## **International Relations And Scientific Progress Structural Realism Reconsidered:**

**International Relations and Scientific Progress** Patrick James, 2002 International Relations and Scientific Progress contends that a theory focusing on the structure of the international system explains a wider and more interesting range of events in world politics than other theories. Such theorizing appears to be out of favor as the result of the apparent failure by structural realism, the most prominent system level theory over the last two decades, on any number of fronts, most notably an inability to anticipate the ending of the Cold War and its aftermath. This new book is put forward as the most comprehensive and innovative theoretical work on paradigms in international relations since the publication of *Theory of International Politics*, which created structural realism more than two decades ago. With appropriate revisions, however, structural realist theory can compete effectively and reclaim its primacy. The first part of *International Relations and Scientific Progress* assesses the meaning of progress in the discipline of international relations, a process that culminates in the creation of a new concept, the scientific research enterprise. The second part reviews structural realism within that context and identifies a lack of connection between theory and research that links power based indicators to international conflict, crisis, and war. This part of the book makes the case for an elaboration of structural realism by showing that a system level theory based on structure has great unrealized explanatory potential. By comparison, the current overwhelmingly research oriented agenda on state dyads imposes severe limitations on understanding that are not currently appreciated. Part Three sums up the work and explores new directions, most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system.

**Making Sense, Making Worlds** Nicholas Onuf, 2013-05-07 Nicholas Onuf is a leading scholar in international relations and introduced constructivism to international relations, coining the term constructivism in his book *World of Our Making* 1989. He was featured as one of twelve scholars featured in Iver B. Neumann and Ole Wæver eds *The Future of International Relations: Masters in the Making* 1996 and featured in Martin Griffiths, Steven C. Roach, and M. Scott Solomon *Fifty Key Thinkers in International Relations* 2nd ed 2009. This powerful collection of essays clarifies Onuf's approach to international relations and makes a decisive contribution to the debates in IR concerning theory. It embeds the theoretical project in the wider horizon of how we understand ourselves and the world. Onuf updates earlier themes and his general constructivist approach and develops some newer lines of research, such as the work on metaphors and the re-grounding in much more Aristotle than before. A complement to the author's groundbreaking book of 1989 *World of Our Making*, this tightly argued book draws extensively from philosophy and social theory to advance constructivism in International Relations. **Making Sense, Making Worlds** will be vital reading for students and scholars of international relations, international relations theory, social theory, and law.

**Understanding Near Crises and Escalation in World Politics** Steven E. Lobell, Patrick James, Scott A. Silverstone, Victor Asal, Kyle Beardsley, Edward Gonzalez, Norrin M. Ripsman, 2025-07-31 This book introduces the near crisis phase of conflict and escalation. These time sensitive disputes

between states and even with violent non state actors do not involve significant risk of military escalation at least in the moment Investigating how and why some near crises escalate while others do not requires an explanation of the different dynamics of international disputes and the policy tools that states and international institutions can employ We ask an expanded set of questions about specific cases and general patterns of conflict behavior such as why did Israeli leaders respond to Hezbollah's 2006 cross border raid with escalation resulting in the Second Lebanon War while in previous instances the Israelis limited their retaliation Why didn't the 2015 Iranian Ballistic Missile Test or the 1995 Norwegian Black Brant Missile Launch escalate while the 2009 North Korea Missile Movement and the 1995 Taiwan Straits dispute tipped into a full blown crisis and why did the 2008 Russia Georgia conflict escalate from near crisis to war We use primary sources and newly created data on near crises to answer these questions and others The overall conclusion is that an ounce of prevention at the near crisis phase is worth a pound of cure in averting a full blown crisis or war This book will be of great interest to students of security studies conflict studies foreign policy and international relations

Reframing the Social Professor Poe Yu-ze Wan, 2013-01-28 Drawing extensively on the research findings of natural and social sciences both in America and Europe *Reframing the Social* argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency Theoretically sophisticated and investigating the work of a theorist whose work has until now received insufficient attention in Anglo American thought this book will be of interest to those working in the field of social theory as well as scholars concerned with philosophy of social science the project of analytical sociology and the nature of the relationship between the natural and social sciences

**Neoclassical Realist Theory of**

**International Politics** Norrin M. Ripsman, Jeffrey W. Taliaferro, Steven E. Lobell, 2016-03-25 Since Gideon Rose's 1998 review article in the journal *World Politics* and especially following the release of Lobell Ripsman and Taliaferro's 2009 edited volume *Neoclassical Realism the State and Foreign Policy* neoclassical realism has emerged as major theoretical approach to the study of foreign policy on both sides of the Atlantic Proponents of neoclassical realism claim that it is the logical extension of the Kenneth Waltz's structural realism into the realm of foreign policy In *Neoclassical Realist Theory of International Relations* Norrin M Ripsman Jeffrey W Taliaferro and Steven E Lobell argue that neoclassical realism is far more than an extension of Waltz's structural realism or an effort to update the classical realism of Hans Morgenthau E H Carr and Henry Kissinger with the language of modern social science Rejecting the artificial distinction that Waltz draws between theories of international politics and theories of foreign policy the authors contend neoclassical realism can explain and predict phenomena ranging from short term crisis behavior to foreign policy to patterns of grand strategic adjustment by

individual states up to long term patterns of international outcomes It is therefore a more powerful theory of international politics than structural realism Yet it is also a more intuitively satisfying approach than liberal Innenpolitik theories or constructivism The authors detail the variables and assumptions of neoclassical realist theory address various aspects of theory construction and methodology lay out the areas of convergence and sharp disagreement with other leading theoretical approaches liberalism constructivism analytic eclecticism and foreign policy analysis FPA and demonstrate how neoclassical realist theory can be used to resolve longstanding puzzles and debates in international relations theory *Conflict, Crisis, and War in World Politics* Patrick James, James M. Scott, 2025-01-09 This topical textbook outlines conflict crisis and war as central challenges in the international security arena exploring their history evolution nature dynamics and trends Patrick James and James M Scott discuss the major approaches to analysing conflict crisis and war and identify the key avenues for managing them *What Moves Man* Annette Freyberg-Inan, 2012-02-01 The realist theory of international relations is based on a particularly gloomy set of assumptions about universal human motives Believing people to be essentially asocial selfish and untrustworthy realism counsels a politics of distrust and competition in the international arena What Moves Man subjects realism to a broad and deep critique Freyberg Inan argues first that realist psychology is incomplete and suffers from a pessimistic bias Second she explains how this bias systematically undermines both realist scholarship and efforts to promote international cooperation and peace Third she argues that realism's bias has a tendency to function as a self fulfilling prophecy it nurtures and promotes the very behaviors it assumes predominate human nature Freyberg Inan concludes by suggesting how a broader and more complex view of human motivation would deliver more complete explanations of international behavior reduce the risk of bias and better promote practical progress in the conduct of international affairs **Power, Realism and Constructivism** Stefano Guzzini, 2013 This book brings together Stefano Guzzini's research on power realism and constructivism framed by a new and substantial introductory chapter It explores the diversity of different schools and their intrinsic tensions and fallacies by analysing both theories and their assumptions and theorists following their intellectual paths **Theory and Metatheory in International Relations** F. Chernoff, 2007-10-15 This book uses three controversial contemporary American foreign policy problems to introduce students to the new debates in international relations in which the criticisms of constructivism interpretivism and postmodernism are presented against traditional positivist concepts of social science *The Conduct of Inquiry in International Relations*, *The Conduct of Inquiry in International Relations* Patrick Thaddeus Jackson, 2016-03-31 The Conduct of Inquiry in International Relations first edition was winner of the ISA Northeast's Yale H Ferguson Award and the ISA Theory Section's Best Book of the Year award The Conduct of Inquiry in International Relations provides an introduction to the philosophy of science issues and their implications for the study of global politics The author draws attention to the problems caused by the misleading notion of a single unified scientific method and proposes a framework that clarifies the variety of ways that IR scholars establish the

authority and validity of their empirical claims Jackson connects philosophical considerations with concrete issues of research design within neopositivist critical realist analyticist and reflexive approaches to the study of world politics Envisioning a pluralist science for a global IR field this volume organizes the significant differences between methodological stances so as to promote internal consistency public discussion and worldly insight as the hallmarks of any scientific study of world politics In this second edition Jackson has centralised the philosophical history of the science question into a single chapter providing a clearer picture of the connections between contemporary concerns about the status of knowledge and classic philosophical debates about the relationship between human beings and the world they inhabit The central chapters feature more detailed and pedagogically useful illustrations of the methodological positions discussed making the book even better suited to clarify the philosophical distinctions with respect to which a scientific researcher must locate herself The second edition will continue to be essential reading for all students and scholars of International Relations Political Science and Philosophy of Science

**International Relations** Bilal Karabulut, 2024-03-29 International Relations Theories Concepts and Organizations analyzes the changing dynamics of world politics on a rational scale It presents the conceptual and theoretical codes of International Relations IR to academics journalists politicians and thinkers In addition to concepts and theories intergovernmental and non governmental organizations NGOs that have an important place in IR are examined Under the influence of the globalization process radical changes are taking place in world politics Increasingly complex world politics is transforming into a multi layered structure This book has been prepared to make IR understandable and accessible clearly

*Advancing Interdisciplinary Approaches to International Relations* Steve A. Yetiv, Patrick James, 2016-11-24 This edited volume breaks new ground by innovatively drawing on multiple disciplines to enhance our understanding of international relations and conflict The expansion of knowledge across disciplines and the increasingly blurred boundaries in the real world both enable and demand thinking across intellectual borders While multidisciplinary and interdisciplinary are prominent buzz words remarkably few books advance them Yet doing so can sharpen and expand our perspective on academic and real world issues and problems This book offers the most comprehensive treatment to date and is an invaluable resource for students scholars and practitioners

**Neoclassical Realism, the State, and Foreign Policy** Steven E. Lobell, Norrin M. Ripsman, Jeffrey W. Taliaferro, 2009-01-15 Neoclassical realism is an important approach to international relations Focusing on the interaction of the international system and the internal dynamics of states neoclassical realism seeks to explain the grand strategies of individual states as opposed to recurrent patterns of international outcomes This book offers the first systematic survey of the neoclassical realist approach The editors lead a group of senior and emerging scholars in presenting a variety of neoclassical realist approaches to states grand strategies They examine the central role of the state and seek to explain why how and under what conditions the internal characteristics of states intervene between their leaders assessments of international threats and opportunities and the

actual diplomatic military and foreign economic policies those leaders are likely to pursue *The Realism Reader* Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism's engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism's engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism *Complex Deterrence* T. V. Paul, Patrick M. Morgan, James J.

Wirtz, 2009-09-15 As the costs of a preemptive foreign policy in Iraq have become clear strategies such as containment and deterrence have been gaining currency among policy makers This comprehensive book offers an agenda for the contemporary practice of deterrence especially as it applies to nuclear weapons in an increasingly heterogeneous global and political setting Moving beyond the precepts of traditional deterrence theory this groundbreaking volume offers insights for the use of deterrence in the modern world where policy makers may encounter irrational actors failed states religious zeal ambiguous power relationships and other situations where the traditional rules of statecraft do not apply A distinguished group of contributors here examines issues such as deterrence among the Great Powers the problems of regional and nonstate actors and actors armed with chemical biological and nuclear weapons Complex Deterrence will be a valuable resource for anyone facing the considerable challenge of fostering security and peace in the twenty first century

**International Organizations** Kelly-Kate S. Pease, 2015-07-22 Drawing on mainstream and critical theoretical approaches International Organizations offers a comprehensive examination of international organizations political and structural role in world politics This text details the types and activities of international organizations and provides students with the conceptual tools needed to evaluate their effectiveness Surveying key issue areas from international and human security to trade and the environment International Organizations looks at present and future possibilities for global governance from a broad range of perspectives New to the Fifth Edition The nexus between international law and international organizations is explored to show how they complement and influence each other Each issue chapter highlights

the relevant treaties norms and customs and interprets the impact of international law on the politics of the issue Not only does this book cover international and human security concerns but it now looks at the growing danger posed by the proliferation of weapons of mass destruction with special emphasis on the spread of nuclear weapon technology A new in depth case study on Iran explores Iran s quest for nuclear technology against the backdrop of its legal duties and obligations under Nuclear NonProliferation Treaty NPT The case also examines the role of the International Atomic Energy Agency IAEA in managing the use of nuclear technology and energy An updated analysis of global climate change is provided to explain the political outcomes of the 2009 Copenhagen Conference An exploration of international criminal law with special reference to the International Criminal Tribunal for the Former Yugoslavia ICTY and the International Criminal Court ICC Every chapter includes the most recent political events scholarship and data especially as it relates to the impact of the global financial crisis on trade and development

*Irrational Human Rights? An Examination of International Human Rights Treaties* Naiade el-Khoury,2020-12-15 In *Irrational Human Rights An Examination of International Human Rights Treaties* Naiade el Khoury pursues the question how effective international human rights treaties really are and offers a discussion on the effects of treaty mechanisms Such an examination as to the effects of international human rights treaties or rather their limits puts prevalent views of international law to the test In doing so this book convincingly argues that rational theories are inadequate to grasp the full effect of international human rights treaties

**Groupthink Versus High-Quality Decision Making in International Relations** Mark Schafer,Scott Crichlow,2010-04-22 Are good and bad outcomes significantly affected by the decision making process itself Indeed they are in that certain decision making techniques and practices limit the ability of policymakers to achieve their goals and advance the national interest The success of policy often turns on the quality of the decision making process Mark Schafer and Scott Crichlow identify the factors that contribute to good and bad policymaking such as the personalities of political leaders the structure of decision making groups and the nature of the exchange between participating individuals Analyzing thirty nine foreign policy cases across nine administrations and incorporating both statistical analyses and case studies including a detailed examination of the decision to invade Iraq in 2003 the authors pinpoint the factors that are likely to lead to successful or failed decision making and they suggest ways to improve the process Schafer and Crichlow show how the staffing of key offices and the structure of central decision making bodies determine the path of an administration even before topics are introduced Additionally they link the psychological characteristics of leaders to the quality of their decision processing There is no greater work available on understanding and improving the dynamics of contemporary decision making

**Christian Approaches to International Affairs** J. Troy,2012-08-21 Troy analyses how the understanding of religion in Realism and the English School helps in working towards the greater good in international relations studying religion within the overall framework of international affairs and the field of peace studies
