The Archaeology of Phrygian Gordion, Royal City of Midas C. Brian Rose, 2013-03-16 Some of the most dramatic new discoveries in Asia Minor have been made at Gordion the Phrygian capital that controlled much of central Asia Minor for close to two centuries The most famous ruler of the kingdom was Midas who regularly negotiated with Greeks in the west and Assyrians in the east during his reign Excavations have been conducted at Gordion over the course of the last 60 years all under the auspices of the University of Pennsylvania Museum of Archaeology and Anthropology In spite of the economic and political importance of Gordion and the Phrygians the site is consistently omitted from courses in Old World archaeology primarily because Gordion lies too far to the west for many Near Eastern archaeologists and too far to the east for classical archaeologists Moreover there is no book that offers a comprehensive and up to date assessment of the material culture of Gordion during the Phrygian period a gap that will be filled by this volume The chapters cover all aspects of Gordion s Phrygian settlement topography from the arrival of the Phrygians in the tenth century B C through the arrival of Alexander the Great in 333 B C focusing on the site s changing topography and the consistently fluctuating interaction between the inhabitants and the landscape A reexamination of the material culture of Phrygian Gordion is particularly timely given the dramatic recent changes in the site s chronology wherein the dates of many discoveries have changed by as much as a century The authors are among the leading experts in Near Eastern archaeology historic preservation paleobotany and ancient furniture and their articles highlight the interdisciplinary nature of the Gordion project A significant component of

the book is a new color phase plan of the site that succinctly presents the topography in diachronic perspective University Museum Monograph 136 **The Gordion Excavations Final Reports, Volume III** Ann Gunter,1991-01-29 Excavations on the City Mound of Gordion in 1961 and 1962 reached to levels containing remnants of Bronze Age structures The author provides a detailed stratigraphical presentation of the pottery and small finds from these strata Bronze Age Gordion is placed in the historical and cultural context of the Anatolian Bronze Age Professor Machteld J Mellink has supplied a cross section of the Bronze Age City Mound and a brief discussion of the stratigraphy University Museum Monograph 73 The Oxford Handbook of Ancient Anatolia Sharon R. Young,1982-01-29 Rodney S Young directed excavations for the Museum at the site of Gordion on the central plateau in Anatolia modern Turkey in alternate years from 1950 to 1973 Traces of occupation as early as the Early Bronze Age have
