Goodbye Chicago:

Coming Home Paul A. Contos, 2014-01-30 A real life experience and a sobering surprise for a WWII veteran returning to the United States after having served in Europe for about 18 months Having been notified that it was his turn to be released from service he was sure that he was going to the home he left two years earlier Upon returning he was faced with the reality that the home was not his and there was no room for him Although not stated the message was Sorry Buster you dont live here anymore What happened It is generally assumed that one has a home a physical shelter where you hang your hat or where you are a member of a household with either the given rights of residency or other qualifying reason s Without the legitimacy of an assumed status in a home does any metaphor describing a destination or objective such as coming home make it a rite of passage Despite the object lesson the veteran courageously dealt with it and moved on achieving a better life than was anticipated or foreseen in his childhood home Could this story be a message lesson or guidance for parents or is it a sobering reality of rights Despite an upsetting experience a last minute compromise and the veterans tenacity allowed him a temporary residence that gave him an opportunity to adjust to the changed landscape **Margaret Haley's Bulletin** ,1929

Network Nation Richard R. John, 2015-10-05 The telegraph and the telephone were the first electrical communications networks to become hallmarks of modernity Yet they were not initially expected to achieve universal accessibility In this pioneering history of their evolution Richard R John demonstrates how access to these networks was determined not only by technological imperatives and economic incentives but also by political decision making at the federal state and municipal levels In the decades between the Civil War and the First World War Western Union and the Bell System emerged as the dominant providers for the telegraph and telephone Both operated networks that were products not only of technology and economics but also of a distinctive political economy Western Union arose in an antimonopolistic political economy that glorified equal rights and vilified special privilege The Bell System flourished in a progressive political economy that idealized public utility and disparaged unnecessary waste The popularization of the telegraph and the telephone was opposed by business lobbies that were intent on perpetuating specialty services In fact it wasn't until 1900 that the civic ideal of mass access trumped the elitist ideal of exclusivity in shaping the commercialization of the telephone The telegraph did not become widely accessible until 1910 sixty five years after the first fee for service telegraph line opened in 1845 Network Nation places the history of telecommunications within the broader context of American politics business and discourse This engrossing and provocative book persuades us of the critical role of political economy in the development of new technologies and their implementation [The Fifteen](#) William Geroux, 2025-03-18 The revelatory true story of the long forgotten POW camps for German soldiers erected in hundreds of small U S towns during World War II and the secret Nazi killings that ensnared fifteen brave American POWs in a high stakes showdown In the pantheon of American history it's very hard to find compelling original stories and even harder to find authors worthy of them In [The Fifteen](#) William Geroux

delivers the goods John U Bacon New York Times bestselling author of *The Great Halifax Explosion* The American government was faced with an unprecedented challenge where to house the nearly 400 000 German prisoners of war plucked from the battlefield and shipped across the Atlantic On orders from President Franklin D Roosevelt the Department of War hastily built hundreds of POW camps in the United States Today traces of those camps which once dotted the landscape from Maine to California have all but vanished Forgotten too is the grisly series of killings that took place within them Nazi power games playing out in the heart of the United States Protected by the Geneva Convention German POWs were well fed and housed Many worked on American farms and a few would even go on to marry farmers daughters Ardent Nazis in the camps however took a dim view of fellow Germans who befriended their captors Soon the killings began In camp after camp Nazis attacked fellow Germans they deemed disloyal Fifteen were sentenced to death by secret U S military tribunals for acts of murder In response German authorities condemned fifteen American POWs to the same fate and in the waning days of the war Germany proposed an audacious trade fifteen German lives for fifteen American lives Drawing on extensive research journalist and author William Geroux shines a spotlight on this story of murder and high stakes diplomacy and on the fifteen American lives that hung in the balance from a fearless P 51 Mustang fighter pilot to a hot tempered lieutenant colonel nicknamed King Kong Propulsive and vividly rendered *The Fifteen* reminds us that what happens to soldiers after they exit the battlefield can be just as harrowing as what they experience on it
