## **Judicial Decision Making Sentencing Policy And Numerical Guidance:**

**Judicial Decision Making, Sentencing Policy, and Numerical Guidance** Austin Lovegrove, 2012-12-06 This book describes an original empirical study of judicial decision making The process of determining sentences is a difficult one for judges and often unnecessarily intuitive subjective and complex The present study introduces a conceptual outline and empirical technique for increasing the precision of sentencing policy thus offering an aid to judges who sentence in the light of this policy The primary purpose of this model of judicial decision making is to provide a framework for scaling the seriousness of any single case in relation to the facts of that case and for relating this assessment to the appropriate quantum of sentence The validity of the model is tested and cross validated in an archival study This innovative research serves as an important prototype for a system of numerical guidance to judges and sentencers

**Criminal Sentencing in Bangladesh** Muhammad Mahbubur Rahman, 2017-03-20 In Criminal Sentencing in Bangladesh Muhammad Mahbubur Rahman critically examines the sentencing policies of Bangladesh and demonstrates that the country's sentencing policies are not only yet to be developed in a coherent manner and shaped with an appropriate and contextual balance but also remain part of the problem rather than part of the solution The author forcefully argues that the conception of sentencing policies cannot and should not always be confined exclusively to institutional understandings The typical realities of post colonial societies call for rethinking the traditional judiciary centred understanding of what is meant by criminal sentences This book thus raises the question for theoretical sentencing scholarship whether the prevailing judiciary centred understanding of sentencing should be rethought

**Exploring Criminal Justice: The Essentials** Robert M. Regoli, John D. Hewitt, 2009-01-23 Exploring Criminal Justice The Essentials provides an extensive overview of the American criminal justice system in a concise and accessible format This engaging text examines the people and processes that make up the system and how they interact It also covers the historic context and modern features of the criminal justice system and encourages students to think about how current events in crime affect their everyday lives Important Notice The digital edition of this book is missing some of the images or content found in the physical edition

**Sentencing in International Criminal Law** Silvia D'Ascoli, 2011-04-01 This book deals with sentencing in international criminal law focusing on the approach of the UN ad hoc Tribunals for the former Yugoslavia ICTY and Rwanda ICTR In contrast to sentencing in domestic jurisdictions and in spite of its growing importance sentencing law is a part of international criminal law that is still under construction and is unregulated in many aspects International sentencing law and practice is not yet defined by exact norms and principles and as yet there is no body of international principles concerning the determination of sentence notwithstanding the huge volume of sentencing research and the extensive modern debate about sentencing principles Moreover international judges receive very little guidance in sentencing matters this

contributes to inconsistencies and may increase the risk that similar cases will be sentenced in different ways One purpose of this book is to investigate and evaluate the process of international sentencing especially as interpreted by the ICTY and the ICTR and to suggest a more comprehensive and coherent system of guiding principles which will foster the development of a law of sentencing for international criminal justice The book discusses the law and jurisprudence of the ad hoc Tribunals and also presents an empirical analysis of influential factors and other data from ICTY and ICTR sentencing practice thus offering quantitative support for the doctrinal analysis This publication is one of the first to be entirely devoted to the process of sentencing in international criminal justice The book will thus be of great interest to practitioners academics and students of the subject

Karl Branting, 2013-04-17 The judiciary is in the early stages of a transformation in which AI Artificial Intelligence technology will help to make the judicial process faster cheaper and more predictable without compromising the integrity of judges discretionary reasoning Judicial decision making is an area of daunting complexity where highly sophisticated legal expertise merges with cognitive and emotional competence How can AI contribute to a process that encompasses such a wide range of knowledge judgment and experience Rather than aiming at the impossible dream or nightmare of building an automatic judge AI research has had two more practical goals producing tools to support judicial activities including programs for intelligent document assembly case retrieval and support for discretionary decision making and developing new analytical tools for understanding and modeling the judicial process such as case based reasoning and formal models of dialectics argumentation and negotiation Judges squeezed between tightening budgets and increasing demands for justice are desperately trying to maintain the quality of their decision making process while coping with time and resource limitations Flexible AI tools for decision support may promote uniformity and efficiency in judicial practice while supporting rational judicial discretion Similarly AI may promote flexibility efficiency and accuracy in other judicial tasks such as drafting various judicial documents The contributions in this volume exemplify some of the directions that the AI transformation of the judiciary will take
