Dominance Helen Turton, 2015-11-19 This work seeks to explore the widely held assumption that the discipline of International Relations is dominated by American scholars approaches and institutions It proceeds by defining dominance along Gramscian lines and then identifying different ways in which such dominance could be exerted agenda setting theoretically methodologically institutionally gate keeping Turton dedicates a chapter to each of these forms of dominance in which she sets out the arguments in the literature discusses their theoretical implications and tests for empirical support The work argues that the self image of IR as an American dominated discipline does not reflect the state of affairs once a detailed sociological analysis of the production of knowledge in the discipline is undertaken Turton argues that the discipline is actually more plural than widely recognized challenging widely held beliefs in International Relations and it taking a successful step towards unpacking the term dominance An insightful contribution to the field this work will be of great interest to students and scholars alike **International Relations and Pan-Europe** Frank R. Future of International Relations Iver B. Neumann, Ole Wæver, 2005-06-29 This book presents the state of the art of international relations theory through an analysis of the work of twelve key contemporary thinkers John Vincent Kenneth Waltz Robert O Keohane Robert Gilpin Bertrand Badie John Ruggie Hayward Alker Nicholas G Onuf Alexander Wendt Jean Bethke Elshtain R B J Walker and James Der Derian The authors aim to break with the usual procedure in the field which juxtaposes aspects of the work of contemporary theorists with others presenting them as part of a disembodied school of thought or paradigm A more individual focus can demonstrate instead the well rounded character of some of the leading oeuvres and can thus offer a more representative view of the discipline This book is designed to cover the work of theorists whom students of international relations will read and sometimes struggle with The essays can be read either as introductions to the work of these theorists or as companions to it Each chapter attempts to place the thinker in the landscape of the discipline to identify how they go about studying International Relations and to discuss what others can learn from them

The European Union in International Politics Roy H. Ginsberg,2001-10-03 As the world looks to Europe to take on more responsibility in international politics and security in the devastating aftermath of Bosnia and Kosovo this pathbreaking book provides the first systematic evaluation of the political impact of the European Union EU on a global scale Little is known of the EU s international political influence yet if the EU is to develop a viable Common Foreign and Security Policy other actors will have to perceive the Union as an important player Roy Ginsberg fills this vital gap by first linking the contexts and sources of EU foreign policy actions with the processes and outputs of decisionmaking and then examining how outsiders view the EU Combining a masterly synthesis of the literature with invaluable primary interviews and case studies that document the reach of and limits to the EU s political influence Ginsberg takes the study of EU foreign policy to a new level of analysis By

International Relations in France Henrik Breitenbach, 2013-06-19 Why is the French International Relations IR discipline different from the transnational American discipline By analysing argument structures in research articles across time this book shows how the discipline in France is caught between the American character of the discipline and the French state as regulator of legitimate forms of expression Concretely French research arguments are less explicit about what their propositions are and what academic discussions they draw on and add to than their transnational American counterparts Based on a comparative case study of French and American IR research from 1950 to 2011 the book is a major contribution to the meta IR literature on global regional and national traditions of IR The challenge to the French discipline of whether and how to position itself in relation to the evolving American discipline is in many ways exemplary for other non American national IR disciplines and the choices as well as the structural conditions underlying the French case are relevant to all non Western disciplines The comparative analysis moreover reveals that the modern American discipline what is considered as recognisable social science takes shape only during the 1970s The book thus offers new knowledge about the discipline's international development as such Both case and methodology are interesting to larger audiences outside IR in the history and sociology of social science contrastive rhetoric as well as French and cultural studies

Rethinking the European Union Alice Landau, Richard Whitman, 2016-07-27 Rethinking the European Union draws together contributors from across Europe to reflect upon methods of conceptualising the European Union within both changing global and European contexts The book takes the themes of institutions interests and identities as its organising framework within which each contributor offers a distinctive

commentary on the EU The outcome is a text that goes beyond an exploration of the existing methods of conceptualising the European integration process and reflects upon the nature of the EU itself **Handbook of International Relations**

Walter Carlsnaes, Thomas Risse, Beth A Simmons, 2012-09-18 The original Handbook of International Relations was the first authoritative and comprehensive survey of the field of international relations In this eagerly awaited new edition the Editors have once again drawn together a team of the world's leading scholars of international relations to provide a state of the art review and indispensable guide to the field ensuring its position as the pre eminent volume of its kind The Second Edition has been expanded to 33 chapters and fully revised with new chapters on the following contemporary topics Normative Theory in IR Critical Theories and Poststructuralism Efforts at Theoretical Synthesis in IR Possibilities and Limits International Law and International Relations Transnational Diffusion Norms Ideas and Policies Comparative Regionalism Nationalism and Ethnicity Geopolitics in the 21st Century Terrorism and International Relations Religion and International Politics International Migration A truly international undertaking this Handbook reviews the many historical philosophical analytical and normative roots to the discipline and covers the key contemporary topics of research and debate today The Handbook of International Relations remains an essential benchmark publication for all advanced undergraduates graduate students and academics in politics and international relations **Joining the Fray** Zachary C. Shirkey, 2016-05-06 National leaders often worry that civil wars might spread but also seem to have little grasp on which civil wars will in fact draw in other states An ability to understand which civil wars are most likely to draw in outside powers and when this is likely to happen has important policy implications as well as simply answering a scholarly question Joining the Fray takes existing explanations about which outside states are likely to intervene militarily in civil wars and adds to them explanations about when states join and why Building on his earlier volume Is this a Private Fight or Can Anybody Join Zachary C Shirkey looks at how the decision to join a civil war can be intuitively understood as follows given that remaining neutral was wise when a war began something must change in order for a country to change its beliefs about the benefits of fighting and join the war This book studies what these changes are focusing in particular on revealed information and commitment problems **Contemporary Austrian Politics** Volkmar Lauber, 2019-09-17 Long characterized by stability even rigidity Austrian politics is becoming more dynamic and combative Tracing the disruption of the postwar pattern in Austria this book explores the recent dramatic evolution in Austria's political system The contributors examine the decline of the established Social Democratic and Conservative parties and c

Conservative parties and c **The Europeanisation of National Foreign Policy** Ben Tonra, 2018-02-05 This title was first published in 2001 This study questions whether the development of foreign and security policy co operation within the EU has constrained or empowered Danish Dutch and Irish foreign policy This entails a study of the relationship between national foreign policy and EU frameworks for co operation **Jihad in Central Asia** Musa Khan Jalalzai, 2020-06-18 The four Central Asian States Kyrgyzstan Tajikistan Kazakhstan and Uzbekistan security agencies and government have adopted

several law and order measures to effectively fight against radicalization but some states failed to intercept the infiltration of the ISIS militants from Afghanistan into the region The power structures social institutions and local authorities of the Central Asian states are unable to work with radical Islamic groups The prospect of nuclear terrorism in Central Asia and possibly in Russia is crystal clear The risk of a complete nuclear device falling into the hands of terrorists will cause consternation in the region Nuclear terrorism remains a constant threat to global peace Access of terrorist organizations to nuclear material is a bigger threat to civilian population These are some of the issues discussed in the book The issues are based on well researched papers by eminent authors on the subject The Southern African Development Community (SADC) and the European Union (EU) Johannes Muntschick,2017-10-09 This book explores regionalism in the Southern African Development Community SADC and highlights the influence of the European Union EU as an extra regional actor on the organization and integration process The analysis is guided by theory and explains the emergence institutional design and performance of SADC s major integration projects in the issue areas of the economy security and infrastructure It provides in this way a profound assessment of the organization as a whole The study shows that South Africa plays a regional key role as driver for integration while external influence of the EU is ambivalent in character because it unfolds a supportive or obstructive impact The author argues that the EU gains influence over regional integration processes in the SADC on the basis of patterns of asymmetric interdependence and becomes a game changer insofar as it facilitates or impedes solutions to regional cooperation problems
