Specht, Reinhard Stock, 2012-12-06 From the Editors Preface Quark Matter 1987 was attended by about 250 scientists representing 75 research institutions around the world the scientific community engaged in experimental and theoretical studies of high energy nuclear collisions The central theme of the meeting was the possibility of achieving extreme energy densities in extended systems of strongly interacting matter with the ultimate aim of creating in the laboratory a deconfined state of matter a state in which quarks and gluons attain the active degrees of freedom High energy accelerator beams and cosmic radiation projectiles provide the experimental tools for this endeavour on the theoretical side it is intimately connected to recent developments in the non perturbative study of quantum chromodynamics Phase transitions between hadronic matter and quark gluon plasma are of basic interest also for our understanding of the dynamics of the early universe A very special feature of this Sixth Quark Matter Conference was the advent of the first experimental results from dedicated accelerator studies These were conducted

during 1986-87 at the AGS of Brookhaven National Laboratory and at the CERN SPS. An intense discussion of these data formed the main activity of the meeting. **International Symposium on Strangeness in Quark Matter 1998, Padua on July 20-24, 1998** Maurizio Morando, 1999 **SQM2008 : International Conference on Strangeness in Quark Matter ; [held from 5 - 10 October 2008 at the Tsinghua University campus, Beijing, China]** International Conference on Strangeness in Quark Matter, 2009 **Papers from the International Symposium on Strangeness in Quark Matter, Santorini, Greece, 14-18 April 1997**, 1997 **Strange Quark Matter in Physics and Astrophysics** Jes Madsen, Paweł Haensel, 1991 **Quark Matter '84** K.
