Conflict Between India and Pakistan Peter Lyon,2008-10-02 This up to date encyclopedia examines the conflict between India and Pakistan from Independence to the present day with an authoritative treatment that presents the issues evenhandedly and from both countries perspectives Tensions between India and Pakistan are deeply

rooted Many go back to 1947 or earlier when with the partitioning of the provinces of Punjab and Bengal British India was succeeded by two independent countries a primarily Hindu India and a Muslim Pakistan Subsequently the two countries have fought three wars and come close to open war several other times especially over Kashmir Conflict Between India and Pakistan begins with a discussion of the partition of India and those who figured prominently in it notably Mohammed Ali Jinnah Clem Attlee the last viceroy Admiral Louis Mountbatten and Jawaharlal Nehru Then in a series of evenhanded carefully crafted portraits it describes the people political parties foreign and domestic policies and economic religious and cultural pressures that have played a role in the conflicts between these nations from 1947 to the present Connections and Complexity Shinu Anna Abraham, Praveena Gullapalli, Teresa P Raczek, Uzma Z Rizvi, 2016-06-16 This compilation of original research articles highlight the important cross regional cross chronological and comparative approaches to political and economic landscapes in ancient South Asia and its neighbors Focusing on the Indus Valley period and Iron Age India this volume incorporates new research in South Asia within the broader universe of archaeological scholarship Contributions focus on four major themes reinterpreting material culture identifying domains and regional boundaries articulating complexity and modeling interregional interaction These studies develop theoretical models that may be applicable researchers studying cultural complexity elsewhere in the world **The Harappan Civilization and Its Writing** Walter Ashlin Fairervis, 1992 The Book Demonstrates That The Harappan Script Is Well On Its Way To Decipherment **The Indus River** Azra Meadows, P. S. Meadows, 1999 The Indus River is one of the world s greatest rivers extending from the Himalayas to the Arabian Sea It has a unique range of geographical and geological features among them mountains plains and deltas The river and its surrounding lands affect the living standards of the entire population of Pakistan In fact recent economic developments such as agriculture forests fisheries oil gas and hydroelectricity are all dependent on the river However problems such as deforestation waterlogging pollution and desertification will no doubt affect the river as they continue to grow in magnitude around the world This book looks at the interaction between the Indus River and its landscape biodiversity resources and people as well as its future World authorities recommend interdisciplinary programs for management conservation and future development of this unique water system and important resources This book is essential reading for all those involved in environmental studies and geography Languages of the Himalayas George van Driem, 2022-09-12 The survey work Languages of the Himalayas provides a bird s eye view of Himalayan languages and language communities It also constitutes a primary source for much new hitherto unpublished data on several languages The demographic mosaic of the Himalayas today is viewed in a historical and comparative linguistic perspective The reader will find an outline of the historical and prehistorical developments that have determined the modern ethnolinguistic composition of the Himalayan region involving various independent linguistics stocks or language families Maps illustrate the distribution of language communities and trace the routes of ancient migrations There is an illuminating discussion of grammatical

features found in Himalayan languages The print edition is available as a set of two volumes 9789004103900 Forest Hydrology Mingteh Chang,2012-11-01 Due to its height density and thickness of crown canopy fluffy forest floor large root system and horizontal distribution forest is the most distinguished type of vegetation on the earth In the U S forests occupy about 30 percent of the total territory Yet this 30 percent of land area produces about 60 percent of total surface runoff the

Early Civilizations of the Old World Charles Keith Maisels,2003-12-16 Tracing the development of some of the earliest and key civilizations in history Early Civilisations of the Old World explains how particular forms of social structure and cultural interaction developed from before the Neolithic period **Evolution of Sanitation and Wastewater**

Technologies through the Centuries Andreas N. Angelakis,Joan B. Rose,2014-09-14 Most of the technological developments relevant to water supply and wastewater date back to more than to five thousand years ago These developments were driven by the necessity to make efficient use of natural resources to make civilizations more resistant to destructive natural elements and to improve the standards of life both at public and private level Rapid technological progress in the 20th century created a disregard for past sanitation and wastewater and stormwater technologies that were considered to be far behind the present ones A great deal of unresolved problems in the developing world related to the wastewater management principles such as the decentralization of the processes the durability of the water projects the cost effectiveness and sustainability issues such as protection from floods and droughts were intensified to an unprecedented degree New problems have arisen such as the contamination of surface and groundwater Naturally intensification of unresolved problems has led to the reconsideration of successful past achievements This retrospective view based on archaeological historical and technical evidence has shown two things the similarity of physicochemical and biological principles with the present ones and the advanced level of wastewater engineering and management practices Evolution of Sanitation and Wastewater Technologies through the Centuries presents and discusses the major achievements in the scientific fields of sanitation and hygienic water use systems throughout the millennia and compares the water technological developments in several civilizations It provides valuable insights into ancient wastewater and stormwater management technologies with their apparent characteristics of durability adaptability to the environment and sustainability These technologies are the underpinning of modern achievements in sanitary engineering and wastewater management practices It is the best proof that the past is the key for the future Evolution of Sanitation and Wastewater Technologies through the Centuries is a textbook for undergraduate and graduate courses of Water Resources Civil Engineering Hydraulics Ancient History Archaeology Environmental Management and is also a valuable resource for all researchers in the these fields Authors Andreas N Angelakis Institute of Iraklion Iraklion Greece and Joan B Rose Michigan State University East Lansing MI USA Cattle and People Catarina Ginja,Elizabeth Wright,2022-05-01 This volume originates in a conference session that took place at the 2018 International Council of Archaeozoology conference in Ankara Turkey entitled Humans and Cattle

Interdisciplinary Perspectives to an Ancient Relationship The aim of the session was to bring together zooarchaeologists and their colleagues from various other research fields working on human cattle interactions over time The contributions in this volume reflect well the breadth of work being undertaken on the ancient relationship between humans and cattle across the continents of Europe Africa and Asia and from the late Pleistocene to postmedieval period Almost all involve the study of archaeological cattle remains and use different zooarchaeological methods but the combination of these approaches with that of ethnography isotopes and genetics is also featured Author Interview **Cities and Citadels** Adam S. Green,Toby C. Wilkinson,Darryl Wilkinson,Nancy Highcock,Thomas Leppard,2023-12-19 Cities and Citadels provides an urgent update of archaeology's engagement with economic theory Recent events have forced a major reassessment of economic thinking In the wake of the 2008 Great Recession and the economic impact of the COVID 19 Pandemic the world finds itself in unprecedented times Even though archaeology typically concerns itself with the remote past it must also help us understand how we got to where we are today This book takes up the challenging new theories of scholars like Thomas Piketty Mariana Mazzucato and David Graeber and explores their importance for the study of human economies in ancient and prehistoric contexts Drawing on case studies from the Neolithic to the Classical Era and spanning the globe the authors put forward a new narrative of economic change that is relevant to the 21st century This book speaks to the study of economics in all ancient societies and is suitable for researchers of archaeology economics economic history and all related disciplines
