International Politics Scott P. Handler, Robert T. Person, 2020-12-23 Why do states do what they do Who are the relevant nonstate actors in international politics and why do they do what they do What causes conflict and cooperation in the international system These are some of the most basic questions that the discipline of International Relations IR seeks to answer they are also the questions that drive the objectives organization and content of this book *International Politics Classic and Contemporary Readings Second Edition* seeks to help students engage critically with some of the world's most challenging questions through the use of leading classic and contemporary scholarship in the field of international relations The first five chapters of the book explore the leading theoretical traditions in international relations while subsequent chapters explore the themes of international security international political economy and contemporary challenges in international relations This organization makes the book easy to use as standalone text or alongside core text Class tested on over 10 000 students in the last decade this text was built from the ground up to introduce students to the traditions and new foundations of international relations as well to the principles of intellectually rigorous thought *International Politics - International Student Edition* Scott P. International Politics Christopher Lamonica, 2008-06-30 *Principles And Laws In World Politics: Classical Chinese Perspectives On Global Conflict* Walter Wan Fai Lee, 2021-12-02 The search for universal principles and laws in world politics is a colossal common task for all civilisations It should not be monopolised by the Western liberal paradigm Thirty years after the end of the Cold War global conflicts have been satisfactorily resolved neither by communism nor liberalism Humanitarian intervention now under the cover of the responsibility to protect R2P has destabilised many societies leaving justice undone This inspiring book invites debates on the post liberal imagination of emancipated Leviathan an almighty political authority which exercises awe and force to restore order as well as enshrines globally negotiated values of common conscience and reinvented cosmopolitanism Human well being will truly become reality when we synergise pre modern and pre liberal ways of thinking worldviews ethics and aesthetic styles by means of cross civilisational cross disciplinary fundamental research

and let an emancipated Leviathan exercise principles and laws of virtue derived from the study. The starting point of such intellectual innovation is China. This book explores the application of classical Chinese resources to the innovation of thoughts in contemporary Chinese international relations (IR). It examines whether Knowledge Archaeology of Chinese International Relations (KACIR), coined by the author, responds sensibly to today's issues of international ethics and global justice. The book contends that emancipative hermeneutics holds the key to the Chinese soft power puzzle. A bottom-up, non-nationalistic and non-ethnocentric approach to the Chinese civilisation will reinvent intellectual pluralism and cosmopolitan elements in the Chinese tradition that interact constructively with and ultimately transcend the liberal Western model. Strolling from contemporary IR back to ancient Chinese philosophy then striding into the future searching for common principles and laws, this insightful book is a must-read for those who want to reflect on global conflicts in this era of great uncertainty and transformation as well as those who love to make our world a better place to live in.

Classical Theory in International Relations Beate Jahn, 2006-11-09. Classical political theorists such as Thucydides, Kant, Rousseau, Smith, Hegel, Grotius, Mill, Locke, and Clausewitz are often employed to explain and justify contemporary international politics and are seen to constitute the different schools of thought in the discipline. However, traditional interpretations frequently ignore the intellectual and historical context in which these thinkers were writing as well as the lineages through which they came to be appropriated in International Relations. This collection of essays provides alternative interpretations sensitive to these political and intellectual contexts and to the trajectory of their appropriation. The political, sociological, anthropological, legal, economic, philosophical, and normative dimensions are shown to be constitutive not just of classical theories but of international thought and practice in the contemporary world. Moreover, they challenge traditional accounts of timeless debates and schools of thought and provide new conceptions of core issues such as sovereignty, morality, law, property, imperialism, and agency.

Classics of International Relations Henrik Bliddal, Casper Sylvest, Peter Wilson, 2013-07-24. Classics of International Relations introduces, contextualises, and assesses 24 of the most important works on international relations of the last 100 years. Providing an indispensable guide for all students of IR theory from advanced undergraduates to academic specialists, it asks why these works are considered classics. Is their status deserved? Will it endure? It takes as its starting point Norman Angell's best-selling *The Great Illusion* (1909) and concludes with Daniel Deudney's award-winning *Bounding Power* (2006). The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics* but seeks to expand the IR canon beyond its core realist and liberal texts. It thus considers emerging classics such as Linklater's *critical sociology of moral boundaries*, Men and Citizens in the *Theory of International Relations*, and Enloe's pioneering gender analysis *Bananas, Beaches and Bases*. It also innovatively considers certain alternative-format classics such as Kubrick's satire on the nuclear arms race *Dr Strangelove* and Errol Morris's powerful documentary on war and US foreign policy *The Fog of War*. With an international cast of contributors, many of them

Classical and Modern Thought on International Relations R. Jackson, 2005-04-01 In the tradition of the English School of International Relations theory this project from Robert Jackson seeks to show how continuities in international politics outweigh the changes The author demonstrates how the world is neither one of anarchy as put forward by realists nor is it a fully cosmopolitan order as argued by those on the other side of the theoretical spectrum Instead it is a world of states who acknowledge a set of moral constraints that exists between them

Conceptualizing the West in International Relations Thought J. O'Hagan, 2002-04-09 West is a concept widely used in international relations but we rarely reflect on what we mean by the term Conceptions of and what the West is vary widely This book examines conceptions of the West drawn from writers from diverse historical and intellectual contexts revealing both interesting parallels and points of divergence It also reflects on implications of these different perceptions of how we understand the role of the West and its interactions with other civilizational identities

Rethinking Power, Institutions and Ideas in World Politics Amitav Acharya, 2014-01-10 The study of international relations has traditionally been dominated by Western ideas and practices and marginalized the voice and experiences of the non-Western states and societies As the world moves to a post-Western era it is imperative that the field of IR acquires a more global meaning and relevance Drawing together the work of renowned scholar Amitav Acharya and framed by a new introduction and conclusion written for the volume this book exposes the narrow meaning currently attached to some of the key concepts and ideas in IR and calls for alternative and broader understandings of them The need for recasting the discipline has motivated and undergirded Acharya's own scholarship since his entry into the field over three decades ago This book reflects his own engagement quarrels and compromise and concludes with suggestions for new pathways to a Global IR a forward-looking and inclusive enterprise that is reflective of the multiple and global heritage of IR in an changing and interconnected world It is essential reading for anyone who is concerned about the history development and future of international relations and international relations theory

International Relations Stephanie Lawson, 2017-01-19 International Relations emerged as a distinct academic discipline in the early twentieth century but its philosophic foundations draw on centuries of thinking about human nature power and authority justice and injustice and their implications for relations within and between political communities In this fully revised and updated third edition of her popular text Stephanie Lawson retains a broad historical and contextual approach in introducing readers to the

central themes and theoretical perspectives in IR while also addressing key issues and challenges in the contemporary period. These include the emergence of states and empires, theories ranging from classical realism and liberalism to postcolonial and green theory, twentieth century international history, security and insecurity, global governance and world order, international political economy, globalization, the future of the sovereign state and the prospects for a post international world. Written in an accessible narrative style, this book is an ideal primer for students at undergraduate level and beyond, including those undertaking postgraduate study in IR with little or no previous academic training in the field.

Classical Theories of International Relations Ian Clark, Iver B. Neumann, 2016-07-27. Drawing on a tripartite taxonomy first suggested by the so called English School of International Relations, of a Hobbesian tradition of power politics, a Grotian tradition of concern with the rules that govern relations between states, and a Kantian tradition of thinking which transcends the existence of the states system, this book discusses the thinking of central political theorists about the modern states system. Thinkers covered are Hobbes, Grotius, Kant, Vitoria, Rousseau, Smith, Burke, Hegel, Gentz, and Vattel.

A Man's World? Political Masculinities in Literature and Culture Kathleen Starck, 2014-07-24. Political institutions and practices such as the state, parliament, citizenship, and nationality, the vote, the military, and the making and implementation of laws have traditionally been treated as if they were ungendered and guided exclusively by objective reasoning and rationality. Rationality and reason, though, have been habitually ascribed to masculinity, a fact which has often been ignored in favour of the apparent gender inclusiveness of the realm of politics. In contrast to this view, this book explores the interdependence of the construction of masculinities on the one hand, and the emerging maintenance and modification of concepts such as the state, citizenship, nationality, and nationalism, democracy, and militarism on the other. Illustrating the great amount of research activity in the field of political masculinities, the book offers many perspectives in its attempt to shed light on different modes of representing and constructing political masculinities across time and space. Findings from the fields of political science, history, media studies, literature, and film studies, as well as cultural studies, encourage an interdisciplinary debate of political masculinities in Europe and the United States from the nineteenth to the twenty first century.
