

Historical interpretations of the causes of the English Civil War

Here is a summary of the main differences in the historiography on the causes of the English Civil War.

Whig Historians: Explain the Civil War in terms of the clash between liberty (freedom of the people) and absolutism (the tyranny of Charles' monarchy). They see the Civil War as a result of a parliament struggle to prevent the king from undermining the traditional rights and freedoms of the English people. They see the Civil War as an inevitable event and focus on long-term issues.

Marxist Historians: Shift the focus from constitutional issues (ie away from the idea of it being a struggle between king and parliament over who should have the right to govern). They emphasise the role of class conflict and a rising bourgeois class (middle class) who challenge the way the country is run and provoke hostilities. They see the Civil War as an inevitable event and focus on long-term issues.

Revisionist Historians: Challenge the idea that the Civil War was inevitable because of ideological or class struggle. They emphasise the role of short-term factors, such as Charles' personality and the divisive effects of his religious policies.

Post-Revisionists: Also challenge the idea that the Civil War was inevitable. They often focus on the English Civil War as part of a larger British perspective (ie they stress the importance of events in Scotland and Ireland). Some also admit that long-term causes (before the reign of Charles) may have an important place in provoking conflict.

A critical analysis of its causes and consequences** Tim Borneck, 2016-04-15 Seminar paper from the year 2015 in the subject Economics Finance grade 1.7 University of Applied Sciences Essen language English abstract In 2007 the biggest financial crisis after the Great Depression of 1939 took place One theoretical framework explaining financial crises of that kind was envisioned by Hyman P Minsky 1919 1996 in the latter half of the 20th century

and was not considered in this context for a long time The most prominent part of the theoretical framework the financial instability hypothesis FIH emphasises that modern capitalist system is prone to bouts of relative instability and financial collapse When the storm in 2007 broke it was discovered again and the world began to talk about a Minsky moment Prominent economics called the theory a required reading and championed it as visionary Therefore it is no surprise that the book about his FIH was traded at prices over 2000 US right after the financial crisis Until the year 2007 the economic world followed another school of thought The so called neoclassic described a world in which financial crises would only occur if exogenous shocks would disturb the self regulating power of the markets In detail this is called the efficient market hypothesis EMH In addition means this that financial crises caused by systemically reason are not part of the theoretical model On the contrary Minsky described a cyclical model which tries to implement loan relationships financial institutions financial innovations and uncertainty in the analysis of the modern capitalism An emphasis lays on the financing structure of different economic players and the role of financial institutions regarding their influence on the real economy Minsky's theory is based on the whole economic cycle and really tries to explain how financial crises are actually caused Additionally other authors see the thoughts of Minsky as an acknowledged theory regarding financial crises in the past Although all these factors make the theory interesting for the recent crisis and different economics had called the financial crisis a Minsky moment a huge discussion if the theory is really applicable came up Further if the theory is really applicable the next question would be which consequences have been drawn in order to prevent another crisis
