*International Law and International Relations* J. Craig Barker, 2000-12-01 The disciplines of international law and international relations are inextricably linked. Both are concerned with the activities of states and with predicting how states behave and on what basis. For the international lawyer however the key concern is the role of the law. On the other hand political scientists have traditionally regarded international law with skepticism if not contempt. In recent years new approaches in both disciplines have seen moves towards greater interdisciplinary collaboration. Indeed at the start of the twenty first century theorists from both disciplines are talking actively about the development of a dual agenda of international law and international relations. This means that students of international relations need increasingly to be familiar with the terminology and methodology of international law. This essential introductory text examines the key concepts in international law with a view to illuminating them in the context of international relations. The first part of the book provides coverage of theoretical issues addressing questions such as How does international law work? How is international law made and To whom does international law apply? The second part examines international law in context focusing on the role of treaties and customary international law the role of individuals in international law and the legal control of the use of force. It also uses case study material including an examination of the

**Peace and War** Raymond Aron, 2003 Peace and War by Raymond Aron is one of the greatest books ever written on international relations Aron's starting point is the state of nature that exists between nations a condition that differs essentially from the civil state that holds within political communities Ever keeping this brute fact about the life of nations in mind and ranging widely over political history and many disciplines Aron develops the essential analytical tools to enable us to think clearly about the stakes and possibilities of international relations In his first section Theory Aron shows that while international relations can be mapped and probabilities discerned no closed global science of international relations is anything more than a mirage In the second part Sociology Aron studies the many ways various subpolitical forces influence foreign policy He emphasizes that no rigorous determinism is at work politics and thus the need for prudent statesmanship are inescapable in international relations In part three History Aron offers a magisterial survey of the twentieth century He looks at key developments that have had an impact on foreign policy and the emergence of what he calls universal history which brings far flung peoples into regular contact for the first time In a final section Praxeology Aron articulates a normative theory of international relations that rejects both the bleak vision of the Machiavellians who hold that any means are legitimate and the naiveté of the idealists who think foreign policy can be overcome This new edition of Peace and War includes an informative introduction by Daniel J Mahoney and Brian C Anderson situating Aron's thought in a new post Cold War context and evaluating his contribution to the study of politics and international relations
