[The Contact Paradox](#) Keith Cooper,2019-10-31 What will happen if perhaps when humanity makes contact with another civilisation on a different planet In 1974 a message was beamed towards the stars by the giant Arecibo telescope in Puerto Rico a brief blast of radio waves designed to alert extraterrestrial civilisations to our existence Of course we don't know if such civilisations really exist For the past six decades a small cadre of researchers have been on a quest to find out as part of SETI the search for extraterrestrial intelligence So far SETI has found no evidence of extraterrestrial life but with more than a hundred billion stars in our Galaxy alone to search the odds of quick success are stacked against us The silence from the stars is prompting some researchers to transmit more messages into space in an effort to provoke a response from any civilisations out there that might otherwise be staying quiet However the act of transmitting raises troubling questions about the process of contact In The Contact Paradox author Keith Cooper looks at how far SETI has come since its modest beginnings and where it is going by speaking to the leading names in the field and beyond SETI forces us to confront our nature in a way that we seldom have before where did we come from where are we going and who are we in the cosmic context of things This book considers the assumptions that we make in our search for extraterrestrial life and explores how those assumptions can teach us about ourselves
