Postcommunism and the Theory of Democracy Richard D. Anderson, M. Steven Fish, Stephen E. Hanson, Philip G. Roeder, 2021-05-11 Why did the wave of democracy that swept the former Soviet Union and Eastern Europe starting more than a decade ago develop in ways unexpected by observers who relied on existing theories of democracy In *Postcommunism and the Theory of Democracy* four distinguished scholars conduct the first major assessment of democratization theory in light of the experience of postcommunist states Richard Anderson Steven Fish Stephen Hanson and Philip Roeder not only apply theory to practice but using a wealth of empirical evidence draw together the elements of existing theory into new syntheses The authors each highlight a development in postcommunist societies that reveals an anomaly or lacuna in existing theory They explain why authoritarian leaders abandon authoritarianism why democratization sometimes reverses course how subjects become citizens by beginning to take sides in politics how rulers become politicians

by beginning to seek popular support and not least how democracy becomes consolidated Rather than converging on a single approach each author shows how either a rationalist institutionalist discursive or Weberian approach sheds light on this transformation They conclude that the experience of postcommunist democracy demands a rethinking of existing theory To that end they offer rich new insights to scholars advanced students policymakers and anyone interested in postcommunist states or in comparative democratization

Ancient Geopolymers in South America and Easter Island Joseph Davidovits, 2024-11-16 This book presents the study on Ancient Geopolymers in South America and Easter Island regions exploring the artificial nature of the volcanic rocks used in the construction of Easter Island's statues Contrary to the belief that the statues were carved and transported Davidovits suggests they were made on site using geopolymer technology He proposes that this knowledge came from Amerindians from the Andes specifically the Tiahuanaco region near Lake Titicaca The book is divided into two parts the first examines geopolymeric artificial stone technologies in the Andes and the second establishes a connection between these technologies and Easter Island 3 700 km away Davidovits research includes geological expeditions SEM analysis petrography and a comprehensive review of international literature It is intriguing to observe that in both cases Pumapunku Tiwanaku in the Andes and Easter Island volcanic rocks are involved which contain biological carbon These discoveries undeniably support the theory of geopolymeric artificial manufacturing challenging traditional archaeological views
