An Architecture of Place Randall S. Lindstrom, 2024-06-25 Challenging mainstream architecture s understandings of place this book offers an illuminating clarification that allows the idea s centrality in all aspects of everyday design thinking to be rediscovered or

considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines *The Spiritual City* Philip Sheldrake,2014-04-03 A Spiritual City provides a broad examination of the meaning and importance of cities from a Christian perspective Contains thought provoking theological and spiritual reflections on city making by a leading scholar Unites contemporary thinking about urban space and built environments with the latest in urban theology Addresses the long standing anti urban bias of Christianity and its emphasis on inwardness and pilgrimage Presents an important religious perspective on the potential of cities to create a strong human community and sense of sacred space *Explorations in Spirituality* Philip Sheldrake,2010 A distinctive exposition of the main elements of the study of Christian spirituality that also underlines the essentially socially transformative nature of the Christian spiritual tradition *Civility* Philip Sheldrake,2024-08-19 Civility offers a thoughtful response to one of the most significant social challenges and public problems that we face in contemporary society particularly in the Western world The book identifies and discusses the critical public social values and virtues that we need to focus upon and actively to promote to counter these problems and overall to develop a healthy human society To achieve an effective inclusive and just society we must first reframe how we understand politics What does politics mean and how should it be practiced Politics in its true sense does not mean something ideological but rather it involves the service of the polis that is the human community We also need to recover a robust sense of public virtues The book describes some of the critical virtues and suggests how they may be cultivated The overall argument is that in a healthy society it is vitally important to concentrate more effectively on public virtues and values rather than simply to focus on encouraging material success or on creating efficient social and political systems as the main goals that we seek to develop in our societies The volume focuses particularly on the public virtues of civility having a sense of place building community solidarity and responsibility respect and compassion and cultivating discernment that is the art of how to choose well The book concludes by offering reflections on the particular role of education especially school education and of public leadership as two central elements in reshaping a healthy society based on clear societal values **Rethinking Dwelling** Jeff Malpas,2021-07-15

Over the last twenty years Jeff Malpas research has involved his engagement with architects and other academics around the issues of place architecture and landscape and particularly the way these practitioners have used the work of Martin Heidegger In *Rethinking Dwelling* Malpas primary focus is to rethink of these issues in a way that is directly informed by an understanding of place and the human relation it With essays on a range of architectural and design concerns as well as engaging with other thinkers on topics including textuality in architecture contemporary high rise construction the significance of the line the relation between building and memory and the idea of authenticity in architecture this book departs from the traditional phenomenological focus and provides students and scholars with a new ontological assessment of landscape and architecture As such it may also be used on other spatial or topographic disciplines including geography sociology anthropology and art in which the spatial turn has been so important

A Christian Theology of Place John Inge, 2017-03-02 The place in which we stand is often

taken for granted and ignored in our increasingly mobile society Differentiating between place and space this book argues that place has very much more influence upon human experience than is generally recognised and that this lack of recognition and all that results from it are dehumanising John Inge presents a rediscovery of the importance of place drawing on the resources of the Bible and the Christian tradition to demonstrate how Christian theology should take place seriously A renewed understanding of the importance of place from a theological perspective has much to offer in working against the dehumanising effects of the loss of place Community and places each build the identity of the other this book offers important insights in a world in which the effects of globalisation continue to erode people s rootedness and experience of place
