reciprocal interconnections that can lead from the deadliest to the most vital And precisely because there is this continuity icebergs and glaciers tell us something important about life itself namely that it thrives in the most unexpected of places even where there seems to be no life at all At a time when we are increasingly aware that the melting of ice sheets glaciers and sea ice is one of the many disastrous consequences of global warming this beautiful meditation is a poignant reminder of the interconnectedness of all life and the fragility of the Earth s ecosystems
