Interpretation of American History Garrett Heyns, Garritt E. Roelofs, 1928 **American History Goes to the Movies** W. Bryan Rommel Ruiz, 2011-01-26 Whether they prefer blockbusters historical dramas or documentaries people learn much of what they know about history from the movies In *American History Goes to the Movies* W Bryan Rommel Ruiz shows how

Reconsidering Interpretation of Heritage Sites Anne Lindsay, 2019-08-16 Reconsidering Interpretation of Heritage Sites chronicles and problematizes the representation of the eighteenth century in museums and heritage sites while also challenging public historians to alter their perceptions of what might be possible when interpreting such sites Much of the history consumed at eighteenth century historic sites is one dimensional white male heteronormative and very focused on power and wealth Anne Lindsay argues that this narrative may be challenged through an engagement with the everyday life of the past creating thought provoking and challenging experiences that will connect with the modern visitor on a deeper level Unlike other work that has been done in the field the book provides a constructive study that engages in a horizontal analysis of a century over a geographic region As a result Lindsay provides a unique opportunity for scholars and practitioners to reflect on the types and tone of messages usually conveyed about the eighteenth century Reconsidering Interpretation of Heritage Sites will be invaluable to scholars and practitioners working in the fields of museum and heritage studies and history It will be particularly interesting to those who want to know more about how the lived experience of the past may be interpreted at historic sites and how this could be used to engage with contentious histories

U.S. Museum Histories and the Politics of Interpretation Laura Schiavo, 2023-12-08 U S Museum Histories and the Politics of Interpretation is the first collection to examine the history of museums in the United States through the lens of the political and ideological underpinnings at the heart of exhibitions collecting and programming Including contributions from historians art historians anthropologists academics and museum professionals the book argues that museums have always been embedded in the politics and culture of their time whether that means a reification of hegemonic notions of race gender and progress or a challenge to those normative structures Contributions probe the political nature of

collection and interpretation as concept and practice and museum work as both reflective of and contributing to the politics and circulation of power in different historical moments As a whole the volume provides detailed readings of museums that demonstrate the ways in which these trusted cultural institutions have intervened in shifting concepts of nation community indigeneity race citizenship inclusion identity localism and memory U S Museum Histories and the Politics of Interpretation makes arguments about the historically and politically rooted nature of cultural production in museums that apply to institutions across the globe It is essential reading for students and scholars of museum studies public history cultural history art history and memory

The Making of a History Gregory M. Tobin, 2014-09-10
Walter Prescott Webb became one of the best known interpreters of the American West following the publication of *The Great Plains* in 1931 That book remained one of the outstanding studies of the region for decades and attracted considerable attention over the years for its unusual emphasis on the impact of geographic factors on the process of settlement Using manuscript sources some of which had not previously been available Gregory M Tobin has traced the elements that went into the planning and writing of *The Great Plains* and that account for its distinctive approach to the writing of a regional history Tobin emphasizes two aspects of Webb s life that molded the historian s outlook his early family life and community connections in West Texas and his admiration for the ideas of scholar Lindley Miller Keasbey Webb reacted strongly against the assumption that the only cultural values of any real worth emanated from the urban and sophisticated East he was determined to write the history of his own people in a way that would reveal the scale of their anonymous contribution to American civilization By reverting to Keasbey s stress on the relationship between natural environment and social institutions Webb broadened his study to take in what he believed to be a distinct geographic environment The result was *The Great Plains* an assertion of individual and regional identity by a man with a personal stake in establishing the image of a distinctive Plains civilization Although *The Making of a History* is not a full biography of Walter Prescott Webb it is the first biographically oriented study of a man regarded as one of the twentieth century s major western historians It places his development within the framework of his intellectual and social setting and in a sense subjects his career to the same type of

scrutiny that he advocated as the basis of the study of evolving cultures Doing Oral History Donald A. Ritchie, 2003
