Slavery, Fatherhood, and Paternal Duty in African American Communities over the Long Nineteenth Century Libra R. Hilde, 2020-10-01

Analyzing published and archival oral histories of formerly enslaved African Americans Libra R Hilde explores the meanings of manhood and fatherhood during and after the era of slavery demonstrating that black men and women articulated a surprisingly broad and consistent vision of paternal duty across more than a century Complicating the tendency among historians to conflate masculinity within slavery with heroic resistance Hilde emphasizes that while some enslaved men openly rebelled many chose subtle forms of resistance in the context of family and local community She explains how a significant number of enslaved men served as caretakers to their children and shaped their lives and identities From the standpoint of enslavers this was particularly threatening a man who fed his children built up the master's property but a man who fed them notions of autonomy put cracks in the edifice of slavery Fatherhood highlighted the agonizing contradictions of the condition of enslavement and to be an involved father was to face intractable dilemmas yet many men tried By telling the story of the often quietly heroic efforts that enslaved men undertook to be fathers Hilde reveals how formerly enslaved African Americans evaluated their fathers including white fathers and envisioned an honorable manhood

Fragmenting Fatherhood Richard Collier, Sally Sheldon, 2008-09-05 Debates about the future of

fatherhood have been central to a range of conversations about changing family forms parenting and society Law has served an important yet often neglected role in these discussions serving as an important focal point for broader political frustrations playing a central role in mediating disputes and operating as a significant symbolic state sanctioned account of the scope of paternal rights and responsibilities *Fragmenting Fatherhood* provides the first sustained engagement with the way that fatherhood has been understood constructed and regulated within English law Drawing on a range of disparate legal provisions and material from diverse disciplines it sketches the major contours of the figure of the father as drawn in law and social policy tracing shifts in legal and broader understandings of what it means to be a father and what rights and obligations should accrue to that status In thematically linked chapters cutting across substantive areas of law the book locates fatherhood as a key site of contestation within broader political debates regarding the family and gender equality Multiple visions of fatherhood evolving unevenly over time across diverse areas of law emerge from this analysis Fatherhood is revealed as an essentially fragmented status and one which is intertwined in complex ways with the legal cultural and political contexts in which discourses of parenthood are produced *Fragmenting Fatherhood* provides an important and unique resource speaking to debates about fatherhood across a range of fields including law and legal theory sociology gender studies social policy marriage and the family women s studies and gender studies

Family Man Scott Coltrane, 1996-03-28 The typical American family has changed dramatically since the days of Ozzie and Harriet and Father Knows Best Double income families are now the rule and fathers are much more involved in raising the children and cleaning house Reactions to these changes have been diverse ranging from grave misgivings to a sense of liberation and new possibility Groups as diverse as Promise Keepers the Million Man March and Robert Bly s mythopoetic men s movement tell us that fathers are important From the fundamentalist right to the feminist left opinions about the changing nature of the family and the consequent rethinking of gender roles have been vehement if not always very well founded In *Family Man* sociologist Scott Coltrane brings a wealth of compelling evidence to this debate over the American family Drawing on his own extensive research and many fascinating interviews Coltrane explodes many of the common myths about shared parenting

provides first hand accounts of men's and women's feelings in two job families and reveals some innovative solutions that couples have developed to balance job and family commitments. Readers will find an insightful discussion of precisely how and why family life has changed, what forms it may take in the future, and what new kinds of fathers may be on the horizon. The author firmly places these questions within a broad contextual framework. He provides, for instance, an illuminating history of the family that shows that far from being a fixed structure, the family has always adapted to changing economic, social, and ideological pressures. And by examining how families operate in a variety of non-industrial societies, he demonstrates that our own notions of gender-specific work and parenting roles are culturally rather than biologically determined and thus inherently flexible. And indeed, these roles are changing. While contemporary American women still perform the bulk of domestic tasks, *Family Man* gives us decisive evidence that men are becoming increasingly involved in both housework and childrearing. Coltrane argues convincingly that this trend will continue. Given the current economic situation, with two job households now the norm and the gradual ideological shift away from restrictive gender roles, more and more couples will find it both necessary and desirable to share the workload. More important, Coltrane suggests that as fathers participate more fully in raising their children and performing traditionally female household tasks, men will themselves be transformed by the experience in profoundly positive ways, and American society as a whole will move closer to true gender equity. *Family Man* succeeds brilliantly in bringing clarity, perspective, and above all, hope to a discussion that is too often shrill, chaotic, and beset with the rhetoric of nostalgia. It shows us not only exactly where the family is today, but where it has been and what it may become.

Life with Father Stephen M. Frank, 1998-08-20 Who was the Victorian patriarch and what kind of father was he? In this richly documented study, Stephen M. Frank presents the first account of nineteenth-century family life to focus on the role of fathers. Drawing on letters, diaries, memoirs, and other primary sources, Frank explores what fathers thought about their family responsibilities and how men behaved as parents. His findings are often surprising. Beneath the stereotype of the starched Victorian patriarch, he discovers fathers who were playful, demanding, uncertain of their authority, and deeply anxious about their children's prospects in a rapidly changing society, men with strikingly modern attitudes toward parenthood. Focusing on Northern middle-class families, he also uncovers the social origins of the family man ideal and explores how this standard of middle-class propriety found its way into practice. *Life with Father* looks beyond the well-known nineteenth-century fascination with motherhood to discover a social order that valued a father's care no less than a mother's love as a basis for stable family relationships. This compelling social history engages readers with the story of how families in the past struggled with economic and social changes that required fathers to reassess themselves as parents and as men.

Under Construction Laurel Kendall, 2001-09-30 Since the late 1960s, the lives of South Koreans have been reconstructed on the shifting ground of urbanization, industrialization, military authoritarianism, democratic reform, and social liberalization. Class and gender identities have been modified in relation to a

changing modernity and new definitions of home and family work and leisure husband and wife Under Construction provides an illuminating portrait of south Koreans in the 1990s a decade that saw a return to civilian rule a loosening of censorship and social control and the emergence of a full blown consumer culture It shows how these changes impacted the lives of Korean men and women and the very definition of what it means to be male and female in Korea In a series of provocative essays written by Korean and Western scholars we see how Korean women and men actively engage and at times openly contest the limitations of gender Under Construction is part of a decisive turn in the anthropology of gender from its early quest for the causes of female subordination to a finely tuned analysis of the historical cultural and class based specificities of gender relations and the tension between gender as an ideological construct and as a lived experience Firmly grounded in the political and economic history of south Korea this long awaited volume fills an important gap in Korean studies and East Asia gender studies in English Contributors Nancy Abelmann Cho Haejoang Roger L Janelli Laurel Kendall June Lee So Hee Lee Seungsook Moon Dawnhee Yim
