Wiley,Barbara Barnett,2009-05-27 As a former nurse and someone who now teaches Women s Studies I have long been interested in the politics of health care Today most Americans would agree that our health care system is broken We pay more for health care than any nation in the world yet in 2007 the World Health Organization ranked us as 37th in quality of health care Forty six million Americans are now without health insurance What is happening here And just where are all these dollars going In *Women Wellness and the Media* thirteen scholars from a wide range of disciplines examine the relationship between media stereotypes and women s health They look at several images of women the perfect mom the straight bikini clad sixteen year old blond who has been air brushed to perfection the wild black Jezebel who struts her stuff and the shriveled up menopausal crone The writers point out that these images are making millions of dollars for all sorts of businesses ranging from the pharmaceutical industry to women s magazines Scholars have long noted that stereotypes disempower women in *Women Wellness and the Media* we see how these stereotypes actually harm women s health while turning millions in corporate profits The Layperson's Guide to Exercise, Diet & Supplements Daniel J. Shamy,2013-04 We instinctively know that exercise eating the right things and taking vitamins sustains our health maintains our youth and offers a sense of wellbeing Traditional fitness publications do a great job telling you what to do but lack any explanation as to the why and how They offer a map to youth by micromanaging your diet exercise and or supplements You blindly follow their lead in expectation of finding your fountain of youth through their training Every body is different which is why one map may work for one person but not another maybe it failed you so you try another What you may not realize is that although they offer step by step instruction to find the fountain they are not teaching you how to read the map Although the map is the same the directions are different for each of us to find the fountain of youth The difference between the layperson and expert is their ability to read the map as a whole that map is our anatomy That cartography lesson is learned by teaching you how exercise diet and supplements work rather than being told what in the same to follow At the end of the lesson you may now understand that your journey may require parts of many methods rather than the single direction of one The author shares

his own journey as he teaches you how to read the map so you understand how one has successfully read the map to discover his fountain of youth     Oracle at the Supermarket Steven Starker,2002-01-01 Oracle carefully explores the dangers and benefits of diet and exercise books sex manuals and self actualization schemes It is a timely and fascinating work and will be of great interest to health care providers and thoughtful consumers Joseph D Matarazzo American Psychological Association
