The Current State of Domain Name Regulation Konstantinos Komaitis, 2010-07-12 In this book Konstantinos Komaitis identifies a tripartite problem intellectual institutional and ethical inherent in the domain name regulation culture Using the theory of property Komaitis discusses domain names as sui generis e property rights and analyses the experience of the past ten years through the Uniform Domain Name Dispute Resolution Policy UDRP and the Anticybersquatting Consumer Protection Act ACPA The institutional deficit he identifies generates a further discussion on the ethical dimensions in the regulation of domain names and prompts Komaitis to suggest the creation of an environment based on justice The relationship between trademarks and domain names has always been contentious and the existing institutions of the UDRP and ACPA have not assisted in alleviating the tension between the two identifiers Over the past ten years the trademark

community has been systematic in encouraging and promoting a culture that indiscriminately considers domain names as secondclass citizens suggesting that trademark rights should have priority over the registration in the domain name space Komaitis disputes this assertion and brings to light the injustices and the trademark oriented nature of the UDRP and ACPA He queries what the appropriate legal source to protect registrants when not seeking to promote trademark interests is He also delineates a legal hypothesis on their nature as well as the steps of their institutionalisation process that we need to reverse seeking to create a just framework for the regulation of domain names Finally he explores how the current policies contribute to the philosophy of domain names as second class citizens With these questions in mind Komaitis suggests some recommendations concerning the reconfiguration of the regulation of domain names Megaregulation Contested Benedict Kingsbury, David M. Malone, Paul Mertenskötter, Richard B. Stewart, Thomas Streinz, Atsushi Sunami, 2019-06-06 The Japan led Trans Pacific Partnership CPTPPA of 2018 is the most far reaching megaregional economic agreement in force with several major countries beyond its eleven negotiating countries also interested Still bearing the stamp of the original US involvement before the Trump era reversal TPP is the first instance of megaregulation a demanding combination of interstate economic ordering and national regulatory governance on a highly ambitious substantive and trans regional scale Its text and ambition have influenced other negotiations ranging from the Japan EU Agreement JEEPA and the US Mexico Canada Agreement USMCA to the projected Pan Asian Regional Comprehensive Economic Partnership RCEP This book provides an extensive analysis of TPP as a megaregulatory project for channelling and managing new pressures of globalization and of core critical arguments made against economic megaregulation from standpoints of development inequality labour rights environmental interests corporate capture and elite governance Specialized chapters cover supply chains digital economy trade facilitation intellectual property currency levels competition and state owned enterprises government procurement investment prescriptions for national regulation and the TPP institutions Country studies include detailed analyses of TPP related politics and approaches in Japan Mexico Brazil China India Indonesia and Thailand Contributors include leading practitioners and scholars in law economics and political science At a time when the WTO and other global scale institutions are struggling with economic nationalism and geopolitics and bilateral and regional agreements are pressed by public disagreement and incompatibility with digital and capital and value chain flows the megaregional ambition of TPP is increasingly important as a precedent requiring the close scrutiny this book presents

perspectives *The Oxford Handbook of Transnational Law* Peer Zumbansen, 2021-04-30 The Oxford Handbook of Transnational Law offers a unique and unparalleled treatment and presentation in the field of Transnational Law that has become one of the most intriguing and innovative developments in legal doctrine scholarship theory and practice today This in itself constitutes an ambitious editorial project not only within law and legal doctrine but also with regard to an increasing interest in an interdisciplinary engagement of law with social sciences including sociology anthropology political science geography and political theory Closely tied into the substantive transformation that many legal fields are undergoing is the observation that many of these developments are driven by changes in an increasingly global legal practice today The concept then of transnational law aims at capturing the distinctly border crossing nature even of those legal fields which had for the longest been time been seen as having merely domestic relevance This shift also requires a conscious effort among law school classroom instructors casebook authors and curriculum reformers to adapt their teaching content to these circumstances As the authors of this Handbook make clear this adaptation requires a close dialogue between a scholarly investigation into the transnational concept of law and the challenges faced by practicing lawyers be that as solicitor in house counsel as judges or as bureaucrats in a globalized regulatory and socio economic environment While the main thrust is on the transnationalization of legal doctrine and legal theory with a considerable contribution from and engagement with social sciences the Handbook features numerous reflections on the relationship between transnational law and legal practice
