Foreign Direct Investment Dale R. Weigel, 1997-01-01 The report reviews lessons from the International Finance Corporation s IFC investment and advisory experience in the developing world which show the interactions between policy frameworks and the volume and structure of foreign direct investments FDI Case studies show how the Corporation promotes successful project structures and regulatory changes as it tries to attain the strongest development impact for investments In developing countries FDI has flowed mainly into manufacturing and processing industries In the past investment attractiveness had been closely linked to possession of natural resources or a large domestic market while production and trade globalization competitiveness as a location for investment and exporting have become the main determinants of attractiveness Sources of FDI in the past came almost exclusively from industrial countries though recently those sources have widened emerging from developing countries in their own right and for their own regions IFC as an international initiative to promote FDI in developing countries is liable to promote bilateral trade agreements bilateral and multilateral financial institutions and investment promotion programs its advisory role may vary from diagnostic studies overviewing constraints to FDI to investment policy studies giving specific solutions on either changes or strategies The study further looks at how policy environment is set and at finding investor opportunities through project financing largely structured as joint ventures The inherent fragile nature of joint ventures restricts foreign ownership thus limiting project structures however careful project design has lead to successful operations by ensuring management and financial arrangements Still to maximize benefits an unfinished agenda of policy reform remains and as more countries open to FDI this integration will lead to an overall increase in FDI flows

Privatisation and Development Claude V. Chang, 2017-11-28 The book interrogates privatisation in terms of its effectiveness vis vis its stated goals and more fundamentally in terms of its success in delivering economic development It investigates why privatisation was successful in the UK and other OECD countries and why it has not met with equal success in developing countries In this regard it further examines the policy prescriptions of the IMF and World Bank in relation to the conceptualised benefits and theoretical assumptions underlying these supposed benefits The author assesses the extent to which culture and customs indeed the mode of production stand in determinate relationship to the goals techniques and outcome of the process Furthermore Chang examines the degree to which socioeconomic and moral consequences of privatisation have been ignored in pursuit of the ideological imperative implicit in the Washington Consensus Hence the book contributes to the reflective thought that must necessarily be part of theory validation and provides the basis for a balanced and empirically valid theory of privatisation

The Effectiveness of Promotion Agencies at Attracting Foreign Direct Investment Jacques Morisset, Kelly Andrews-Johnson, 2004 Investment promotion agencies IPAs exist in almost all countries around the world but there has been no global attempt to determine whether they have been able to significantly influence the investor s decision to locate in one country rather than another The Effectiveness of Promotion Agencies at Attracting Foreign Direct Investment is the first empirical study of the effectiveness of these agencies in

attracting foreign direct investment FDI This study finds that promotion is unambiguously associated with greater FDI flows The effectiveness of promotion however depends on the quality of the investment climate market size the level of development of the country the IPA s budget and type of activities it carries out communication with the highest level of policymakers and support from the private sector An important resource The Effectiveness of Promotion Agencies at Attracting Foreign Direct Investment provides many lessons about how to carry out effective investment promotion **The Environmental Implications of Privatization** Magda Lovei,Bradford S. Hostile Business and the Sovereign State Michael J. Strauss,2018-12-14 This book describes and assesses an emerging threat to states territorial control and sovereignty the hostile control of companies that carry out privatized aspects of sovereign authority The threat arises from the massive worldwide shift of state activities to the private sector since the late 1970s in conjunction with two other modern trends the globalization of business and the liberalization of international capital flows The work introduces three new concepts firstly the rise of companies that handle privatized activities and the associated advent of post government companies that make such activities their core business Control of them may reside with individual investors other companies or investment funds or it may reside with other states through state owned enterprises or sovereign wealth funds Secondly imperfect privatizations when a state privatizes an activity to another state s public sector The book identifies cases where this is happening It also elaborates on how ownership and influence of companies that perform privatized functions may not be transparent and can pass to inherently hostile actors including criminal or terrorist organizations Thirdly belligerent companies whose conduct is hostile to those of states where they are active The book concludes by assessing the adequacy of existing legal and regulatory regimes and how relevant norms may evolve
