Internet Watch Dog:

The Watchdog Still Barks Beth Knobel, 2018-03-27 Perhaps no other function of a free press is as important as the watchdog role its ability to monitor the work of the government. It is easier for politicians to get away with abusing power, wasting public funds and making poor decisions if the press is not shining its light with what is termed accountability reporting. This need has become especially clear in recent months as the American press has come under virulent direct attack for carrying out its watchdog duties. Upending the traditional media narrative that watchdog accountability journalism is in a long, dismaying decline, *The Watchdog Still Barks* presents a study of how this most important form of journalism came of age in the digital era at American newspapers. Although the American newspaper industry contracted significantly during the 1990s and 2000s, Fordham professor and former CBS News producer Beth Knobel illustrates through empirical data how the amount of deep watchdog reporting on the newspapers studied front pages generally increased over time despite shrinking circulations, low advertising revenue and pressure to produce the kind of soft news that plays well on social media. Based on the first content analysis to focus specifically on accountability journalism nationally, *The Watchdog Still Barks* examines the front pages of nine newspapers located across the United States to paint a broad portrait of how public service journalism has changed since 1991 as the advent of the Internet transformed journalism. This portrait of the modern newspaper industry shows how papers of varying sizes and ownership structures around the country marshaled resources for accountability reporting despite significant financial and technological challenges. *The Watchdog Still Barks* includes original interviews with editors who explain why they are staking their papers' futures on the one thing that American newspapers still do better than any other segment of the media: watchdog and investigative reporting. *Industrial Internet of Things* Anand Sharma, Sunil Kumar Jangir, Manish Kumar, Dilip Kumar Choubey, Tarun Shrivastava, S. The Internet Revolution in the Sciences and Humanities Alan G. Gross, Joseph E. Harmon, 2016 The Internet Revolution in the Sciences and Humanities takes a new look at C P Snow s distinction between the two cultures a distinction that provides the driving force for a book that contends that the Internet revolution has sown the seeds for transformative changes in both the sciences and the humanities It is because of this common situation that the humanities can learn from the sciences as well as the sciences from the humanities in matters central to both generating evaluating and communicating knowledge on the Internet In a succession of chapters the authors deal with the state of the art in web based journal articles and books web sites peer review and post publication review In the final chapter they address the obstacles the academy and scientific organizations face in taking full advantage of the Internet outmoded tenure and promotion procedures the cost of open access and restrictive patent and copyright law They also argue that overcoming these obstacles does not require revolutionary institutional change In their view change must be incremental making use of the powers and prerogatives scientific and academic organizations already have

languages of how new media technologies are being used and are impacting on religion in the East Asian context while also developing further our understandings of religion in a technologically advanced country Scholars studying the relationship of religion and the Internet can no longer work on prevailing notions that have thus far characterised the field such as the assumption that the Internet is a Western centric phenomenon and that studies of English language sites relating to religion can provide a viable model for wider analyses of the topic Despite this growing amount of research on religion and the Internet comparatively little has focused on non Western cultures The general field of study relating to religion and the Internet has paid scant attention to Asian contexts The field needs a full length and comprehensive study that focuses on the Japanese religious world and the Internet not merely to redress the imbalances of the field thus far but also because such studies will be central to the emerging field of the study of religion and the Internet in future They will provide important means of developing new theories constructing new paradigms and understanding the underlying dynamics of this new media form

Content Distribution for Mobile Internet: A Cloud-based Approach Zhenhua Li, Yafei Dai, Guihai Chen, Yunhao Liu, 2023-02-14 Content distribution i e distributing digital content from one node to another node or multiple nodes is the most fundamental function of the Internet Since Amazon s launch of EC2 in 2006 and Apple s release of the iPhone in 2007 Internet content distribution has shown a strong trend toward polarization On the one hand considerable investments have been made in creating heavyweight integrated data centers heavy cloud all over the world in order to achieve economies of scale and high flexibility efficiency of content distribution On the other hand end user devices light end have become increasingly lightweight mobile and heterogeneous creating new demands concerning traffic usage energy consumption bandwidth latency reliability and or the security of content distribution Based on comprehensive real world measurements at scale we observe that existing content distribution techniques often perform poorly under the abovementioned new

circumstances Motivated by the trend of heavy cloud vs light end this book is dedicated to uncovering the root causes of today's mobile networking problems and designing innovative cloud based solutions to practically address such problems Our work has produced not only academic papers published in prestigious conference proceedings like SIGCOMM NSDI MobiCom and MobiSys but also concrete effects on industrial systems such as Xiaomi Mobile MIUI OS Tencent App Store Baidu PhoneGuard and WiFi com A series of practical takeaways and easy to follow testimonials are provided to researchers and practitioners working in mobile networking and cloud computing In addition we have released as much code and data used in our research as possible to benefit the community

Internet Gambling Sally Gainsbury, 2012-03-02 Internet gambling is one of the fastest growing forms of gambling Global Internet gambling expenditure is predicted to reach US 33.6 billion in 2011 This is higher than worldwide movie box office revenues and represents 9% of the international gambling market The rapid increase in expenditure of 354% since 2003 has occurred despite Internet gambling being prohibited in several key markets including the US and China It also suggests that current regulation may be somewhat outdated and ineffective as more and more people turn to this mode of gambling Internet gambling is highly accessible with over 2,400 sites available 24/7 through computers mobile phones wireless devices and even interactive televisions Gamblers can now play casino games bingo cards and poker bet on races sports and even celebrity weddings using over 199 means of electronic payments without leaving the house Increasing international jurisdictions are legalizing Internet gambling and the constant accessibility of online gambling has critical social implications Gambling operators are using aggressive advertising campaigns to move into new markets Internet gambling appears to be particularly appealing to youth who are gambling online at substantially higher rates than adults Furthermore Internet gambling appears to be related to problem gambling with rates of problem gambling three to four times higher among Internet than non Internet gamblers indicating that it may have a substantial social cost The anonymity of online sports betting poses a significant threat to the integrity of sport at all levels with increasing allegations of match fixing and cheating Estimates suggested that 50% of all bets on the 2010 FIFA World Cup were placed online worth an estimated 500 million These figures represent a 700% rise in online betting since the 2006 tournament and included many new players that opened online accounts It is essential that appropriate responses are made by governments industry professionals and the public in response to Internet gambling This book will provide a comprehensive and up to date overview of Internet gambling including the social impact and regulatory options A global outline will include the characteristics and features of the many forms of Internet gambling including the current market and participation and differences between Internet and non Internet gambling Specific regional considerations will be explored including regulatory responses and options Importantly the social consequences and costs of Internet gambling will be examined including the impact of online gambling on sports youth and problem gambling Strategies for prevention and responsible gambling will be considered as well as expected trends

and expanding the model created in 2003 we again solicited and selected quality workshop proposals to complement the more archival nature of the main conferences with research results in a number of selected and more avant garde areas related to the general topic of Web based distributed computing. For instance the so called Semantic Web has given rise to several novel research areas combining linguistics information systems technology and artificial intelligence such as the modeling of legal regulatory systems and the ubiquitous nature of their usage. We were glad to see that ten of our earlier successful workshops ADI CAMS EI2N SWWS ORM OnToContent MONET SEMELS COMBEK IWSSA re appeared in 2008 with a second third or even fifth edition sometimes by alliance with other newly emerging workshops and that no fewer than three brand new independent workshops could be selected from proposals and hosted ISDE ODIS and Beyond SAWSDL. Workshop audiences productively mingled with each other and with those of the main conferences and there was considerable overlap in authors.
