International Politics Of Surplus Capacity:

The International Politics of Surplus Capacity (Routledge Revivals) Susan Strange, Roger Tooze, 2009-11-02 This important survey first published in 1981 presents some different and often contending perceptions of the problem of surplus capacity as it re emerged in the world of the 1980s an economic climate with many parallels to the current era Susan Strange and Roger Tooze deliberately assembled writers of many different nationalities professional backgrounds and ideological convictions and asked them to make the case for their version of the problem Some even doubt if there really is much of a problem at all Others see it as fundamentally political or monetary as inherent in the capitalist system or as the product of short sighted pressure groups and perverse politicians To help readers judge for themselves there are specialist contributions on surplus capacity as it has shown up in different sectors of the world economy shipbuilding textiles steel petrochemicals insurance and banking and on the responses of different actors in the international system including the European Community and multinational corporations *The Retreat of the State* Susan Strange, 1996-11-14 Adopting new and much more comprehensive concepts of both power and politics *The Retreat of the State* develops a theoretical framework to show who really governs the world economy It goes on to explore some of the non state authorities from mafias to the Big Six accounting firms and international bureaucrats whose power over who gets what in the world encroaches on that of national governments The book is a signpost pointing to some promising new directions for the future development of research and teaching in international political economy Its originality and scope make *The Retreat of the State* of great importance for scholars and students of international relations business and management **Issues and Agents in**

International Political Economy Benjamin J. Cohen, Charles Lipson, 1999 This is the second of two anthologies on international political economy drawn from articles published in the journal *International Organization* The book is organized into four sections Trade Multinational Firms and Globalization Money and Finance and Emerging Issues *The Politics of Steel* Yves Meny, Vincent Wright, Martin Rhodes, 2012-02-14 No detailed description available for *The Politics of Steel*

Contexts of International Politics Gary Goertz, 1994-11-24 In this book Gary Goertz examines how states interact with their environment and contexts which are important in understanding international politics He presents a philosophical methodological and empirical discussion of three important contexts which affect decision makers history system structure and international norms The effects of these contexts are explored by viewing context in turn as cause as changing meaning and as a barrier The book engages with the literature on structural realism and international regimes and uses rational actor and diffusion models as theoretical references A number of concrete studies are provided using these contextual tools including oil nationalisation USSR East European relations enduring rivalries and decolonisation These empirical examples illustrate the fruitfulness of the contextual approach to international politics *Japan's Budget Politics* Takaaki Suzuki, 2000 What is the source of the increasing politicization of Japan's budgetary policy In this text Takaaki Suzuki explores this

question finding answers in the interplay of domestic and international politics from the early 1970s through the 1990s

Global Restructuring and the Power of Labour Bill Dunn, 2004-05-28 Bill Dunn considers and contests accounts of globalization and post Fordism that see structural economic change in the late Twentieth century as having fundamentally worsened the conditions and weakened the potential of labour Including a comparative survey of restructuring in four major industries automobiles construction microelectronics and finance the book suggests the timing of change and its complex and contradictory nature undermine structural explanations of labour s situation It redirects attention towards labour s political defeats and own institutional shortcomings The Political Economy of International Air Safety Vicki L Golich, 1990-01-05

Growth, Trade, and Systemic Leadership Rafael Reuveny, William R. Thompson, 2009-12-21 Using a lead economy approach Reuveny and Thompson link question about the global trade system to debates about hegemonic stability and the balance of power in world politics By focusing on economic growth protectionism and trade they surpass hegemonic stability interpretations of international politics to explain not only how hegemons maintain political order but also the source of hegemonic systemic leadership the rise and decline of leadership over time and the role of system leaders in generating worldwide economic growth and international political economic order Rafael Reuveny is Associate Professor in the School of Public and Environmental Affairs at Indiana University William R Thompson is Professor of Political Science at Indiana University Japan and Protection Syed Javed Maswood, 2018-10-26 In the 1980s the extent of Japanese export penetration into other Western economies particularly the USA became a matter of international concern There were demands for Japan to reciprocate on imports for the Japanese market to be opened up and by some people for sanctions or a trade war if the Japanese did not respond This book first published in 1989 examines the growth of protectionist sentiment and the Japanese response to it It examines in detail the debates within Japan and discusses the measures which the Japanese took including the voluntary export restraint measure in the motor sector It concludes that broadly the Japanese did indeed respond to world demands for their market to be opened up but that successful exporting to Japan depended equally on efforts by Western companies to service that market which they were slow to do **Japanese Defence** Syed Javed Maswood, 1990

This book focuses on the defence policy of the Nakasone administration and attempts to provide an explanation for the policy measures which its administration implemented or initiated It suggests that the widening disparity between economic interests and political power forced Japan to review the traditional bases for defence policy making and prompted the search for a balance that would allow the country a more active role in the international sphere The book is organized around the central theme that Nakasone s defence policy can be understood as an attempt to rehabilitate Japan as a normal state and end the state of affairs that had relegated it to a unique and low position *The New Era of Global Competition* Daniel Drache, Meric S. Gertler, 1991 The increasing globalization of production and the conservative agenda for market led growth are dramatically affecting the life of the average Canadian and the choices made by social and economic policy makers As

Daniel Drache Meric Gertler and the contributing authors show the worldwide reorganization of markets poses new challenges for domestic industry while continental trade initiatives threaten the livelihood of Canadian workers and the stability of communities across all regions of the country Environmental quality is similarly at risk from development strategies driven more by possibilities of short term gain from export sales than by attempts to promote long term sustainability
