrection of Jesus The aim is to explore and clarify what Christian belief in the risen Jesus as Son of God and Savior of the world originally meant and now continues to mean Special features include an excursus on the theological implications of the

Shroud of Turin and a return to a theme which contemporary Christology has widely neglected the blood of Jesus and its redemptive symbolism The book ends by linking belief in Jesus with the non Christian world Father O Collins has previously written many articles and shorter works on Jesus Christ This Christology represents a mature climax of those earlier publications
