**International Trade in Hazardous Wastes** D.K. Asante-Duah,I.V. Nagy,1998-03-12 This book discusses the need for a regulated and informed forum for international trade in hazardous waste The authors argue that with careful planning health and ecological risks can be minimized and net economic benefits realized fairly *Pills, Pesticides & Profits* Ruth Norris,A. Karim Ahmed,1982 Abstract This book discusses the international trade in toxic substances specifically pesticides pharmaceuticals and hazardous wastes Abuses exploitation of uniformed consumers and the double standard that says products considered unsafe for use in the industrialized world may be promoted and sold freely in the developing nations are discussed Attempts to purchase rights to dump hazardous waste in third world countries and the marketing practices of infant formula manufacturers in third world countries are also examined **International Trade in Recyclable and**

**Hazardous Waste in Asia** Michikazu Kojima,Etsuyo Michida,2013-09-30 Little is known about the volume of international recycling in Asia the problems caused and the struggle to properly manage the trade This pathbreaking book addresses this gap in the literature and provides a comprehensive overview of the internatio *International Trade in Hazardous Wastes*

Kamala Rajamani,1995 International Trade and the Basel Convention Jonathan Krueger,1999 The authors analyzes the development and operation of the Basel convention on the control of transboundary movements of hazardous wastes and its interrelationship with the multilateral trading system **International Trade in Hazardous Waste** Jen Baggs,2013 This

paper combines a gravity model with country characteristics to examine trade in hazardous waste A significant pollution haven effect is observed as rising per capita income reduces the amount of hazardous waste countries import However this effect is outweighed by high income countries relative capital abundance and by rising GDP creating larger increases in disposal capacity than waste production Simulating the volume and direction of hazardous waste trade in the absence of distance costs leads to a 153% increase in waste traded and a larger increase in shipments from non OECD countries to OECD members than from the OECD to nonmembers *International Trade in Hazardous Waste* Paweł Kaźmierczyk,1995

*Toxic Exports* Jennifer Clapp,2001 Clapp comparative development studies and environment and resource studies Trent U examines the transfer of hazardous wastes and technologies from rich to poor countries focusing on the forces that contribute to that transfer as well as the political responses to it c Book News Inc **International and Domestic**

**Environmental Regulation** Katherine Melinda O'Neill,1998 **Solid and Hazardous Waste Services: An Examination of U.S. and Foreign Markets, Inv. 332-455** , *Transboundary Movements of Hazardous Wastes at the Interface of*

*Environment and Trade* Katharina Kummer,United Nations Environment Programme,1994 In 1989 environmental concerns led to the adoption of the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes their Disposal This publication outlines some of the facts about the international hazardous waste trade addressing the issue in the context of sustainable industrial activity in all countries It also discusses the Basel Convention looks at some aspects of the

reconciliation of environmental trade objectives in the regulation of the international hazardous waste trade

**Waste Trading among Rich Nations** Kate O'Neill, 2000-06-19 When most people think of hazardous waste trading they think of egregious dumping by U S and European firms on poor countries in Africa Latin America and the Caribbean But over 80 percent of the waste trade takes place between industrialized nations and is legal by domestic and international standards In **Waste Trading among Rich Nations** Kate O'Neill asks why some industrialized nations voluntarily import such wastes in the absence of pressing economic need She focuses on Britain as an importer and Germany as an exporter and also looks at France Australia and Japan According to O'Neill most important in determining whether an industrialized democracy imports waste are two aspects of its regulatory system The first is the structure of the regulatory process how powers and responsibilities are allocated among different agencies and levels of government and the structure of the hazardous waste disposal industry The second is what O'Neill calls the style of environmental regulation in particular access to the policy process and mode of implementation Hazardous waste management is in crisis in most industrialized countries and is becoming increasingly controversial in international negotiations O'Neill not only examines waste trading empirically but also develops a theoretical model of comparative regulation that can be used to establish links between domestic and international environmental politics

**Overcoming National Barriers to International Waste Trade: A New Perspective on the Transnational Movement of Hazardous and Radioactive Wastes** Elli Louka, 1994-09 The international trade in hazardous and radioactive waste to developing countries with inadequate infrastructure and lenient environmental laws has grown during recent decades and has been the target of public opposition in both developed and developing countries This book contains a comprehensive analysis of the pertinent international legislation as well as a comparative analysis of the European and the United States legislation and policies

**Trade Justice** James Christensen, 2017 This book examines socioeconomic justice and international trade from the perspective of analytic political theory

**Exporting Waste** Jeffrey M. Gaba, 2012 The international trade in hazardous wastes has been a subject of controversy for decades Notorious examples of hazardous wastes being improperly disposed of in Africa have created concern about the legitimacy of developed western countries dumping the hazardous byproducts of their industrial development on less developed countries This article examines the legal bases for EPA's regulation of the exports of hazardous waste under the Resource Conservation and Recovery Act It contains a detailed examination of EPA's complex sets of export regulations and provides data on the actual scope of exports reported to EPA It examines a series of questions regarding EPA's authority to regulate the export of hazardous wastes what domestic authority does EPA derive from the international agreements what is the scope of EPA's authority to exclude

hazardous wastes from export control what authority does EPA have to ban the export of hazardous wastes to countries with whom we do not have an international agreement and which may not manage the waste properly The article also examines the extent to which EPA regulations address the significant concerns associated with the largely unregulated export of electronic wastes The article reaches a number of perhaps surprising conclusions First the article suggests that provisions of RCRA that purport to give domestic legal effect to future international agreements would violate constitutional procedures required to implement actions with legislative effect It also analyzes case law that suggests that conferring binding authority on a Decision of the OECD would constitute an unconstitutional delegation of authority to an international entity Second the article questions the legal basis of the U S decision not to ratify the Basel Convention on the Transboundary Movement of Hazardous Waste Although the U S has signed and the Senate has consented to ratification the U S has not formally ratified the Convention based on the position of the Department of State and EPA that Basel cannot be implemented without statutory changes to RCRA This article suggests that RCRA currently contains adequate authority to implement Basel and thus ratification could be immediately undertaken The article argues however that control of the international trade in U S hazardous waste may be better served by the U S not ratifying Basel Third there may be a substantial misperception fostered by EPA about the regulation of electronic wastes under RCRA EPA has suggested that only waste cathode ray tubes are a hazardous waste under RCRA but EPA s own data suggest that a substantial amount of other e wastes should be classified as hazardous wastes and thus subject to export controls Perhaps the most significant step EPA could take to strengthen its existing export regulations would be to clarify the status of such e wastes Fourth EPA does have the authority under RCRA to impose export controls on hazardous wastes that it has excluded from domestic regulation Thus EPA could regulate the export of e wastes while not imposing requirements on the domestic recycling of such wastes Finally EPA s management of the export of hazardous waste would be improved by providing more transparency through online posting of export data Concerns about releasing confidential business information do not stand as a significant obstacle to providing this information

**The Economics of the International Trade of Waste** Derek Kellenberg,2015 International trade in hazardous and nonhazardous waste and scrap products has been growing at an exceptional rate the past two decades This review presents current data on the magnitude and trends regarding this growth and discusses the recent literature as it pertains to the economic incentives and drivers of international waste trade Differences in environmental policy taxes disposal fees and transport costs are important determinants across countries However the illegal nature of many types of hazardous waste also means that organized crime may play a role in some countries Gaps in our understanding regarding microeconomic incentives as they relate to upstream and downstream recyclers and to the social welfare implications for wages environmental quality and human health are also discussed
