Jubilee For Renegades

Matthew Campbell

Jubilee For Renegades:

Utopianism and Marxism Vincent Geoghegan, 2008 The grounding assumption of this book is that an element of utopianism is a necessity in any political thinking and that a self conscious utopianism can generate a richer level of theory and practice The text then follows the chequered career of utopianism in the Marxist tradition **Walter Benjamin:**

Appropriations Peter Osborne, 2005 No other single author has so commanding a critical presence across so many disciplines within the arts and humanities in so many national contexts as Walter Benjamin 1892 1940 The belated reception of his work as a literary critic dating from the late 1950s has been followed by a rapid series of critical receptions in different contexts Frankfurt Critical Theory and Marxism Judaism Film Theory Post structuralism Philosophical Romanticism and Cultural Studies This collection brings together a selection of the most critically important items in the literature across the full range of Benjamin's cultural theoretical interests from all periods of the reception of his writings but focusing upon the most recent to produce a comprehensive overview of the best critical literature Marxism and Totality Martin Jay, 1984

Totality has been an abiding concern from the first generation of Western Marxists most notably Lukács Korsch Gramsci and Bloch through the second exemplified by the Frankfurt School Lefebvre Goldmann Sartre Merleau Ponty and Della Volpe up to the most recent typified by Althusser Colletti and Habermas Yet no consensus has been reached concerning the term's multiple meanings expressive decentered longitudinal latitudinal normative or its implications for other theoretical and practical matters By closely following the adventures of this troublesome but central concept Marxism Totality offers an unconventional account of the history of Western Marxism *Jubilee for Renegades* Hugh Maxton, 1982 Maxton develops the central themes of his first book *The Noise of the Fields* the evocation of landscape and the concern with history now combine in a more urgent political manner which re defines and extends individual love **The Furies** Arno J.

Mayer, 2013-05-16 The great romance and fear of bloody revolution strange blend of idealism and terror have been superseded by blind faith in the bloodless expansion of human rights and global capitalism Flying in the face of history violence is dismissed as rare immoral and counterproductive Arguing against this pervasive wishful thinking the distinguished historian Arno J Mayer revisits the two most tumultuous and influential revolutions of modern times the French Revolution of 1789 and the Russian Revolution of 1917 Although these two upheavals arose in different environments they followed similar courses The thought and language of Enlightenment France were the glories of western civilization those of tsarist Russia's intelligentsia were on its margins Both revolutions began as revolts vowed to fight unreason injustice and inequality both swept away old regimes and defied established religions in societies that were 85% peasant and illiterate both entailed the terrifying return of repressed vengeance Contrary to prevalent belief Mayer argues ideologies and personalities did not control events Rather the tide of violence overwhelmed the political actors who assumed power and were rudderless Even the best plans could not stem the chaos that at once benefited and swallowed them Mayer argues that

we have ignored an essential part of all revolutions the resistances to revolution both domestic and foreign which help fuel the spiral of terror In his sweeping yet close comparison of the world's two transnational revolutions Mayer follows their unfolding from the French Declaration of the Rights of Man and the Bolshevik Declaration of the Rights of the Toiling and Exploited Masses the escalation of the initial violence into the reign of terror of 1793-95 and of 1918-21 the dismemberment of the hegemonic churches and religion of both societies the externalization of the terror through the Napoleonic wars and its internalization in Soviet Russia in the form of Stalin's Terror in One Country Making critical use of theory old and new Mayer breaks through unexamined assumptions and prevailing debates about the attributes of these particular revolutions to raise broader and more disturbing questions about the nature of revolutionary violence attending new foundations

Stalinism and the Dialectics of Saturn Douglas Greene, 2023-03-20 This study examines the complicated legacy of Stalinism in the twentieth century The descent of the Russian Revolution into Stalinism has given rise to an oft accepted truism that revolutions are like Saturn and will devour their own children For anticommunists Stalinism is condemned as a bolt from blue whether an insidious contagion Big Brother or totalitarian reason that socialism cannot escape from On the other end Communists and their fellow travelers have seen Stalinism as a force of historical necessity and the only way for the working class to reach a communist society Both these twin camps accept a Dialectic of Saturn where Stalinism whether for evil or good is the preordained fate of all socialist revolutions However there is another position that views Stalinism as the product of material circumstance and class struggle This position was represented by Leon Trotsky in his seminal work *The Revolution Betrayed* In contrast to those who accept a mystical dialectic of Saturn Trotsky argued that Stalinism can be rationally explained and was not inevitable outcome of socialism

Becoming Utopian Tom Moylan, 2020-11-26 A dream of a better world is a powerful human force that inspires activists artists and citizens alike In this book Tom Moylan one of the pioneering scholars of contemporary utopian studies explores the utopian process in its individual and collective trajectory from dream to realization Drawing on theorists such as Fredric Jameson Donna Haraway and Alain Badiou and science fiction writers such as Kim Stanley Robinson and China Miéville *Becoming Utopian* develops its argument for sociopolitical action through studies that range from liberation theology ecological activism and radical pedagogy to the radical movements of 1968 Throughout Moylan speaks to the urgent need to confront and transform the global environmental economic political and cultural crises of our time

The Stillborn God Mark Lilla, 2008-09-23 A brilliant account of religion's role in the political thinking of the West from the Enlightenment to the close of World War II The wish to bring political life under God's authority is nothing new and it's clear that today religious passions are again driving world politics confounding expectations of a secular future In this major book Mark Lilla reveals the sources of this age old quest and its surprising role in shaping Western thought Making us look deeper into our beliefs about religion politics and the fate of civilizations Lilla reminds us of the modern West's unique trajectory and how to remain on it Illuminating and challenging *The Stillborn God* is a watershed

in the history of ideas The Resilience of Hope Janette McDonald, Andrea M. Stephenson, 2010 Hope What is it How do we get it Is it part of being human Is it something that carries us through hard times Is it something illusory This book which stems from the 4th Inter Disciplinary net conference on Hope Probing the Boundaries held in September 2008 at Mansfield College in Oxford England explores all of these questions and many more As a truly inter disciplinary venture this book approaches the theme of hope from the point of view of the philosophical theological political literary psychological and sociological and presents hope not just as an abstract theme to be pondered but as an aspect of human living and thinking that has a profound impact on our lives The conclusions reached in each chapter demonstrate the variety of ways in which hope is conceived as well as the tensions inherent in any discussion of the benefits of hope and the intricacies in dealing with hope on a theoretical and a practical level This book is perfect for anyone wondering where hope fits into our lives during these troubling times **Not Yet** Jamie Owen Daniel, Tom Moylan, 1997 Ernst Bloch 1885 1977 is now recognized as a philosopher and cultural critic of the greatest importance his subtle and profound developments of utopian Marxism as influential for the student New Left of the 1960s and 1970s as they were for the leftist movements of the twenties Today in the United States and Britain his enormous body of work is attracting a new generation of readers more translations are appearing and his utopian thought is finding a new resonance in many different contexts Several of the authors here address the centrality of a radically unconventional concept of utopia to Bloch's thought others write on the question of memory and pedagogical theory There is a Blochian reading of crime fiction illuminating overviews of Bloch's work and an exploration of the stylistics of hope in Bloch's *Spuren* as well as a translation of excerpts from that extraordinary book The essays gathered are intended above all to recommend Bloch's work as a challenge to older models of historical materialism and utopian emancipation and give specific examples of how that work can contribute to current debates about utopia nationalism and collective memory the liberatory content of popular cultural forms and the complex relationship between ideology and everyday life Together they provide a timely introduction to one of the most inspiring thinkers of the twentieth century Contributors include Klaus Berghahn Tim Dayton Vincent Geoghagan Henry Giroux David Kaufmann Mary Layoun Ruth Levitas Peter McLaren Tom Moylan Darko Suvin and Jack Zipes **Critical Theory: A Very Short Introduction** Stephen Eric Bronner, 2017-09-22 Critical theory emerged in the 1920s from the work of the Frankfurt School the circle of German Jewish academics who sought to diagnose and if at all possible cure the ills of society particularly fascism and capitalism In this book Stephen Eric Bronner provides sketches of leading representatives of the critical tradition such as George Lukács and Ernst Bloch Theodor Adorno and Walter Benjamin Herbert Marcuse and Jürgen Habermas as well as many of its seminal texts and empirical investigations This Very Short Introduction sheds light on the cluster of concepts and themes that set critical theory apart from its more traditional philosophical competitors Bronner explains and discusses concepts such as method and agency alienation and reification the culture industry and repressive tolerance non identity and utopia He argues

for the introduction of new categories and perspectives for illuminating the obstacles to progressive change and focusing upon hidden transformative possibilities In this newly updated second edition Bronner targets new academic interests broadens his argument and adapts it to a global society amid the resurgence of right wing politics and neo fascist movements

Fortnight ,1983 *Dictatorship, State Planning, and Social Theory in the German Democratic Republic* Peter C.

Caldwell,2003-03-27 The introduction of state planning and party dictatorship dramatically altered the environment for social theory in the German Democratic Republic But social thought did not disappear By the mid 1950s East German social theorists discovered the basic contradictions of state socialism that would eventually lead to its collapse the inability of the plan to function without markets and its inability to permit markets the inability of the party state to guarantee the rule of law and yet also the need for a regular system of rules in a modern industrial society and the contradictory philosophical claims of a Marxist Leninist philosophy that rejected idealism and Marxist Leninist dogma with its idealistic claim to know the laws of social modernization Making use of archival sources Caldwell examines the articulation of these analyses their subsequent suppression by party authorities in the late 1950s and their return under the guise of cybernetics in the 1960s

Shepherd,2013-07-29 How can one believe in an age of doubt How can we name the mystery of God in human words Does nature speak of the glory of God Does science undermine faith Is the problem of evil unanswerable In this volume scientists theologians philosophers as well as a historian and social scientist take seriously the challenge of knowing and speaking about God in an age of doubt and challenge All New Zealand writers the authors reflect a variety of styles inputs and assumptions from down under Some look to answer new atheists directly others point out links between belief and unbelief in any age There are essays that show us new ways of reading old texts Scientists reflect on nature its signs and its obscurity We are confronted also with the mixed picture of belief and unbelief that the last few hundred years reveals to us Most of these essays have come out of seminars and conferences put on by TANSA Theology and the Natural Sciences in Aotearoa a forum for discussion and interpretation amongst scientists and theologians in New Zealand *Ernst Bloch* Vincent

Geoghegan,2008-02-20 Ernst Bloch is perhaps best known for his subtle and imaginative investigation of utopias and utopianism but his work also provides a comprehensive and insightful analysis of western culture politics and society Yet because he has not been one of easiest of writers to read his full contribution has not been widely acknowledged Block developed a complex conceptual framework and presented this in a prose style which many have found to verge on the impenetrable In this critical and accessible introduction to one of the most fascinating thinkers of the twentieth century

Vincent Geoghegan unravels much of the mystery of the man and his ideas **The Cambridge Companion to Contemporary Irish Poetry** Matthew Campbell, 2003-08-28 In the last fifty years Irish poets have produced some of the most exciting poetry in contemporary literature writing about love and sexuality violence and history country and city This book first published in 2003 provides an introduction to major figures such as Seamus Heaney and also introduces the reader to significant precursors like Louis MacNeice or Patrick Kavanagh and vital contemporaries and successors among others Thomas Kinsella Nuala Ní Dhomhnaill and Paul Muldoon Readers will find discussions of Irish poetry from the traditional to the modernist written in Irish as well as English from both North and South This Companion provides cultural and historical background to contemporary Irish poetry in the contexts of modern Ireland but also in the broad currents of modern world literature It includes a chronology and guide to further reading and will prove invaluable to students and teachers alike
