## **Fado Vozes E Sombras:**

**Fado**, 1994 Fado Museu da Imagem do Som de São Paulo, Joaquim Pais de Brito, Alexandra Naia Klein, Galpão do Museu de Arte Moderna do Rio de Janeiro, 1995 **Fado and the Place of Longing** Richard Elliott, 2017-07-05 Fado often described as urban folk music emerged from the streets of Lisbon in the mid nineteenth century and went on to become Portugal's national music during the twentieth. It is known for its strong emphasis on loss, memory and nostalgia within its song texts which often refer to absent people and places. One of the main lyrical themes of fado is the city itself. Fado music has played a significant role in the interlacing of mythology, history, memory and regionalism in Portugal in the second half of the twentieth century. Richard Elliott considers the ways in which fado songs bear witness to the city of Lisbon in relation to the construction and maintenance of the local. Elliott explores the ways in which fado acts as a cultural product reaffirming local identity via recourse to social memory and an imagined community while also providing a distinctive cultural export for the dissemination of a remembered Portugal on the global stage. Fado and the Urban Poor in Portuguese Cinema of the 1930s and 1940s Michael Colvin, 2016 A compelling account of the role of Fado and the fadista in Portuguese film and the wider culture. Colvin studies the evolution of Fado music as the soundtrack to the Portuguese talkie. He analyzes the most successful Portuguese films of the first two decades of the Estado Novo era showing how directors used the national song to promote the values of the young Regime regarding the poor inhabitants of Lisbon's popular neighborhoods. He considers the aesthetic, technological and social advances that accompany the progress of the Estado Novo: Futurism, the development of sound film, the inception of national radio broadcast, access to the automobile and urban renewal within a historical context that considers Portugal's global profile at the time of António de Oliveira Salazar's rise to power and the inauguration of António Ferro's Secretariado da Propaganda Nacional. Portugal's role as a secret ally of the Falange during the Spanish Civil War, Lisbon's role as a neutral refuge during World War II and the Portuguese colonial empire as an anachronism in the post World War II years. Colvin argues that Portuguese directors have exploited the growing popularity of the Fado and Lisbon's fadistas to dissuade citizens from alien values that promote individual ambitions and the notion of an easy life of poverty in the capital. As the public image of the Fado evolves, the fadista's role in film becomes more prominent and eventually the fadista is the protagonist and the Fado the principal concern of national film. The author exposes the irony that as the social profile of the Lisbon fadista improves with the international fame of singer Amália Rodrigues, Portuguese film perpetuates and validates the outdated characterization of the fadista as a social pariah that Leitão de Barros proposed in the first Portuguese talkie *A Severa* 1931. Michael Colvin is Associate Professor of Hispanic Studies at Marymount Manhattan College.
