International Relations At Lse:

International Relations at LSE Harry Bauer, Elisabetta Brighi, 2003 This book provides an insight into the Department's early and recent history, discusses the legacy and achievements of some of its outstanding figures and invites sustained reflection on the mission underlying this institution. With no pretence of exhaustiveness, this collection of essays combines memory and analysis to sketch out experiences, interpretations and direction of this collective enterprise. **BACK COVER**

The Architects of International Relations Jan Stöckmann, 2022-03-03 Based on extensive archival research, this book provides a new and stimulating history of International Relations (IR) as an academic discipline. Contrary to traditional accounts, it argues that IR was not invented by Anglo-American men after the First World War. Nor was it divided into neat theoretical camps. To appreciate the twists and turns of early IR scholarship, the book follows a diverse group of men and women from across Europe and beyond who pioneered the field since 1914. Like architects, they built a set of institutions: university departments, journals, libraries, etc. but they also designed plans for a new world order: draft treaties, petitions, political commentary, etc. To achieve these goals, they interacted closely with the League of Nations and its bodies for intellectual cooperation until the Second World War put an end to their endeavour. Their story raises broader questions about the status of IR well beyond the inter-war period. The Story of International Relations, Part One Jo-Anne

Pemberton, 2019-09-09 This book is the first volume in a trilogy that traces the development of the academic subject of International Relations or what was often referred to in the interwar years as International Studies. This first volume takes on the origins of International Relations, beginning with the League of Nations and the International Studies Conference in Berlin in 1928 and tracing its development through the Paris Peace Conference, the quest for cooperation in the Pacific, the Institute of Pacific Relations and lessons from Copenhagen, Shanghai and Manchuria. This project is an impressive and exhaustive consideration of the evolution of IR and is aptly published in celebration of the discipline's centenary. **Political**

Science at the LSE Cheryl Schonhardt-Bailey, Gordon Bannerman, 2021-09-13 This monograph traces the emergence and evolution of the LSE Government Department from 1895 to 2020, focusing on the personalities that guided the development of the Department, the social and political contexts, the Department's research agenda and course structure, and the location of the Department in British politics. It also charts the evolution of the discipline of political science in Britain itself. The volume is divided chronologically into four chapters, each covering roughly similar time periods in the Department's history and focuses on the events that shaped it: personalities, events, and location. Key themes are the development of political science in Britain, the impact of location on the LSE Government Department, the professionalisation of academia in Britain, and the microcosm the Department presents of British political life during each time period. The conflicts between progressive and conservative forces are a recurring theme which helps link the internal dynamics of the Department with the wider social and political contexts that occurred from the beginning of the School to its 125th anniversary. The volume uses

detailed archival research particularly in the early chapters as well as over thirty interviews with a range of individuals with unique perspectives on the Department These include current and former faculty and students ranging from academics such as Christopher Hood Anne Phillips and Tony Travers to graduates who have subsequently become politicians such as Anneliese Dodds former UK Shadow Chancellor of the Exchequer and Kennedy Stewart and Michael Fougere both mayors in Canada as well as others with strong links to the Department such as Meghnad Baron Desai and Professors Tim Besley and Nick Barr This monograph offers a wealth of insights on the history of political science not only at the LSE but in British academia more broadly It speaks to a wide historical and social science audience concerned with Fabian and socialist history the history of politics and education and the development of British political science Of course it also offers appeal to more immediate audiences such as prospective and current students alumni and others throughout the wider LSE community As a history of the LSE as well as of the development of British higher education it serves as both a specific case study and a general representative of wider trends within universities during the twentieth and early twentieth first centuries A unique feature of this monograph is that it represents the collective efforts of students from the LSE Government Department including undergraduate MSc and PhD who worked under the leadership of Professor Cheryl Schonhardt Bailey Head of Government Department and Dr Gordon Bannerman British Historian This collaboration has enabled a rich array of perspectives on the history of the Department but has also brought the monograph to life with personal ties to the Department itself
