Interpreting The Industrial Revolution Essays On Global And Comparative:

Interpreting the Industrial Revolution Peter N. Stearns,1991 **A. J. Tomlinson** R. G. Robins,2004-10-28 A J Tomlinson 1865 1943 ranks among the leading figures of the early Pentecostal movement and like so many of his cohorts he was as complex as he was colorful Arriving in Appalachia as a home missionary determined to uplift and evangelize poor mountain whites he stayed to become the co founder and chief architect of the Church of God Cleveland TN and the Church of God of Prophecy which together with their minor offspring now constitute the third largest denominational family within American Pentecostalism R G Robins s biography recreates the world in which Tomlinson operated and through his story offers a new understanding of the origins of the Pentecostal movement Scholars have tended to view Pentecostalism as merely one among many anti modernist movements of the early twentieth century Robins argues that this is a misreading of the movement s origins the result of projecting the modernist fundamentalist controversy of the 1920s back onto the earlier religious landscape Seeking to return the story of Pentecostalism to its proper historical context Robins suggests that Pentecostalism should rightly be seen as an outgrowth of the radical holiness movement of the late nineteenth century He argues that far from being anti modern Pentecostals tended to embrace modernity Pentecostal modernism however was a working class or plainfolk phenomenon and it is the plainfolk character of the movement that has led so many scholars to mislabel it as anti modern or fundamentalist Through the compelling narrative of Tomlinson s life story Robins sheds new light on late nineteenth and early twentieth century American religion and provides a more refined lens through which to view the religious dynamics of our own day v *Subject Guide to Books in Print* ,1996 **Program of the Annual Meeting - American Historical Association** American Historical Association,1996 Some programs include also the programs of societies meeting concurrently with the association *World History Encyclopedia [21 volumes]* Alfred J. Smelser, 2013-03 Collection of essays on sociology causation and pragmatic considerations by one of the leading social scientists of the past half century Now republished in quality ebook format with active TOC linked notes and proper presentation for ereaders and apps **Routledge Handbook of Global Economic History** Francesco Boldizzoni, Pat Hudson, 2015-12-22 The Routledge Handbook of Global Economic History documents and interprets the development of economic history as a global discipline from the later nineteenth century to the present day Exploring the normative and relativistic nature of different schools and traditions of thought this handbook not only examines current paradigmatic western approaches but also those conceived in less open societies and in varied economic political and cultural contexts In doing so this book clears the way for greater critical understanding and a more genuinely global approach to economic history This handbook brings together leading international contributors in order to systematically address cultural and intellectual traditions around the globe Many of these are exposed for consideration for the first time in English The chapters explore dominant ideas and historiographical trends and open them up to critical transnational perspectives This volume is essential reading for both academics and students in economic and social history As this field of study is very much a bridge between the social sciences and humanities the issues examined in the book will also have relevance for those seeking to understand the evolution of other academic disciplines under the pressures of varied economic political and cultural circumstances on both national and global scales *Including a Symposium on 50 Years of the Union for Radical Political Economics* Luca Fiorito, Scott Scheall, Carlos Eduardo Suprinyak, 2019-05-07 Volume 37A of Research in the History of Economic Thought and Methodology features a symposium celebrating 50 years of the Union of Radical Political Economics and includes an archival contribution from the papers of Alvin Hansen reflecting on the influence and contributions of John R Commons **From Domestic Manufacture to Industrial Revolution** Herbert Kisch, 1989-07-27 This book is an economic historical and sociological examination of rural textile industries in the Lower Rhineland beginning in the sixteenth century culminating with the age of factory organization in the early 1800s Drawing on archival sources not available to English language readers the late Kisch analyzes the evolution of entrepreneurial innovations the growth of a skilled labor force and changes in institutional mechanisms and patterns of social behavior that prepared this critical economic region for the innovation of factory production that came with the industrial revolution *British Imperialism and Globalization, C. 1650-1960* Gareth Austin, 2022 Examining the domestic politics of imperial expansion these essays question the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence This volume brings together leading global economic historians to honour Patrick O'Brien's contribution to the establishment of global economic history as a coherent and respected field in the academy Inspired by O'Brien's seminal work on the British

Industrial Revolution as a global phenomenon these essays expand the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence The change from the protective Atlantic empire 1650 1850 to the free trade empire of the last half of the long nineteenth century is elaborated as are the conscious efforts of the free trade empire to develop markets and market economies in Africa British domestic politics associated with the change and the continuation to the recent politics of Brexit are fascinatingly narrated and documented including the economic rationale for imperial expansion in the first instance The narrative continues to the crises of globalization caused by the world wars and the Great Depression which forced the free trade British Empire to change course Further the effects of the crises and the imperial reaction on the East African colonies and on New Zealand and Australia are examined Given current concerns about the environmental impact of economic activities it is noteworthy that this volume includes the environmental impact of globalization in India caused by the free trade policy of the British free trade empire

The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750-Present, Part 1, Structures, Spaces, and Boundary Making J. R. McNeill,Kenneth Pomeranz,2015-04-30 Since 1750 the world has become ever more connected with processes of production and destruction no longer limited by land or water based modes of transport and communication Volume 7 of the Cambridge World History series divided into two books offers a variety of angles of vision on the increasingly interconnected history of humankind The first book examines structures spaces and processes within which and through which the modern world was created including the environment energy technology population disease law industrialization imperialism decolonization nationalism and socialism along with key world regions

The Pacific in the Age of Early Industrialization Kenneth Pomeranz,2017-05-15 The essays selected for this volume show how the Pacific rapidly became part of an industrializing world Its raw materials notably rubber and copper were critical some of its handicraft industries were devastated by mechanized competition others survived and adapted contributing to distinctive patterns of industrialization that made Japan a new center of power and also laid the groundwork for later growth in Taiwan Korea and coastal China The Pacific coast of the Americas was also first drawn into an industrial world largely as an exporter of raw materials but North and South

diverged rapidly portending futures even more different than those of Northeast and Southeast Asia By the 1930s when the uneven effects of industrialization would have much to do with plunging the Pacific into war one can already glimpse in outline the structural bases for many of the region s contemporary characteristics All this is set in context in the important introduction by Kenneth Pomeranz Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history
