start here This is not how this was supposed to go In the portrait I had long ago painted of my family I didn t intend to  
include words like widowed single mom I had envisioned many more decades with my husband Robb in the complicated  
beautiful life of marriage But in the course of twelve hours our family of four became a trio and since that day my boys and I  
have been creating a new life in an upside down world I have written this new book which in a lot of ways is a sequel to And  
Life Comes Back to answer the question so many have asked And then what happened after the crisis became reality and  
your life began again I ve leaned into honest storytelling to offer a look into the chaos and beauty of who we have become I ll  
be honest this book was harder to write because I m living it right now I hardly feel like an expert who has figured it out I  
hope my straight up honest stories will give you encouragement to take the next step And the next And the next Sometimes  
you just have to pretend you know what you re doing pretend you re brave enough and pretend you can do this Sometimes  
you just have to pretend you re normal until the new normal finds you See you in the pages Tricia      *Child Perspectives and*  
*Children's Perspectives in Theory and Practice* Dion Sommer,Ingrid Pramling Samuelsson,Karsten Hundeide,2009-12-24  
Recent decades have seen a growing emphasis in a number of professional contexts on acknowledging and acting on the  
views of children This trend was given added weight by the UN Convention on the Rights of the Child ratified in 1990 Today  
seeking the perspective of the child has become an essential process in all sorts of tasks from framing new legislation to  
regulating professions This book answers the fundamental question of what it is that constitutes a child perspective and how  
this might differ from the perspectives of children themselves The answers to such questions have important implications for  
building progressive and developmental adult child relationships However theoretical and empirical treatments of child  
perspectives and children s perspectives are very diverse and idiosyncratic and the standard reference work has yet to be  
written Thus this work is an attempt to fill the gap in the literature by searching for and defining key formulations of  
potential child perspectives within parts of the so called new child paradigm This has been derived from childhood sociology  
contextual relational developmental psychology interpretative humanistic psychology and developmental pedagogy The  
highly experienced authors develop a comprehensive professional child perspective paradigm that integrates recent theory  
and empirical child research With its clear presentation of underlying theories and suggested applications this book  
illustrates a child oriented understanding of specific relevance to both child care and preschool educational practice      Let's
