Fast, Fresh and Unbelievably Delicious Matt

Preston, 2013-10-01 My new cookbook is full of recipes for stuff that is quite simply delicious and that I cook for my family and friends It's a wee bit different from my first book in that the dishes are fresher lighter healthier Well that was the idea I then suggested all those naughty over the top dishes that I also love These had to go into a sealed section because like a Bangkok nightclub act they are just a little too full on for the delicate stomachs of some and for the good of your health That section is sealed for your own safety Please resist opening it if you are a helpless slave to your passions In short this book is like me It starts out with REALLY GOOD intentions for a while until it is overwhelmed by temptation and then quite frankly once self control is gone it turns into a bit of an orgiastic free for all Good times Welcome to the Pleasure Dome my friends please grab a fork Matt Preston This is a specially formatted fixed layout ebook that retains the look and feel of the print book

Beyond the Secret Elephants Gareth Patterson, 2020-01-06

Beyond the Secret Elephants is Gareth Patterson's long awaited sequel to The Secret Elephants published in 2009 Beyond the Secret Elephants is the continuing story of Gareth Patterson's almost two decades of research into the secretive Knysna elephants Significantly however it also reveals his startling discovery of a much more mysterious being than the elephants a relict hominoid known to the indigenous forest people as the Otang Gareth had long heard about the existence of the otang from the local people but he mentioned it only briefly in The Secret Elephants focusing instead on his rediscovery of the Knysna elephants and their survival against the odds He was reluctant to blur the story of the elephants with his findings about the otang That is until now The possible existence of relict hominoids is today gaining momentum worldwide with ongoing research into Bigfoot in North America the Yeti in the Himalayas and the Orang Pendek in Sumatra Eminent conservationists and scientists among them Dr Jane Goodall Dr George Schaller and Professor Jeff Meldrum have publicly stated that they are open minded about the possible existence of these cryptid beings In the course of his unannounced research into the otang Gareth heard many accounts mostly spontaneous and unprompted of otang sightings by others in the area over a number of years These accounts documented in the book are astonishingly consistent both in the descriptions of the otang and in the shocked reactions of the individuals who saw them Gareth Patterson's work supports the increasing realisation that humankind still has much to learn about the natural world and the mysteries it holds The possibility that we may be sharing our world with other as yet unidentified hominoids is today being viewed as something that should not be discounted And as humankind we need to reassess our role and our responsibility towards all forms of life that coexist with us on planet Earth following in the erudite footsteps of the
