Journey to the Republic of Indonesia Kalman Dubov, 2021-12-13 Indonesia is an archipelago of 7 500 islands Its inhabitants speak 700 dialects and languages with Bahasa as the national language Travel to any island and the natives will use their local language for commerce and daily activities Its diversity of language and culture reflects its origins as different migrations took place over millennia and settled here The country has the largest Muslim population in the world but the origins of its religious identity reflect Islamic traders introducing the religion and then giving preferential business opportunities to those accepting Islam The exception to Islam is Bali a Hindu enclave amidst a population with a very different belief This unique subset evokes the magic of the exotic and romantic a curious blend found nowhere else Indonesia's early history reflects the great Mataram Empire an empire that extended the boundaries of today's country and whose power and reach serve as the country's idealized state even to the limits of today's boundaries That empire ended with the arrival of the Europeans first with the Portuguese and then the Dutch Dutch colonial presence extended for 350 years broken only by a brief English presence and later by Japanese Imperial forces during World War Two Within days of the Japanese surrender Indonesia declared its independence But post World

War Two Dutch colonial presence returned and a four year guerrilla war and diplomatic effort resulted in the Dutch capitulating and withdrawing from the Archipelago Independence brought many challenges to the country Five unifying concepts known as Pancasila are taught to every citizen from grade school onward creating a national identity The challenge of Pancasila is that only six religions are recognized all others must align themselves with an approved religion or stand beyond governmental protection Indonesia sits astride the Ring of Fire on some of the most powerful volcanoes in the world Every Indonesian readily identifies with the volcanoes nearest them Volcanic activity evacuating for safety and realizing that volcanoes destroy and also enrich the soil marks each islander s deep respect for the destructive power and later fecundity of that eruption To understand the natural phenomena taking place beneath our feet I begin with a review of Earth s plate tectonics and its system of subduction Volcanic activity is a constant in Indonesia with different plates shifting and causing changes on the surface This analysis and review discuss Indonesian history its long subjugation by the Dutch and its recent rise as an independent and self sufficient government The country prospers from its extensive natural resources while the UNESCO site of Borobudur in Central Java together with Temples Pawon and Mendut entice visitors throughout the world I was privileged to visit Indonesia several times appreciating its people its distinctive Batik fabric as well the wide cultural diversity of these special people I hope this review does justice to the country and its unique people **The Arkansas**

[A Wine Journey along the Russian River, With a New Preface](#) Steve Heimoff, 2010-11-15 Steve Heimoff takes readers on an intimate and enlightening tour of one of California's most diverse and accomplished wine areas as he travels along the Russian River and talks with growers and vintners from the Cabernet country of the Alexander Valley to the Pinot Noir producers of the Sonoma coast. This first comprehensive look at the natural history and winemaking practices of the region by one of America's most respected wine critics brings the Russian into the exalted company of the great wine rivers of the world: the Loire, the Rhône, the Rhine, the Mosel, and the Douro. Part wine guidebook, part history and geology, and part travelogue of the author's adventures in wine country, *A Wine Journey along the Russian River* is essential reading for wine lovers, both those fortunate enough to be familiar with the region and those who have never been there. Heimoff guides readers along the length of the scenic river from its warm northern border with Mendocino out to foggy Jenner. He discusses the history and progress of Alexander Valley Zinfandel and Cabernet Sauvignon, Russian River Valley and Sonoma coast Pinot Noir, Sonoma County's Rhône-oriented wines, old-style field blends, and other interesting wines. In the process, he introduces readers to many of the growers and vintners who have made Sonoma County famous: Dick Arrowood, the Rochioli, the Seghesios, Tom Jordon, Bob Cabral, of Williams Selyem, Jess Jackson, of Kendall Jackson, Merry Edwards, and many others. Describing how the river's formation and evolution, both products of the planet's fiery tectonic past as well as the region's complex climate, have created the potential for unparalleled viticultural enclaves and recounting how a variety of people realized that potential, Heimoff

Western Banker, 1926 The Emergence of Geophysics: A Journey into the Twentieth Century R.J. Howarth, 2024-12-02

How did geophysics begin? Who were the pioneers of this new science? What instruments did they devise to measure the Earth-related phenomena they were interested in? This Memoir attempts to answer such questions in a well-illustrated and largely non-technical account. The seventeenth century saw magnetism used as an aid to prospecting for iron ore in Sweden and Isaac Newton's derivation of the law of gravitational attraction. A gradually increasing interest in physics of the Earth brought forth the new discipline of geophysics in the early nineteenth century and by the end of the following century airborne and satellite-based investigations had become routine. *The Emergence of Geophysics* explores this evolution in several parallel strands: terrestrial magnetism and electricity, gravity, seismicity, heat, geodynamics, and radioactivity, broadly reflecting the timing of their introduction as tools aiding geophysical studies. Biographical information is included for many of its practitioners, and the book should be of interest to both geophysicists and to anyone interested in the history of Earth science.
