Watching the Internet José M.

Alvarez-Monzoncillo,2022-03-03 This book deals with the Internet s influence on television The traditional value chain has been transformed giving rise to new forms of television that foster user generated content We no longer dream about interactivity but participation Accordingly the digital natives like to tag programs and films in the cyberspace each conveniently tagged so that other users can find it Although many questions have yet to be answered this decade s motto may be the tag is the medium However on demand television is unlikely to replace mass TV The Web 2 0 has brought an end to the my TV concept of the dotcom age and may put our TV in its place These changes pose serious problems The industry is facing the real threat of revenue cannibalization because current online business models are not financially rewarding The Internet is not yet a profitable market for programs that require additional revenues to advertising To date the box office video and premium television have been the main sources of revenue of the audiovisual industry This book explores the factors at play in this shift

Sociedad mediatizada Dênis de Moraes, 2018-06-19

Una parte considerable de los cambios en la forma contemporánea de vivir está vinculada a la primacía de la comunicación en el capitalismo globalizado. Redes electrónicas satélites y fibras ópticas interconectan países, culturas y economías. En todo el planeta hay una hiperinflación de imágenes, sonidos y datos. Todo parece resumirse a los modos de exhibición y circulación en telas y monitores, la moda, el cuerpo, el sexo, las competiciones deportivas, la religión, la música, los museos. Las relaciones sociales y los procesos de producción simbólica están cada vez más mediatizados, es decir, bajo la interferencia de mediaciones e interacciones basadas en dispositivos teleinformacionales. Los medios desempeñan un papel clave en la fixación de hábitos y creencias, así como en la consolidación de la lógica de la lucratividad en todos los ámbitos culturales. Este libro se propone ampliar la reflexión sobre las mutaciones y los dilemas de una época saturada de impactos audiovisuales, estilos consumistas y accesos diferenciados a las tecnologías. Es posible hablar en diversidad frente al control de los flujos informativos por conglomerados transnacionales. Las innovaciones favorecen la diseminación de conocimientos o mantienen las zonas de exclusión. Las identidades y tradiciones culturales resisten a las nuevas tecnologías. Para evaluar cuestiones tan decisivas en la lucha por la democratización de la comunicación, Dênis de Moraes reúne autores de prestigio internacional e indiscutible compromiso con el pensamiento crítico. El conjunto de interpretaciones nos permite profundizar análisis sobre la influencia sociocultural de los medios en un contexto histórico en que avances tecnológicos y novedades al minuto se confunden con desigualdades alarmantes y emociones fugaces.
