## **Judgement Of Jupiter:**

Judgement of Jupiter Richard A. Tilms,1980      **A learned astronomical discourse of the judgement of Nativities ... Translated from the Latin by F. Kelway** Auger FERRIER,1642      *Fake Physics: Spoofs, Hoaxes and Fictitious Science* Andrew May,2019-04-12 People are used to seeing fake physics in science fiction concepts like faster than light travel antigravity and time travel to name a few The fiction label ought to be a giveaway but some SF writers especially those with a background in professional science are so adept at technobabble that it can be difficult to work out what is fake and what is real To confuse matters further Isaac Asimov s 1948 piece about the fictitious time travelling substance thiotimoline was written not as a short story but in the form of a spoof research paper The boundaries between fact and fiction can also be blurred by physicists themselves sometimes unintentionally sometimes with tongue in cheek sometimes to satirize perceived weaknesses in research practices Examples range from hoaxes aimed at exposing poor editorial standards in academic publications through thought experiments that sound like the plot of a sci fi movie to April Fools jokes Even the latter may carry a serious message whether about the sociology of science or poking fun at legitimate but far out scientific hypotheses This entertaining book is a joyous romp exploring the whole spectrum of fake physics from science to fiction and back again

*The Black Death*, 2013-01-01 This series provides texts central to medieval studies courses and focuses upon the diverse cultural, social and political conditions that affected the functioning of all levels of medieval society. Translations are accompanied by introductory and explanatory material and each volume includes a comprehensive guide to the sources, interpretation including discussion of critical linguistic problems and an assessment of recent research on the topics covered. From 1348 to 1350 Europe was devastated by an epidemic that left between a third and one half of the population dead. This source book traces through contemporary writings the calamitous impact of the Black Death in Europe with a particular emphasis on its spread across England from 1348 to 1349. Rosemary Horrox surveys contemporary attempts to explain the plague which was universally regarded as an expression of divine vengeance for the sins of humankind. Moralists all had their particular targets for criticism. However, this emphasis on divine chastisement did not preclude attempts to explain the plague in medical or scientific terms. Also, there was a widespread belief that human agencies had been involved and such scapegoats as foreigners, the poor and Jews were all accused of poisoning wells. The final section of the book charts the social and psychological impact of the plague and its effect on the late medieval economy.
