## **Intimate Loneliness Supporting Bereaved Parents And Siblings:**

**EBOOK: An Intimate Loneliness** Gordon Riches, Pam Dawson, 2000-01-16 What impact does a child's death have on family relationships? How might differences in the way mothers and fathers deal with bereavement contribute to increased marital tension? Why are bereaved siblings so deeply affected by the way their parents grieve? *An Intimate Loneliness* explores how family members attempt to come to terms with the death of an offspring or brother or sister. Drawing on relevant research and the authors' own experience of working with bereaved parents and siblings, this book examines the importance of social relationships in helping parents and siblings adjust to their bereavement. The chances of making sense of this most distressing loss are influenced by the resilience of the family's surviving relationships, by the availability of wider support networks, and by the cultural resources that inform each's perception of death. This book considers the impact of bereavement on self and family identity. In particular, it examines the role of shared remembering in transforming survivors' relationships with the deceased and in helping rebuild their own identity with a significantly changed family structure. Problems considered include the failure of intimate relationships, cultural and gender expectations, the invisibility of fathers and siblings' grief, sudden and difficult deaths, lack of information, and the sense of isolation felt by some family members. This book will be of value to students on courses in counselling, health care, psychology, social policy, pastoral care, and education. It will appeal to sociology students with an interest in death, dying, and mortality. It is also aimed at professionally qualified counselling, health, and social service workers, at informed voluntary group members, the clergy, teachers, and others involved with pastoral care.

**The Dying Soul** Cobb, Mark, 2001-01-01 Holistic models of cancer and palliative care frequently refer to spirituality as an important element. But what do we mean when we talk about spirituality, and how do we provide spiritual care? This book sets out an understanding of this complex domain, describing how spirituality is experienced and expressed, and looks at the impact of terminal illness. The author argues that if we are to recognize spirituality as a significant aspect of living and dying, then care providers must develop an interesting, consistent, and effective approach. Therefore, issues of training, policy, and practice all need to be addressed. Spirituality is often represented as the fourth pillar of palliative care, and yet it is often the least developed area in terms of both theory and practice. Originating from the author's clinical and teaching experience, this book aims to explore the concepts, issues, and practical implications of spirituality in care.
