Lethal Fixation History And Politics:

A Lethal Fixation Stella Shepherd,1993 Lethal Politics R. J. Rummel,2017-07-05 While there are estimates of the number of people killed by Soviet authorities during particular episodes or campaigns until now no one has tried to calculate the complete human toll of Soviet genocides and mass murders since the revolution of 1917 Here R J Rummel lists and analyzes hundreds of published estimates presenting them in the historical context in which they occurred His shocking conclusion is that conservatively calculated 61 911 000 people were systematically killed by the Communist regime from 1917 to 1987 Rummel divides the published estimates on which he bases his conclusions into eight historical periods such as the Civil War collectivization and World War II The estimates are further divided into agents of death such as terrorism deportations and famine Using statistical principles developed from more than 25 years of quantitative research on nations he analyzes the estimates In the collectivization period for example about 11 440 000 people were murdered During World War II while the Soviet Union had lost almost 20 000 000 in the war the Party was killing even more of its citizens and foreigners probably an additional 13 053 000 For each period he defines counts and totals the sources of death He shows that Soviet forced labor camps were the major engine of death probably killing 39 464 000 prisoners overall To give meaning and depth to these figures Rummel compares them to the death toll from major wars world disasters global genocide deaths from cancer and other diseases and the like In these and other ways Rummel goes well beyond the bare bones of statistical analysis and tries to provide understanding of this incredible toll of human lives Why were these people killed What was the political and social context How can we understand it These and other questions are addressed in a compelling historical narrative This definitive book will be of interest to Soviet experts those into **History of Research on Nitrogen Fixation in Soybeans (1887-2018)** William Shurtleff; Akiko Aoyagi,2018-11-26 This is the world s most comprehensive well documented and well illustrated book on this subject With extensive subject and geographical index 91 photographs and illustrations mostly color Free of charge Music, Masculinity and the Claims of History Dr Ian Biddle,2013-01-28 What does it mean to think of Western Art music and the Austro German contribution to that repertory as a tradition How are men and masculinities implicated in the shaping of that tradition And how is the writing of the history or histories of that tradition shaped by men and masculinities This book seeks to answer these and other questions by drawing both on a wide range of German language writings on music sound and listening from the so called long nineteenth century circa 1800 1918 and a range of critical theoretical texts from the post war continental philosophical and psychoanalytic traditions including Lacan i ek Serres Derrida and Kittler The book is focussed in particular on bringing the object of historical writing itself into scrutiny by engaging in what i ek has called a historicity or a way of writing about the past that not merely acknowledges the ahistorical kernel of historical writing but brings that kernel into the light of day takes account of it and puts it into play The book is thus committed to a kind of historical writing that is open ended though not ideologically na ve and that does not fix

or stabilize the nature of the relationship between so called primary and secondary texts The book consists of an introduction which places the study of classical music and the Austro German tradition within broader debates about the value of that tradition and four extensive case studies an analysis of the cultural historical category of listening around 1800 a close reading of A B Marx s Beethoven monograph of 1859 a consideration of Heinrich Schenker s attitudes to the mob and the vernacular more broadly and an examination through Franz Kafka of the figure of Mahler s body Hope and History Vincent Harding,2009 From the sit ins and freedom marches of the sixties to the election of Barack Obama the story and lessons of a great journey of hope and transformation **Mechanisms of Life History Evolution** Thomas Flatt,Andreas Heyland,2011-05-12 This interdisciplinary volume unites evolutionary and molecular biologists from various fields life history theory molecular biology developmental biology aging phenotypic plasticity social behaviour and endocrinology who use studies of molecular mechanisms to solve fundamental questions in life history evolution in a variety of organisms

Pen of Iron Robert Alter, 2010-02-08 How the King James Bible has influenced the style of the American novel from Melville to Cormac McCarthy The simple yet grand language of the King James Bible has pervaded American culture from the beginning and its powerful eloquence continues to be felt even today In this book acclaimed biblical translator and literary critic Robert Alter traces some of the fascinating ways that American novelists from Melville Hemingway and Faulkner to Bellow Marilynne Robinson and Cormac McCarthy have drawn on the rich stylistic resources of the canonical English Bible to fashion their own strongly resonant styles and distinctive visions of reality Showing the radically different manners in which the words idioms syntax and cadences of this Bible are woven into *Moby Dick* *Absalom Absalom* *The Sun Also Rises* *Seize the Day* *Gilead* and *The Road* Alter reveals the wide variety of stylistic and imaginative possibilities that American novelists have found in Scripture At the same time Alter demonstrates the importance of looking closely at the style of literary works making the case that style is not merely an aesthetic phenomenon but is the very medium through which writers conceive their worlds *Geographic Variation in Forest Trees* Maria Morgenstern, 2011-11-01 Geographic variation

within tree species is one of the basic issues facing foresters biologists and others who work with trees Genetic differences among and within populations of these trees become important considerations when forests are regenerated artificially by seeding and planting and when new species are introduced in forestry agroforestry or for ornamental and landscape purposes Geographic Variation in Forest Trees is the first book to examine this subject from a world wide perspective Following a historical review the author discusses population genetic theory and genetic systems of native North American tree species as they interact with environments in the major climatic regions in the world He then demonstrates how this knowledge is used to guide seed zoning and seed transfer in silviculture basing much of his discussion on models developed in Scandinavia and North America In the final chapter the author addresses the issue of genetic conservation a subject of great concern in the face of accelerated forest destruction industrial pollution and climatic change This comprehensive well researched book makes a significant contribution to the knowledge of one of our most important renewable natural resources

Challenging Euro-America's Politics of Identity Jorge Luis Andrade Fernandes,2008-01-07 In this fascinating book Jorge Luis Andrade Fernandes critically examines the impact of colonialism and postcolonial migration on the politics and identity of Euro American imperial powers It considers how outsiders are part of the construction of the native identity of the nation state and also how they challenge its essential coherence when they return to the centre in our increasingly globalized world Engaging in a theoretically motivated discussion of a range of sources film fiction political theory and state policy the volume traces the nomadic movement of bodies across national frontiers helping us to question any natural link between nation states and identities and between places and peoples This is not merely a theoretical problem as Fernandes relates it to the very current crisis of nativistic multicultural identity in the West He examines how politics takes shape in transnational social and cultural encounters and how this new politics is not just about containing aliens but also contains fruitful possibilities for different modes of being Challenging Euro America s Politics of Identity will be of interest to advanced students and scholars in politics geography postcolonial studies cultural studies African and African American studies comparative literature American studies and Ethnic studies

Voyage to Alpha Centauri Michael D. O'Brien,2013-11-25 Set eighty years in the future this novel by the best selling author Michael O'Brien is about an expedition sent from the planet Earth to Alpha Centauri the star closest to our solar system The Kosmos a great ship that the central character Neil de Hoyos describes as a flying city is immense in size and

capable of more than half light speed Hoyos is a Nobel Prize winning physicist who has played a major role in designing the ship Hoyos has signed on as a passenger because he desires to escape the seemingly benign totalitarian government that controls everything on his home planet He is a skeptical and quirky misanthropic humanist with old tragedies loves and hatreds that are secreted in his memory The surprises that await him on the voyage and its destination will shatter all of his assumptions and point him to a true new horizon Science fiction and fantasy literature are genres that have become dominant forces in contemporary worldwide culture Our fascination with the near angelic powers of new technology its benefits and dangers its potential for obsession and catastrophe raises vital questions that this work explores about human nature and the cosmos about man's image of himself and where he is going and why he seeks to go there World Politics Jeffrey Haynes, Peter Hough, Shahin Malik, Lloyd Pettiford, 2013-09-13 From the war on terror to the global financial crisis traditional concepts of world politics are being challenged on a daily basis In these uncertain times the study of international relations and the forces that shape them have never been more important Written specifically for students who are approaching this subject for the first time World Politics is the most accessible coherent and up to date account of the field available It covers the historical backdrop to today's political situations the complex interactions of states and non state actors the role of political economy human security in all its forms and the ways in which culture religion and identity influence events World Politics takes a new approach that challenges traditional interpretations and will equip students with the knowledge and the confidence needed to tackle the big issues Immunology for the Health Sciences, 1995 Text for students on health sciences emphasising clinical aspects of immunology Provides a concise overview of the human immune response and non specific defence mechanisms with sections on serology vaccination allergy and autoimmune diseases Also presents a short history of immunology a glossary revision questions case studies and diagnostic tests Includes an index The author is a senior lecturer in pathology at RMIT His other publications include Pathology for the Health Sciences

Natural History of the Major Histocompatibility Complex Jan Klein, 1986 This work is a natural history of the major histocompatibility complex written for anyone who is working on the MHC but wants to step back and review the complex in its entirety for anyone who wants to be introduced to the MHC or for anyone who is just curious about this much talked about chromosomal region By natural history is meant an all encompassing treatment of the MHC both human and mouse in its entire range and its details but presented in a way that anybody can understand without consulting a variety of other sources Most of the details are summarized in the form of tables whereas the text concentrates on generalizations and discussions Thus the book will be of interest to immunologists and geneticists seeking an overview of the subject and to graduate students in these disciplines It will also be of value to technicians working in HLA typing laboratories
