**Reframing the Leadership Landscape** Roger Hayes, Reginald Watts, 2016-03-03 In an uncertain and complex world leaders should not merely respond to the speed of change but attempt to anticipate it Sometimes it is unexpected sometimes the signs are there but the dots are not joined together The NEW normal must be navigated negotiated networked and a narrative built around it Leaders need to adapt to a changing ecosystem in which the biggest challenges cross the boundaries of the public private and non profit sectors requiring much closer collaboration Aggressive individualism is no longer a sustainable basis for companies needing to deliver social and economic value now enterprises must move beyond narrow self interest and short termism to balance stakeholder expectations In Reframing the Leadership Landscape Dr Roger Hayes and Dr Reginald Watts argue that the interconnected and interdependent world requires leaders to adopt a more holistic and inclusive approach Despite global business education advances business mostly fails to make cross disciplinary connections or interpret weak signals and is ill prepared for changes in cultural and technical demands The tool kit is here ready to be unpacked The only question is whether aspirant leaders are sensitive enough to read the signals and develop the skills needed to create an essential collaborative paradigm which they must do if they wish to regain trust fill the leadership void and help reshape a sustainable future

**The Shipping Industry, Ocean Governance and Environmental Law in the Paradigm Shift** Tafsir Johansson, Patrick Donner, 2014-11-21 This book examines the corpus of status quo environmental legal regime geographical issues and redundant stakeholder claims which persist in the Arctic It examines multifarious theories relating not only to conflicting and opposing interests but also to parties to whom the shipping industry should be accountable The unique aspect of this book is the Corporate Social responsibility analysis pertaining to the Arctic and alternatives that strike a balance between the increased commercialization of the shipping industry and the laws and concepts of ocean governance The book relevantly puts forward the concept of ocean governance and to what extent it can be addressed in terms of the Arctic What distinguishes this book from others is the fact that it is not limited to examining the effects of climate change and how it is

reshaping the way scholars assume the Arctic will be in the near future Rather it creates a transparent nexus between opposing claims and increasing commercial interests and proceeds to scrutinize the efforts of the Arctic Council and individual Arctic coastal states In this context the book follows a given equation based on initial theories and how the opposing claims and increasing commercialization side of the equation can be balanced with the appropriate legal norm It also reflects on the critical aspects of hard law and soft law which are two opposite ends of the legal pole and core elements of any legal spectrum The book after reflecting on those two elements finally proposes a new Arctic legal regime which is intricate and detailed and is basically a hierarchy based on logic and reasoning In doing so it imports a pristine theory for a pristine territory     Stakeholder Analysis and Sport Organisations Anna-Maria Strittmatter,Josef Fahlén,Barrie

**The Synergy of Business Theory and Practice** Alkis Thrassou, Demetris Vrontis, Yaakov Weber, S. M. Riad Shams, Evangelos Tsoukatos, 2019-08-07 The lack of congruence between theory and practice in business remains a widely discussed topic. This lack of synergy is quietly and elusively becoming the Achilles heel of contemporary scholarly business research and by extension of business in general. Focusing on the deviation of means and ends between business theory and practice, this book comprises thirteen chapters which present an array of theoretical and geographical contexts and aim to bring scholarly thinking and scientific analysis together with managerial rationale and practical applications. Presenting valuable insights and demonstrating an equalised perception of the theorisation of practice and reversely the practicality of theory, this innovative book signifies a new philosophy of scientific work and provides thought provoking reading for scholars in a range of business sub disciplines.

Authored by leading experts, this book serves as a vital resource for anyone concerned about the future of our oceans and the sustainability of seafood production. We delve into the urgent need to balance the economic interests of fishing communities with preserving marine ecosystems for future generations, addressing challenges like overfishing, habitat destruction, bycatch and climate change impacts. Through case studies and analyses, we illustrate how

unsustainable fishing practices endanger fish populations and the livelihoods of millions. Emphasizing the interconnectedness of local, national, and global efforts, we highlight successful initiatives requiring collaboration among stakeholders: governments, NGOs, fishing communities, and consumers. We showcase innovative approaches from countries like Norway, Iceland, the United States, and Australia, including science-based quotas, marine protected areas, and eco-certification schemes. Adopting a holistic perspective, we consider the biological, social, economic, and cultural dimensions of fishing communities, advocating for equity and inclusivity in decision-making. The book also explores technology and innovation's role in enhancing fisheries sustainability, from satellite monitoring to alternative fishing gear. With practical recommendations for policymakers, industry leaders, and consumers, we call for stronger regulation, enforcement, ecosystem-based management, and consumer awareness campaigns.

Business Ethics in Africa, Volume I Silk Ugwu Ogbu, Rose Ogbechie, 2024-10-18. There is a false assumption that the systemic corruption that exists in significant parts of sub-Saharan Africa is crippling enough to dominate any discussion of business ethics in the region. However, African companies that engage in positive ethical practices are more successful at creating value for society and remaining socially relevant in the long run, which improves their economic outlook. This edited two-volume collection contributes to the growing discussion of business ethics and doing business in Africa. It offers invaluable insights into practical ways of integrating ethics with business operations to enhance corporate values, responsibility, and profitability. This first volume interrogates the intricate relationship between business success, ethics, and stakeholders, well-being, within the nuances and evolving shifts that underpin business in Africa. It restates the significance of business ethics in Africa by providing necessary contexts to the global conversation on integrating business performance with ethical obligations, social responsibilities, and sustainability principles. The ideas espoused in the chapters and recommendations offered therein aim to guide academics and practitioners towards finding solutions to the ethical challenges they face in their fields of practice or daily interactions in and out of the workplace. Illuminating key concepts and theories with the help of detailed case studies, this collection will be of great use to scholars and students of business ethics, as well as practitioners and policymakers interested in or working in Africa.
