Faith, Science and Understanding J. C. Polkinghorne, 2001-01-01 In this captivating book one of the most highly regarded scientist theologians of our time explores aspects of the interaction of science and theology John Polkinghorne defends the place of theology in the university it is part of the human search for truth and discusses the role of revelation in religion it is a record of experience and not the communication of unchallengeable propositions Throughout his thought provoking conversation Polkinghorne speaks with an honesty and openness that derives from his many years of experience in scientific research A central concern of Polkinghorne's collection of writings is to reconcile what science can say about the processes of the universe with theology s belief in a God active within creation The author examines two related concepts in depth The first is the divine self limitation involved in creation that leads to an important reappraisal of the traditional claim that God does not act as a cause among causes The other is the nature of time and God's involvement with it an issue that Polkinghorne shows can link metascience and theological understandings In the final section of the book the author reviews three centuries of the science and theology debate and assesses the work of major contemporary contributors to the discussion Wolfhart Pannenberg Thomas Torrance and Paul Davies He also considers why the science theology discussion has for several centuries been a particular preoccupation of the English Faith, Science and Understanding John Polkinghorne, 2008-10-01 divdivIn this captivating book one of the most highly regarded scientist theologians of our time explores aspects of the interaction of science and theology John Polkinghorne defends the place of theology in the university it is part of the human search for truth and discusses the role of revelation in religion it is a record of experience and not the communication of unchallengeable propositions Throughout his thought provoking conversation Polkinghorne speaks with an honesty and openness that derives from his many years of experience in scientific research A central concern of Polkinghorne s collection of writings is to reconcile what science can say about the processes of the universe with theology s belief in a God active within creation The author examines two related concepts in depth The first is the divine self limitation involved in creation that leads to an important reappraisal of the traditional claim that God does not act as a cause among causes The other is the nature of time and God's involvement with it an issue that Polkinghorne shows can link metascience and theological understandings In the final section of the book the author reviews three centuries of the science and theology debate and assesses the work of major contemporary contributors to the discussion Wolfhart Pannenberg Thomas Torrance and Paul Davies He also considers why the science theology discussion has for several centuries been a particular preoccupation of the English DIV DIV The Language of Science and Faith Karl W. Giberson And Francis S. Collins, 2011-03 Christians affirm that everything exists because of God from subatomic quarks to black holes Science often claims to explain nature without including God at all And thinking Christians often feel forced to choose between the two But the good news is that we don't have to make a choice Science does not overthrow the Bible Faith does not require rejecting

science World renowned scientist Francis Collins author of The Language of God along with fellow scientist Karl Giberson show how we can embrace both Their fascinating treatment explains how God cares for and interacts with his creation while science offers a reliable way to understand the world he made Together they clearly answer dozens of the most common questions people ask about Darwin evolution the age of the earth the Bible the existence of God and our finely tuned universe They also consider how their views stack up against the new atheists as well as against creationists and adherents of intelligent design The authors disentangle the false conclusions of Christians and atheists alike about science and evolution from the actual results of research in astronomy physics geology and genetics In its place they find a story of the grandeur and beauty of a world made by a supremely creative God Faith, Science and the Future Charles P. Henderson, 2007-06-01 Understanding and Communicating Science LeeAnn Kahlor, Patricia Stout, 2009-11-13 Science communication has become increasingly popular in journalism and mass communication as the media offer more scientific and technological information to the public This volume explores the evolution of science communication addressing key issues and offering substance for future study Harnessing the energies of junior scholars on the forefront of science communication this work pushes the boundaries of research forward allowing scholars to sample the multiple paradigms and agendas that will play a role in shaping the future of science communication Editors LeeAnn Kahlor and Faith seeking understanding Nico Vorster, Frederik van Niekerk, 2023-03-01 How did it all begin How do we Patrici even start to engage the differences between creation narratives in the Christian Bible and modern scientific theory The authors of this book explore hermeneutic approaches and developments in biblical studies to set the scene for a religious approach This approach is open to the possibility that a literalist approach to Scripture is in fact the most unjustifiable reading of the Bible This may profoundly affect how we view God the cosmos and even ourselves To be able to read the Bible from the perspective of an open present and future paves the way for suppressed uncertainties to be liberated This paves the way for humankind to freely question all things without being enslaved by imposed religious dogma This is not to say that religion has served its purpose but it is far from it With the rise of technological advancements come other social and anthropological problems not to mention the challenge we face on a global scale with climate change et cetera Just as we dare to peek over the edge of a future without religion the authors bring us back to the fundamental teachings of faith traditions Christianity in particular They remind us that the solutions to these challenges are to be found in us becoming better humans Becoming better humans brings us back into the arena of faith traditions When technology may lead to social disconnection and narcissism religion calls for love of self and neighbour Where greed inspired advancements threaten the future of our planet religion teaches us to be in relationship with our environment and to be custodians of it Context and Catholicity in the Science and Religion Debate Klaas Bom, Benno van den Toren, 2020-04-14 Based on a thorough study of the lived theology of Christian students and university professors in Abidjan Kinshasa and Yaound this book proposes a

theoretical framework that makes an intercultural and interdisciplinary debate on science and religion possible Understanding Creation L. James Gibson, Humberto M. Rasi, 2011-01 Understanding Creation articulates twenty questions about faith and science that Christians often encounter The co editors have assembled an international group of experienced scientists researchers and thinkers who provide thoughtful answers to these questions They all share several convictions the biblical record is an essential component of Christian doctrine Christian faith and empirical science can work fruitfully together and our comprehension of truth is progressive **Cosmology Without God?** David Alcalde, 2019-06-26 Is God a superfluous hypothesis for modern cosmology According to the normal understanding of modern science the answer should be affirmative because modern science is supposed to be free of metaphysical and theological presuppositions However despite its self proclaimed neutrality regarding metaphysics and theology modern science is full of metaphysical and theological presuppositions These can be summarized as a mechanistic understanding of nature a reduction of God to an external agent in competition with natural processes and creation to a worldly mechanism These presuppositions are deficient and untenable and they remain unconscious for the most part in the dialogue between science and theology making it intellectually impossible because of the reduced notions of God nature and creation assumed Using the coherent and unreduced image of God and nature provided by the Christian doctrine of creation ex nihilo Fr David Alcalde intends to uncover and criticize the incoherent theological assumptions inherent in a concrete branch of modern science which is modern cosmology. The author points out the presence of these inadequate theological presuppositions in both the theologians who use modern cosmology to offer scientific proof for the existence of God and the atheistic cosmologists who use their science to reject the idea of God The Oxford Handbook of Religion and Science Philip Clayton, Zachary Simpson, 2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader **Religion, Science, and Democracy** Lisa L. Stenmark, 2013-03-08 Despite the increasing popularity of religion and science as an academic discourse the intersection of science and religion remains a front line in an ongoing culture war The reasons for this lie in an approach to discourse that closely resembles the model of discourse promoted by John Rawls in which plural discourse such as between religion and science is based on a foundation of shared beliefs and established facts This leads to a doctrines and discoveries approach to the relationship of religion and science which focuses on their respective truth claims in an attempt to find areas of agreement This framework inherently privileges scientific perspectives which actually increases conflict between religion and science and undermines public discourse by inserting absolutes into it To the extent that the science and religion discourse adopts this approach it inadvertently increases the conflict between religion and science and limits our ability to address matters of public concern This book suggests an alternative model for

discourse a disputational friendship based on the work of Hannah Arendt This approach recognizes the role that authorities

and thus religion and science play in public life but undermines any attempt to privilege a particular authority because it promotes the position of the storyteller who never settles on a single story but always seeks to incorporate many particular stories into her account A disputational friendship promotes storytelling not by seeking agreement but by exploring areas of disagreement in order to create the space for more conversations and to generate more stories and additional interpretations Successful discourse between religion and science is not measured by its ability to determine truth or fact but by its ability to continually expand the discourse and promote public life and public judgment Science And Faith William H. Chalker, 2006 In this introduction to religion and science William Chalker outlines the nature of knowledge involved in claims about science and about religion and deliniates a compatible relationship between these two fields of understanding According to Chalker both science and theology have their proper realms and while they are different in several crucial respects they are not incompatible Publisher's website **Understanding Religion and Popular Culture** Dan W. The Transition, Initiated by Copernicus and Galileo, from Religion to Science Lawrence Wood, 2017-07-06 Have you ever wondered Why two diametrically opposite explanations of ourselves Religion and Science coexist As this book explains the reason is one explanation began before the other The first explanations development began thousands of years ago when our gradually evolving brains and minds awoke to an unknown possibly threatening environment Unfortunately attempts to explain this strange environment were frustrated by illusions such as the apparent motion of the sun moon and stars around the earth which clouded our limited observational capability such as our inability detect constant motion thwarting the developing human minds ability to correctly explain observations These limitations ultimately led to a totally incorrect explanation we reside in a very small young unchanging universe revolving about us created by a supernatural being God a belief system termed Religion About 500 years ago the formulation of the second explanation was initiated when astute investigators such as Copernicus and Galileo using improved

new observation instruments such as the telescope and microscope began to realize the existing illusion based religious explanations could not possibly be correct Author Lawrence Wood introduces the brilliant investigators who resolved the illusions by developing radically new explanations of the illusions an explanation system termed Science many still cannot accept hence the coexistence of religion and science If you are one of those trying to bridge the gulf between your religious beliefs which have become increasingly difficult to accept and the strange new world of science this book will help you God and the Scientist Fraser Watts, 2016-04-22 This book presents a celebration survey and critique of the theological work of arguably the most important and most widely read contributor to the modern dialogue between science and theology John Polkinghorne Including a major survey by Polkinghorne himself of his life s work in theology this book draws together contributors from among the most important voices in the science theology dialogue today to focus on key aspects of Polkinghorne's work with Polkinghorne providing responses Anybody exploring contemporary aspects of the science religion debate will find this book invaluable The Christian Science Journal ,1917 Religion, Science and Culture Dr. S Radhakrishnan, 2019-09-28 A masterly review of the evolving relationship between religion science and culture and the need to create a spiritual unity which will transcend and sustain the material unity of the world order Dr Radhakrishnan's sweep is as wide as the world and wider Tribune This book is not only meant to promote interpeople understanding but to awaken mankind to the danger of extinction of homo sapiens by nuclear destruction the abyss it has reached by spiritual involution Times of India
