**The Intersection of Race, Class, and Gender in Multicultural Counseling** Donald B. Pope-Davis, Hardin L. K. Coleman, 2001 Featuring an outstanding group of the leading theorists and researchers from the fields of multicultural psychology and counseling this book begins with chapters on how the interplay of such variables of class gender and race interact in the development of an individual in a pluralistic society It then presents theories on how to integrate issues of class gender and race into counseling theory

**Social Justice, Multicultural Counseling, and Practice** Heesoon Jun, 2010 This book takes a new approach to teaching students to think and learn about issues of race and diversity It aims to break down the traditional categorizations of racial ethnic groupings and focuses on teaching students to think and learn in a multidimensional manner rather than in a linear fashion The key to the book lies in its aim to teach students to practise culturally competent counselling by taking into consideration a client's multiple identities such as a middle aged African American woman who might be facing issues due to her racial grouping her age and her gender The book is filled with activities exercises and examples that help students think about racism in a non traditional manner rather than the typical ways often taught making it very timely and reflecting the transformation of thinking that is occurring in the field

**Deconstructing Heterosexism in the Counseling Professions** James M Croteau, Julianne S Lark, Melissa A Lidderdale, Y. Barry Chung, 2004-08-03 Until recently the lives and issues of Lesbian Gay and Bisexual LGB people have been rendered largely invisible in the larger society and in the counseling professions LGB affirmative counseling professionals are no longer without voice however the stories of navigating sexual orientation as counseling professionals have not been told or explored in any systematic way Deconstructing Heterosexism in the Counseling Professions uses the personal narratives of lesbian gay bisexual and heterosexual counseling psychologists and counselor educators to deconstruct the heterosexist discourse in the counseling professions envision a discourse of sexual orientation equity and make practical suggestions for addressing sexual orientation in professional life The narrative approach

encompasses a diversity of stories and experiences including an emphasis on racial and cultural contexts These narratives and their analyses serve as a means for the individual and collective self examination that is needed to move LGB affirmative practice training and scholarship from the margins to the center of what it means to be a counseling professional Key Features Rather than a focus on how to the focus is on stimulating collective and individual self examination and providing empowerment and guidance to counseling professions in navigating sexual orientation in one s professional life This book exposes and challenges the heterosexist discourse in the counseling professions AND examines how to build the strength and complexity of the current LGB affirmative counter discourse in the counseling professions The chapters in the second section of the book provide unique treatments of difficult issues for counseling professionals concerning sexual orientation tensions between race and sexual orientation and issues around openness versus other ways to manage a minority sexual identity The book is authored by over 30 counseling professionals and contains narratives about the experiences of over 20 professionals many of whom are well known in the LGB affirmative counseling and in the larger fields of counseling psychology and counselor education Deconstructing Heterosexism in the Counseling Professions will be essential reading for graduate students practitioners and faculty who are interested in issues of sexual orientation and are in counseling psychology and or the many sub specialties of counseling It will also be of interest to counseling professionals whose primary interest may lie in other issues of diversity particularly the multicultural and feminist professional communities **Gender Norms and**

**Intersectionality** Riki Wilchins, 2019-03-25 There have been few if any attempts to translate the immense library of academic studies on gender norms for a lay audience or to illustrate practical ways in which their insights could and should be applied Similarly there have been few attempts to build the case for gender in diverse fields like health education and economic security within a single book one which also uses an intersectional lens to address issues of race and class This book not only looks at the impact of rigid gender norms on young people who internalize them but also shows how the health educational and criminal justice systems with which young people interact are also highly gendered systems that relentlessly police and sustain very narrow ideas of masculinity and femininity particularly among youth Current treatments of a gender lens or gender analysis both at home and abroad usually conflate gender with women and or trans Gender Norms and Intersectionality shows conclusively how this is both inadequate and wrong headed It documents why gender norms must be moved to the center of the discourses aimed at improving life outcomes for at risk communities And it does so while acknowledging the insights of queer theorists about bodies power and difference This book provides a starting point for a long overdue movement to elevate applied gender studies providing both a reference and guide for researchers students policymakers funders non profit leaders and grassroots advocates It aims to transform readers view of a broad array of familiar social problems such as basic wellness and reproductive health education economic security and partner male on male and school violence showing how gender norms are an integral if overlooked key to understanding each **New**

**Transcending Racial Barriers** Michael O. Emerson, George A. Yancey, 2011 Despite recent progress against racial inequalities American society continues to produce attitudes and outcomes that reinforce the racial divide In *Transcending Racial Barriers* Michael Emerson and George Yancey offer a fresh perspective on how to combat racial division They document the historical move from white supremacy to institutional racism then look at modern efforts to overcome the racialized nature of our society The authors argue that both conservative and progressive approaches have failed as they continually fall victim to forces of ethnocentrism and group interest They then explore group interest and possible ways to account for the perspectives of both majority and minority group members They

look to multiracial congregations multiracial families the military and sports teams all situations in which group interests have been overcome before In each context they find the development of a core set of values that binds together different racial groups along with the flexibility to express racially based cultural uniqueness that does not conflict with this critical core Transcending Racial Barriers offers what is at once a balanced approach towards dealing with racial alienation and a bold step forward in the debate about the steps necessary to overcome present day racism
