Guidebook for Clinical Psychology Interns Gary K. Zammit, James W. Hull, 2013-11-21 The internship is the capstone experience of professional education and training preparatory for the application of psychology in health and human services It is analagous for the practice of psychology to what the doctoral dissertation represents in the student s development as a scholar At its best the internship should be viewed as far more than simply a require ment for one s degree or licensure a rite de passage for entry into the profes sion Rather it should be regarded by students and faculty alike as a rich opportunity for personal and professional growth the opportunity to as sess and even rethink one s assumptions about human behavior and psy chological problems in the context of different client populations types of problems addressed and psychological service system environments In articulating the first formal guidelines for the accreditation of grad uate training programs in clinical psychology a committee of the American Psychological Association comprised of distinguished psychologists of their day asked What are the aims of a psychological internship The committee replied to that question as follows Underlying all of its aims is the principle that the knowledge es sential to the practice of clinical psychology cannot be obtained solely from books lectures or any other devices which merely provide infor mation about people or about ways of studying them

Brad Johnson Ph.D., Nadine Kaslow Ph.D., 2014-02-27. The Oxford Handbook of Education and Training in Professional Psychology provides the first comprehensive treatment of the processes and current state of the art practices bearing on educating and training professional psychologists. Thousands of psychologists are employed full time as faculty members or clinical supervisors in graduate practicum, internship, and postdoctoral training programs or training sites. This handbook provides a single resource that pulls together the substantial scholarship on education and training in psychology, covering the full spectrum of historic developments, salient issues, current standards, and emerging trends in psychology education and training. It provides a thorough analysis of doctoral and postdoctoral training for psychologists in clinical counseling or school psychology specialties. Because competency issues are moving to the forefront in the design of training programs and the evaluation of trainee performance, the handbook's authors have made models and standards for competency a primary theme. This volume captures the current state of education and training while emphasizing emerging trends and forecasting future directions. Handbook of Psychology, Clinical Psychology Irving B. Weiner, George Stricker, Thomas A. Widiger, 2012-10-15. Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do. This award-winning twelve-volume reference covers every aspect of the ever-fascinating discipline of psychology and represents the most current knowledge in the field. This ten-year revision now covers discoveries based in neuroscience, clinical psychology's new interest in evidence-based practice and mindfulness, and new findings in social, developmental, and forensic psychology. **Advances in Clinical Child Psychology** Benjamin Lahey, 2012-12-06. A decade ago *Advances in Clinical Child Psychology* was conceived to provide approximately annual updates on the forward edge of research and practice in this rapidly growing field. A look back at the 56 chapters published in previous volumes provides a broad overview of the direction of advancement in clinical child psychology at least as viewed by one collection of editors, consulting editors, and authors. The trends are clear. There have been decreasing numbers of advances in modes and methods of therapy, an increasing emphasis on the family, a renewed interest in experimental psychopathology, studies of classification, etiology, and prognosis, a growing rapprochement between biological and psychological perspectives, and continued strong interest in cognition and social relationships. The current volume clearly shows these directions in the growth of the field. One chapter discusses etiology, four are concerned with the psychopathology of specific diagnostic categories, one takes an expanded cognitive approach to social competence, and two look at the family system by examining the effects of male parents and children on other members of the family. A final

chapter opens discussion on the important topic of the nature of excellence in the training of clinical child psychologists It is hoped that this chapter will initiate a national dialogue on this multifaceted and often neglected topic *Psychology Internship Program*, 1989 *Textbook of Clinical Neuropsychology* Joel E. Morgan, Joseph H. Ricker, 2016-02-26 Containing 50 chapters by some of the most prominent clinical neuropsychologists the *Textbook of Clinical Neuropsychology* sets a new standard in the field in its scope breadth and scholarship Unlike most other books in neuropsychology the *Textbook* is organized primarily around syndromes disorders and related clinical phenomena Written for the clinician at all levels of training from the beginner to the journeyman the *Textbook* presents contemporary clinical neuropsychology in a comprehensive volume Chapters are rich with reviews of the literature and clinical case material spanning a range from pediatric to adult and geriatric disorders Chapter authors are among the most respected in their field leaders of American Neuropsychology known for their scholarship and professional leadership Rarely have so many distinguished members of one discipline been in one volume This is essential reading for students of neuropsychology and all others preparing for careers in the field *Encyclopedia of Counseling* Frederick T. Berler, Barry A. Edelstein, 2013-11-11 Accountability in clinical training implies a strong relationship between the training outcomes touted by a training program and the performance of its graduates The training program and its faculty must be able to ensure that students have the competencies necessary for entering the profession and can offer competent services In addition responsibility for the quality and value of training must be assumed by the profession Pressure for accountability is becoming increasingly apparent as the public learns about fraud waste and abuse in publicly funded programs Fishman Neigher 1982 Federally supported clinical training programs have had to defend their training practices against threats of funding loss without the hard data needed to support their practices Funding seems to have been forthcoming mostly because of our ability to demonstrate the need for clinical counseling and school psychologists Graduates seeking professional careers in such applied fields demand considerable trust from their clientele and the public at large when they establish themselves
