International Trade Anita Maček, 2017-02-01 Based on previous observations there is no doubt that trade enhanced economic growth This is especially valid in regard to international trade as it can help or hinder entire regions thus adding to the issue of international security In this book we tried to collect texts that would not repeat known facts on international trade but would rather discuss special issues Furthermore we also wanted to bring regional perspectives Therefore this book is organized into two sections Selected Perspectives on International Trade and Regional Specific Issues of International Trade

World Trade Law after Neoliberalism Andrew Lang, 2013-01-17 The rise of economic liberalism in the latter stages of the 20th century coincided with a fundamental transformation of international economic governance especially through the law of the World Trade Organization In this book Andrew Lang provides a new account of this transformation and considers its enduring implications for international law Against the commonly held idea that neoliberal policy prescriptions were encoded into WTO law Lang argues that the last decades of the 20th century saw a reinvention of the international trade regime and a reconstitution of its internal structures of knowledge In addition the book explores the way that resistance to economic liberalism was expressed and articulated over the same period in other areas of international law most prominently international human rights law It considers the promise and limitations of this form of inter regime contestation arguing that measures to ensure greater collaboration and cooperation between regimes may fail in their

objectives if they are not accompanied by a simultaneous destabilization of each regime's structures of knowledge and characteristic features. With that in mind, the book contributes to a full and productive contestation of the nature and purpose of global economic governance. Sustainable Development, Global Trade and Social Rights Adalberto Perulli, Tiziano Treu, 2016-04-24. Three major fields of international law: trade, the environment, and human rights have become inextricably intertwined in today's world. A practitioner, policymaker, businessperson, or academic involved in any one of these fields must now be conversant with the other two. This groundbreaking book considers the crucial elements of this complex engagement with eleven authoritative discussions by some of the most important and widely renowned professors of labor, commercial, and international law and experts from the International Labour Organization and the International Society for Labour and Social Security Law. Focusing primarily on the social pillar of sustainability, the authors cover such critical issues as the following: the creeping de-globalization manifested by Brexit and US protectionist policies; new and renegotiated multilateral mega-treaties; prospects for effectively codifying social responsibilities of multinational corporations; nexus of economic comparative advantage and excessive exploitation of natural resources; weak or non-existent enforcement of labor clauses in trade agreements; assessing and managing environmental and social risk in project finance and stabilization clauses in state investor agreements. An analysis of MERCOSUR serves as a revealing insight into the differences between trade agreements concluded among developing countries and those concluded among developed countries. A much-needed probing of the future of global trade in the light of a resurgence of economic nationalisms. This book takes a giant step towards a new consensus and cohesion phase in the international community where development policies, international business transactions, and social and environmental sustainability coexist harmoniously. It will be welcomed by practitioners, academics, and researchers in trade law, environmental law, and labor law, as well as by policymakers and businesspersons concerned with how these legal fields interact with economic justice. *Community Interests Across International Law* Eyal Benvenisti, Georg Nolte, Keren Yalin-Mor, 2018. To what extent are states expected to take into account the interests of others when conducting relations with other states? This is the question examined by this book as it considers the various manifestations of what has been described as community interests in areas regulated by international law. **National Trade Estimate ... Report on Foreign Trade Barriers** United States. Office of the U.S. Trade Representative, *Causation in the Law of the World Trade Organization* Catherine Gascoigne, 2023-09-14. Proposes an alternative methodology for determining causation in WTO law by drawing on causal philosophy and econometric analysis.
