Internationalization Of Human Rights:

Human Rights in International Relations David P. Forsythe, 2006-05-01 This new edition of David Forsythe's successful textbook provides an authoritative overview of the place of human rights in international politics in an age of terrorism. The book focuses on four central themes: the resilience of human rights norms, the importance of soft law, the key role of non-governmental organizations, and the changing nature of state sovereignty. Human rights standards are examined according to global, regional, and national levels of analysis, with a separate chapter dedicated to transnational corporations. This second edition has been updated to reflect recent events, notably the creation of the ICC and events in Iraq and Guantanamo Bay, and new sections have been added on subjects such as the correlation between world conditions and the fate of universal human rights. Containing chapter-by-chapter guides to further reading and discussion questions, this book will be of interest to undergraduate and graduate students of human rights and their teachers. David Forsythe received the Distinguished Scholar Award for 2007 from the Human Rights Section of the American Political Science Association. *The*

Evolution of the Doctrine and Practice of Humanitarian Intervention Francis Kofi Abiew, 1999-03-25 The topic of humanitarian intervention has become increasingly significant since the end of the Cold War. Despite a substantial body of literature on the subject in the past, recent developments justify a contemporary study of the subject. This book is not only timely given the crises which have occasioned United Nations interventions over the past several years, but enduring as international political structures undergo stress and reform, and as international law and international relations theorists grapple with the sovereignty intervention problem. It defends the emergence of a right of humanitarian intervention and argues that state sovereignty is not incompatible with humanitarian intervention. After a thorough review of historical precedents, the book concludes by assessing contemporary developments in terms of sources of support for intervention on humanitarian grounds.

Bradlow,David B. Hunter,2010-01-01 The fundamental recognition in this book is that the issue of what international legal

principles are applicable to the operations of the IFIs is an important topic that would benefit from more rigorous study. Twelve deeply committed contributors whose work spans the academic policy and activist spectrum suggest that a better understanding of these legal issues could help both the organizations and their Member States structure their transactions in ways that are more compatible with their developmental objectives and their international responsibilities.

Internationalizing Human Rights and Humanizing International Law David A. Johnson, 1990 The Interpretation of International Law by Domestic Courts Helmut Philipp Aust, Georg Nolte, 2016-01-22

The Interpretation of International Law by Domestic Courts assesses the growing role of domestic courts in the interpretation of international law. It asks whether and if so to what extent domestic courts make use of the international rules of interpretation set forth in the Vienna Convention on the Law of Treaties. Given the expectation that rules of international law are to have a uniform interpretation and application throughout the world, the practice of domestic courts is considerably more diverse. The contributions to this book analyse three key questions: first, whether international law requires a coherent interpretive approach by domestic courts; second, whether a common or convergent methodological outlook can be found in domestic court practice; third, whether a common interpretive approach is desirable from a normative perspective. The book identifies a considerable tension between international law's ambition for universal and uniform application and a plurality of different approaches. This tension between unity and diversity is analysed by a group of leading international lawyers from a wide range of geographical disciplinary and methodological approaches. Drawing on domestic practice of number of jurisdictions including among others Colombia, France, Japan, India, Israel, Mexico, South Africa, the United Kingdom and the United States, the book puts the interpretative practice of domestic courts in a wider context. Its chapters offer doctrinal, practical as well as theoretical perspectives on a central question for international law.

Perspectives on International Law Nandasiri Jasentuliyana, 2023-10-09

In the spirit of the 50th anniversary of the United Nations and the United Nations Decade of International Law, the contributors to Perspectives on International Law honour with this legal treatise a devoted friend of the United Nations and international law, Judge Manfred Lachs, a noted judge, diplomat, humanist and above all teacher. The work includes a variety of perspectives on international law relating to what were Judge Lachs's four main areas of interest: the theory and practice of international law, the United Nations, the World Court and space law. The book meets the need for a reference work covering selected subject areas and providing different perspectives on some of the key issues of current concern. Many eminent experts in various fields related to international law, including Judges of the International Court of Justice, diplomats and professors of law, most of whom knew Judge Lachs personally, have contributed.

Each chapter has been prepared specifically for the book. The contributors represent all political, legal and cultural regions of the world and provide a range of backgrounds and viewpoints offering a variety of new ideas for strengthening international law based on their assessment of the lessons of the past. Research Handbook on Fundamental Concepts of Environmental Law Douglas Fisher, 2022-11-25. This expanded and updated Research Handbook delivers an authoritative and in-depth guide to the conceptual foundations of environmental law. It offers a nuanced reflection on the underlying principles by exploring issues such as human rights, constitutional rights, sustainable development and environmental impact assessment within the context of environmental law. Research Handbook on International Law and Domestic Legal Systems Helmut P. Aust, Heike Krieger, Felix Lange, 2024-10-03. This Research Handbook examines the complex relationship between international law and domestic legal systems. An interdisciplinary range of experts analyse the topic from historical, conceptual, critical and doctrinal perspectives, setting the tone for future reflections on the development of the international legal order. *NGOs, Knowledge Production and Global Humanist Advocacy* Alistair Markland, 2020-03-02. NGOs, Knowledge Production and Global Humanist Advocacy is an empirically and theoretically rich account of how international non-governmental organisations produce knowledge of and formulate understandings about the world around them. The author applies critical and sociological perspectives to analyse the social and political limits of knowledge generated in support of global advocacy efforts aimed at enhancing human rights and preventing violent conflicts. It is found that despite their transnational networks and claims to humanist universality, the proximity of global advocates to Western power structures and elite social spaces delimits their worldviews and curtails the potential for radical departures from mainstream political thinking. This book will be of interest to scholars and students of international relations, human rights, the sociology of knowledge, peace and conflict studies and critical security studies.
