Intimate Fathers The Nature And Context Of Aka Pygmy Paternal Infant Care:

Intimate Fathers Barry S. Hewlett, 1991 This systematic study of non Western fathers roles in infant care focuses on the Aka pygmies of central Africa *The Trouble with Human Nature* Elizabeth D. Whitaker, 2017-02-03 The Trouble with Human Nature brings together biological and cross cultural evidence to critically examine common preconceptions and challenge popular assumptions about human nature It sets out to counter genetic and evolutionary myths about human variation and behavior drawing on both biological and cultural anthropology as well as from other disciplines including psychology economics and sociology The chapters address the interrelated topics of health and disease gender and other differences and violence and conflict The analysis calls into question the presumed natural foundation for social inequalities and sheds light on both the constraints and possibilities inherent in the human condition This book provides students of human diversity and evolution with an excellent resource to better approach questions relating to human nature It will also be of interest to those taking courses in social cultural and biological anthropology as well as public health medical anthropology sociology gender studies psychology and kinship studies *War, Peace, and Human Nature* Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon.com **Anthropology and Child Development** Robert A. LeVine, Rebecca S. New, 2008-02-11 This unprecedented collection of articles is an introduction to the study of cultural variations in childhood across the world and to the theoretical frameworks for investigating and interpreting them Presents a history of cross cultural approaches to child development Recent articles examine diverse contexts of childhood in ecological semiotic and sociolinguistic terms Includes ethnographic studies of childhood in the Pacific Africa Latin America East Asia Europe and North America Illuminates the process through which people become the bearers of culturally historically specific identities Serves as an ideal text for anthropology courses focusing on childhood as well as classes on development psychology *The Metamorphoses of Kinship* Maurice Godelier, 2012-03-03 With marriage in decline divorce on the rise the demise of the nuclear family and the increase in marriages and adoptions among same sex partners it is clear that the structures of kinship in the modern West are in a state of flux In *The Metamorphoses of Kinship* the world renowned anthropologist Maurice Godelier contextualizes these developments surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent sexuality and sexual prohibitions In parallel Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present The conclusion he draws is that it is never the case that a

man and a woman are sufficient on their own to raise a child and nowhere are relations of kinship or the family the keystone of society Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship but rather its remarkable metamorphosis one that ironically is bringing us closer to the traditional societies studied by ethnologists

Baby Meets World Nicholas Day, 2013-04-02 Drawing on scientific historical cross cultural and personal perspectives offers insight into how infants view and experience the world in a work structured around four fundamental infant activities

Collective Care Pamela Downe, 2021-01-04 Collective Care provides an ethnographic account of urban Indigenous life and caregiving practices in the face of Saskatchewan's HIV epidemic Based on a five year study conducted in partnership with AIDS Saskatoon the book focuses on the contrast between Indigenous values of collective kin care and non Indigenous models of intensive maternal care It explores how women and men negotiate the forces of HIV to render motherhood a site of cultural meaning personal and collective well being and sometimes individual and community despair It also introduces readers to how HIV is Indigenized in western Canada and how all HIV affected and infected mothers must negotiate this cultural and racialized terrain Featuring in depth narrative interviews notes from participant observation in AIDS Saskatoon's drop in centre and a photovoice component this book offers an accessible account of an engaged anthropologist's work with a community that is both vulnerable and resilient Each chapter begins with an ethnographic vignette that introduces central concepts including medical anthropology syndemics kinship and Indigeneity with the overall aim of humanizing those affected by HIV in western Canada and beyond

Maasai Childhood Xiaojie Tian, 2024-12-11 This book aims to provide comprehensive ethnographic documentation of pastoralist childhood and child learning based on the author's long term fieldwork in pastoralist Maasai society in southern Kenya It conveys a timely account of the developmental niche in contemporary Maasai society in children's lives social roles work play and learning in family routines Pastoralism is an important livelihood system that has allowed humans to live in arid and semi arid lands for centuries Children in pastoralist societies are expected to and indeed do actively and independently participate in and contribute to local subsistence from an early age Compared to

studies of other forms of livelihood anthropological investigations into pastoralist children remain limited particularly in light of critical social changes pastoralists have undergone in the last three decades Less is known about their local parenting ethnotheories childhood play and children s practices of self reliance in making positive changes in their families and local communities Having a better understanding of pastoral childhood in concurrent natural and social complexities is vital for further investigation of human development in general and the pastoralist culture in particular

The Anthropology of Childhood David F. Lancy, 2014-12-18 How are children raised in different cultures What is the role of children in society How are families and communities structured around them Now available in a revised edition this book sets out to answer these questions and argues that our common understandings about children are narrowly culture bound Enriched with anecdotes from ethnography and the daily media the book examines family structure reproduction profiles of children s caretakers within the family or community their treatment at different ages their play work schooling and transition to adulthood The result is a nuanced and credible picture of childhood in different cultures past and present Organised developmentally moving from infancy through to adolescence and early adulthood this new edition reviews and catalogues the findings of over 100 years of anthropological scholarship dealing with childhood and adolescence drawing on over 750 newly added sources and engaging with newly emerging issues relevant to the world of childhood today

The Hadza Frank Marlowe, 2010-03-23 In The Hadza Frank Marlowe provides a quantitative ethnography of one of the last remaining societies of hunter gatherers in the world The Hadza who inhabit an area of East Africa near the Serengeti and Olduvai Gorge have long drawn the attention of anthropologists and archaeologists for maintaining a foraging lifestyle in a region that is key to understanding human origins Marlowe ably applies his years of research with the Hadza to cover the traditional topics in ethnography subsistence material culture religion and social structure But the book s unique contribution is to introduce readers to the more contemporary field of behavioral ecology which attempts to understand human behavior from an evolutionary perspective To that end The Hadza also articulates the necessary background for readers whose exposure to human evolutionary theory is minimal

The Trouble with Nature Roger N. Lancaster, 2003-04 Lancaster provides the disproof of evolutionary stories about men women and the nature of desire of the heterosexual fables that pervade popular culture from prime time sitcoms to scientific theories about the so called gay gene

How Other Children Learn Cornelius N. Grove, 2023-01-30 To gain comparative insights into middle class Americans child related values and practices Grove s How Other Children Learn examines children s learning and parents parenting in five traditional societies Such societies are those have not been affected by modern urban industrial values and ways of life They are found in small villages and camps where people engage daily with their natural surroundings and have little or no experience of formal classroom instruction The five societies are the Aka hunter gatherers of Africa the Quechua of highland Peru the Navajo of the U S Southwest the village Arabs of the Levant and the Hindu villagers of India Each society has its own chapter which overviews

that society's background and context then probes adults' mindsets and strategies regarding children's learning and socialization for adulthood. The book concludes with two summary chapters that draw broadly on anthropologists' findings about many traditional societies and offer examples from the five societies discussed earlier. The first reveals why children in traditional societies willingly carry out family responsibilities and suggests how American parents can attain similar outcomes. The second contrasts our middle class patterns of child rearing with traditional societies' ways of enabling children to learn and grow into contributing family and community members.

The Nature and Dynamics of Collaboration Paul Verschure, F.M.J., 2025-01-21 A multidisciplinary examination of the phenomenon of collaboration to expand knowledge and inform future activities. Human existence depends critically on how well diverse social, cultural, and political groups can collaborate. Yet the phenomenon of collaboration itself is ill defined and badly understood, and there is no straightforward formula for its successful realization. In *The Nature and Dynamics of Collaboration*, edited by Paul F. M. J. Verschure, experts from wide-ranging disciplines examine how human collaboration arises, breaks down, and potentially recovers. They explore the different contexts, boundary conditions, and drivers of collaboration to expand understanding of the underlying dynamic, multiscale processes in an effort to increase chances for ethical, sustainable, and productive collaboration in the future. This volume is accompanied by twenty-four podcasts which provide insights from real-world examples. Contributors: Asaf Bachrach, Kevin Bauer, Jenna Bednar, Eric D. Hunter-Gatherer Childhoods Barry S. Hewlett, 2017-07-28 In the vast anthropological literature devoted to hunter-gatherer societies, surprisingly little attention has been paid to the place of hunter-gatherer children. Children often represent 40 percent of hunter-gatherer populations; thus, nearly half the population is omitted from most hunter-gatherer ethnographies and research. This volume is designed to bridge the gap in our understanding of the daily lives, knowledge, and development of hunter-gatherer children. The twenty-six contributors to *Hunter-Gatherer Childhoods* use three general but complementary theoretical approaches: evolutionary, developmental, and cultural. In their presentations of new and insightful ethnographic data, for instance, the authors employ these theoretical orientations to provide the first systematic studies of hunter-gatherer children's hunting, play, infant care, weaning, and expressions of grief. The chapters focus on understanding the daily life experiences of children and their views and feelings about their lives and cultural change. Chapters address some of the following questions: why does childhood exist? who cares for hunter-gatherer children? what are the characteristic features of hunter-gatherer children's

development and what are the impacts of culture change on hunter gatherer child care The book is divided into five parts The first section provides historical theoretical and conceptual framework for the volume the second section examines data to test competing hypotheses regarding why childhood is particularly long in humans the third section expands on the second section by looking at who cares for hunter gatherer children the fourth section explores several developmental issues such as weaning play and loss of loved ones and the final section examines the impact of sedentism and schools on hunter gatherer children This pioneering volume will help to stimulate further research and scholarship on hunter gatherer childhoods th

Fatherhood Ross D. Parke,1996 In this new book Parke considers the father child relationship within the family system and the wider society Using the life course view of fathers he demonstrates that men enact their fatherhood in a variety of ways in response to their particular social and cultural circumstances

Cultural Diversity Among Twentieth-Century Foragers Susan Kent,1996-02-15 This book examines variability within broadly defined African forager societies Foragers have been seen as culturally similar as they all pursue a subsistence strategy emphasising hunting and gathering However new research suggests there may be more diversity among groups than has been acknowledged Here leading scholars contrast groups with in forager societies Chapters range in scope from symbolic to ecological and behavioural providing invaluable data on hunter gatherer life for anyone concerned with past or present foragers

Father Nature James K. Rilling,2024-10-01 How and why human males evolved the capacity to be highly involved caregivers and why some are more involved than others We all know the importance of mothers They are typically as paramount in the wild as they are in human relationships But what about fathers In most mammals including our closest living primate relatives fathers have little to no involvement in raising their offspring and sometimes even kill the offspring sired by other fathers How then can we explain modern fathers having the capacity to be highly engaged parents In *Father Nature* James Rilling explores how humans have evolved to endow modern fathers with this potential and considers why this capacity evolved in humans Paternal caregiving is advantageous to children and by extension to society at large yet variable both across and within human societies Rilling considers how to explain this variability and what social and policy changes might be implemented to increase positive paternal involvement Along the way *Father Nature* also covers the impact fathers have on children s development the evolution of paternal caregiving how natural selection adapted male physiology for caregiving and finally what lessons an expecting father can take away from the book as well as what benefits they themselves get from raising children including increased longevity and younger brains A beautifully written book by a father himself *Father Nature* is a much needed and deeply rewarding look at the science behind good paternal behavior in humans

[The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers](#) Vicki Cummings,Peter Jordan,Marek Zvelebil,2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology

and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity
