Promoting Self-Management of Chronic Health Conditions Erin Martz, 2017-07-18 It is common for a doctor or healthcare professional to see an individual with a chronic health condition only a few times a year for a brief office appointment Yet the individual has to live with the health condition 24 hours a day 7 days a week So who really is in charge of managing the health condition The individual has to micro manage their condition while healthcare professionals can provide advice on treatment approaches or the macro management of the chronic health condition Promoting Self Management of Chronic Health Conditions covers a range of topics related to self management theories and practice interventions that have been scientifically tested and information that individuals with specific conditions should know or be taught by healthcare professionals Data suggest that currently a majority of individuals in the U S has a chronic health condition and as society ages and healthcare continues to improve individuals life spans more people will experience a chronic health condition Health systems need to shift from an acute care model of treatment to a chronic care treatment model in view of this trend The expanding need for the development and scientific analysis of formal self management programs accompany this increase in chronic health conditions This book serves the critical purpose of helping to increase understanding of self management and how healthcare providers can empower individuals with chronic health conditions to self manage

Unlocking the Emotional Brain Bruce Ecker, Robin Ticic, Laurel Hulley, 2024-04-22 This highly influential volume now in a much expanded second edition delivers major advances for psychotherapy all empirically grounded in memory reconsolidation neuroscience A great increase of therapeutic effectiveness can be gained thanks to a clear map of the brain s innate core process of transformational change a process that does not require use of any particular system or techniques and is therefore remarkably versatile Twenty six case examples show the decisive ending of a vast range of major symptoms including depression anxiety panic shame self devaluing anger perfectionism alcohol abuse sexual aversion compulsive eating and obesity paralyzed self expression and teen ADHD all transformed through deeply resolving underlying disturbances such as complex trauma lifelong oppression by systemic racism and homophobia childhood sexual molestation parental narcissistic domination violent assault trauma natural disaster trauma and childhood traumatic aloneness and neglect This is a transdiagnostic transtheoretical lucid understanding of therapeutic action based for the first time in the history of the psychotherapy field on rigorous empirical knowledge of an internal mechanism of change and it achieves a

fundamental unification of the confusingly fragmented psychotherapy field diverse systems no longer seem to belong to different worlds because they now form a wonderful repertoire of options for facilitating the same core process of transformational change as shown in case examples from AEDP Coherence Therapy EFT EMDR IFS IPNB ISTDP psychedelic assisted therapy and SE It is now clear why therapy systems that differ strikingly in technique and theory can produce the same quality of liberating change Practitioners who value deep connection with their clients are richly rewarded by the experiential depth that this core process accesses where no awareness had previously reached whether sessions are done in person or via online video It is an embarrassment of riches because in addition we gain the decisive resolution of several longstanding polarizing debates regarding the nature of symptom production the prevalence of attachment issues the operation of traumatic memory the functions of the client therapist relationship the role of emotional arousal in the process of change and the relative importance of specific versus non specific factors

Entering the Behavioral Health Field Diane Suffridge, 2016-04-28 This text provides new clinicians with an overview of the tasks involved in behavioral health treatment as it is practiced in community based training organizations The text's specific focus is on the application of theoretical and academic knowledge to clinical work as a psychotherapist or case manager with a case example that follows treatment from the first session through termination It contains an overview of all aspects of treatment that are required in these organizations which are the primary settings for practicum internship and post graduate training
