Galileo Goes to Jail and Other Myths about Science and Religion Ronald L. Numbers, 2010-11-08 Ronald Numbers has recruited the leading scholars in this new history of science to puncture the myths from Galileo s incarceration to Darwin s deathbed conversion to Einstein s belief in a personal God who didn t play dice with the universe Each chapter in Galileo Goes to Jail shows how much we have to gain by seeing beyond the myths

Religion, Politics and Dissent, 1660-1832 Robert D. Cornwall, 2016-04-15 The idea of the long eighteenth century 1660 1832 as a period in which religious and political dissent were regarded as antecedents of the Enlightenment has recently been advanced by several scholars The purpose of this collection is further to explore these connections between religious and political dissent in Enlightenment Britain Addressing the many and rich connections between political and religious dissent in the long eighteenth century the volume also acknowledges the work of Professor James E Bradley in stimulating interest in these issues among scholars Contributors engage directly with ideas of secularism radicalism religious and political dissent and their connections with the Enlightenment or Enlightenments together with other important themes including the connections between religious toleration and the rise of the enlightenments Contributors also address issues of modernity and the ways in which a modern society can draw its inspiration from both religion and secularity as well as engaging with the seventeenth century idea of the synthesis of religion and politics and its evolution into a system in which religion and politics were interdependent but separate Offering a broadly conceived interpretation of current research from a more comprehensive perspective than is often the case the historiographical

implications of this collection are significant for the development of ideas of the nature of the Enlightenment and for the nature of religion society and politics in the eighteenth century By bringing together historians of politics religion ideas and society to engage with the central theme of the volume the collection provides a forum for leading scholars to engage with a significant theme in British history in the long eighteenth century Facets of Faith and Science: Historiography and modes of interaction Jitze M. van der Meer,1996

Newton and Newtonianism J.E. Force,S. Hutton,2006-04-18 Newton s theology his study of alchemy the early reception of Newtonianism the history of Newtonian scholarship are topics included in the eleven essays that comprise this volume T&T Clark Handbook of Neo-Calvinism Nathaniel Gray Sutanto,Cory Brock,2024-01-25 Neo Calvinism critically advances Reformed orthodoxy for the sake of modern life Birthed in the Netherlands at the turn to the twentieth century initiated by Abraham Kuyper 1837 1920 and Herman Bavinck 1854 1921 it argued that a life before God entailed the leavening of faith over all human existence While the movement originated in the Netherlands the tradition now has a global reach with practitioners and thinkers applying its insights in diverse ways and in their own contexts This handbook is a genealogical introduction to this lively and modern branch of the Reformed tradition with contributors that reflect its global reach Its four sections chart the theological roots important original figures historical contours and the contemporary influence of neo Calvinism across a diversity of fields

Nominalism and Constructivism in Seventeenth-Century Mathematical Philosophy David Sepkoski,2013-05-24 What was the basis for the adoption of mathematics as the primary mode of discourse for describing natural events by a large segment of the philosophical community in the seventeenth century In answering this question this book demonstrates that a significant group of philosophers shared the belief that there is no necessary correspondence between external reality and objects of human understanding which they held to include the objects of mathematical and linguistic discourse The result is a scholarly reliable but accessible account of the role of mathematics in the works of amongst others Galileo Kepler Descartes Newton Leibniz and Berkeley This impressive volume will benefit scholars interested in the history of philosophy mathematical philosophy and the history of mathematics

Observing God William J. Astore, 2017-07-05 Scottish theologian educator astronomer and popularizer of science

Thomas Dick 1774-1857 promoted a Christianized form of science to inhibit secularization to win converts to Christianity and to persuade evangelicals that science was sacred His devotional theology of nature made radical claims for cultural authority This book presents the first detailed analysis of his life and works After an extended biographical introduction Dick's theology of nature is examined within the context of natural theology and also his views on the plurality of worlds the nebular hypothesis and geology Other chapters deal with Dick's use of aesthetics to shape social behaviour for millennial purposes and with the publishing history of his works their availability and their reception In the final part the author explores Dick's influence in America His pacifism won him Northern evangelical supporters while his writings dominated the burgeoning field of popular science powerfully shaping science's cultural meaning and its uses *God on the Brain* Brad

Sickler, 2020-07-07 The human brain is incredibly complex Both Christian and secular scholars alike affirm this fact yet the traditional view of humanity as spiritual beings made in the image of God has come under increased pressure from humanistic and materialistic thinkers who deny that humans are anything more than their physical bodies Christians have long affirmed that humans are spiritual beings made by God to know and fellowship with him while the humanist position views humans as merely evolved animals Bradley Sickler provides a timely theological scientific and philosophical assessment of the human brain highlighting the many ways in which the gospel informs the Christian understanding of cognitive science Here is a book that provides a much needed summary of the Bible's teaching as it sheds light on the brain with careful interaction with the claims of modern science arguing that the Christian worldview offers the most compelling vision of the true nature of humanity **An Elusive Victorian** Martin Fichman, 2010-11-15

Codiscoverer of the theory of evolution by natural selection Alfred Russel Wallace should be recognized as one of the titans of Victorian science Instead he has long been relegated to a secondary place behind Darwin Worse many scholars have overlooked or even mocked his significant contributions to other aspects of Victorian culture With *An Elusive Victorian* Martin Fichman provides the first comprehensive analytical study of Wallace's life and controversial intellectual career Fichman examines not only Wallace's scientific work as an evolutionary theorist and field naturalist but also his philosophical concerns his involvement with theism and his commitment to land nationalization and other sociopolitical reforms such as women's rights As Fichman shows Wallace worked throughout his life to integrate these humanistic and scientific interests His goal the development of an evolutionary cosmology a unified vision of humanity's place in nature and society that he hoped would ensure the dignity of all individuals To reveal the many aspects of this compelling figure Fichman not only reexamines Wallace's published works but also probes the contents of his lesser known writings unpublished correspondence and copious annotations in books from his personal library Rather than consider Wallace's science as distinct from his sociopolitical commitments *An Elusive*

Victorian assumes a mutually beneficial relationship between the two one which shaped Wallace into one of the most memorable characters of his time Fully situating Wallace s wide ranging work in its historical and cultural context Fichman s innovative and insightful account will interest historians of science religion and Victorian culture as well as biologists

Scholarship and Christian Faith Douglas Gordon Jacobsen,Rhonda Hustedt Jacobsen,2004 Argues that the idea of Christian scholarship has been under discussed This book which is organised as a conversation offers a definition and analysis of Christian scholarship that opens the way for dialogue between evangelicals and Catholics and Protestants from a variety of church traditions
